## 1z0-1075-25 Exams Dumps - Study 1z0-1075-25 Group

Testing yourself is an effective way to enhance your knowledge and become familiar with the 1z0-1075-25 exam format. Rather than viewing the 1z0-1075-25 test as a potentially intimidating event, TorrentValid Oracle Manufacturing Cloud 2025 Implementation Professional (1z0-1075-25) desktop and web-based practice exams help candidates assess and improve their knowledge. If your 1z0-1075-25 Practice Exams (desktop and web-based) results aren't ideal, it's better to experience that shock during a mock exam rather than the 1z0-1075-25 actual test.

## Oracle Manufacturing Cloud 2025 Implementation Professional Sample Questions (Q25-Q30):

### NEW QUESTION # 25

An employee is responsible for dealing with different manufacturing practices and processes, machines, tools, and equipment that turn raw material into a product.

Which seeded job role must you assign to this employee?

- A. Manufacturing Supervisor
- **B. Manufacturing Engineer**
- C. Production Operator
- D. Production Supervisor
- E. Production Engineer

**Answer: B**

Explanation:

In Oracle Manufacturing Cloud, the Manufacturing Engineer role is responsible for dealing with various manufacturing practices, processes, machines, tools, and equipment that transform raw materials into finished products. This role focuses on defining and managing production processes, resources, and operations in manufacturing plants.

\* Manufacturing Engineer : This role involves creating and maintaining manufacturing processes, production resources, and work instructions. It ensures that products are manufactured efficiently and in compliance with quality standards.

Oracle Cloud documentation for "Manufacturing Engineer " describes this role as the primary one for handling manufacturing setups, process definitions, and equipment management in the system.

### NEW QUESTION # 26

A Plant Manager bought several machines for their ABC manufacturing plant. The plant is set up with a separate cost element set, ABC, in Manufacturing Cloud.

How must the Plant Manager configure these machines so that they are costed to the work order for which operations are performed on them?

- A. Set up the machines with a cost element type of " Resource " by selecting Cost Element Set Common.
- B. Set up the machines with a cost element type of " Overhead " by selecting Cost Element Set Common.
- **C. Set up the machines with a cost element type of " Resource " by selecting Cost Element Set ABC.**
- D. Set up the machines with a cost element type of " Overhead " by selecting Cost Element Set ABC.

**Answer: C**

Explanation:

When configuring machines that will be used in production operations and will incur costs associated with work orders, the correct setup for these machines involves:

\* Setting up the machines as a " Resource " in the cost element set ABC : This allows the machines to be directly associated with the work orders for which they are used, ensuring that their costs are appropriately tracked and charged to the work order. Resources include equipment, labor, and other direct costs involved in production.

Incorrect options:

\* " Overhead " (B, D) : Overhead costs typically represent indirect costs, not the direct usage of machines in production.

\* Cost Element Set Common (A) : Since the plant uses a separate cost element set (ABC), the machines must be assigned to this specific set, not the Common cost element set.

Oracle Manufacturing Cloud documentation on Cost Element Setup for resources and overheads outlines how machines and other resources are configured for costing purposes.

### NEW QUESTION # 27

Which three can you set as Overcompletion Tolerance Type and its value for a subcomponent yield, so that the job order can report the excess production completion?

- **A. Overcompletion Tolerance Type = Percentage; value = 100**
- **B. Overcompletion Tolerance Type = Amount; value > 0**
- **C. Overcompletion Tolerance Type = Percentage; value > 0**

- D. Overcompletion Tolerance Type = Percentage; value = 0
- E. Overcompletion Tolerance Type = Amount; value = 0

**Answer: A,B,C**

Explanation:

In Oracle Manufacturing Cloud, overcompletion tolerance allows for the reporting of excess production completion beyond the planned amount. The overcompletion tolerance type and value determine how much extra production can be reported:

- \* Percentage, value = 100 allows the system to accept overcompletion of up to 100% more than the planned quantity.
- \* Amount, value > 0 specifies a fixed amount by which overproduction can be tolerated.
- \* Percentage, value > 0 allows overproduction by a percentage greater than 0 but less than 100.

Incorrect settings:

- \* A : Setting the percentage to 0 means no overcompletion is allowed.
- \* C : An amount of 0 also means no excess production can be reported.

Oracle Cloud ' s work order management guide explains how to configure overcompletion tolerance types and values for accurate reporting of production.

### NEW QUESTION # 28

Production operations need operators to execute the right steps to produce quality products, so want to use " View Document Items on a Dispatch List. " Which statement is NOT true?

- A. You cannot view the document item attachment on the Manage Supplier Operations page.
- B. You can view the document item attachment in the dispatch list and on the Manage Supplier Operations page by using the attachment icon.
- C. You can add attachments to the document item and invoke the engineering change order to release the latest revision of the document item and attachment.
- **D. You will always see the active revision of the attachment from currently effective revision of the document from Master Organization.**

**Answer: D**

Explanation:

When using the " View Document Items on a Dispatch List " functionality, production operators can view and access necessary document attachments to ensure correct steps in the manufacturing process. The statement that is not true is:

\* Statement B is incorrect because you do not always see the active revision of the attachment from the currently effective revision in the Master Organization. The revision displayed in the dispatch list may depend on the specific version that was assigned to the work order or operation at the time of creation, not necessarily the most current revision in the Master Organization.

Correct statements:

- \* Statement A : Document attachments cannot be viewed on the Manage Supplier Operations page.
- \* Statement C : Attachments can be added to document items, and updates can be managed through engineering change orders.
- \* Statement D : Document item attachments are viewable both in the dispatch list and on the Manage Supplier Operations page via the attachment icon.

Oracle Manufacturing Cloud's " Dispatch List " functionality documentation outlines how document item attachments are handled and displayed.

### NEW QUESTION # 29

In which two places can you create and edit user-defined work order statuses?

- A. Work Definition work area tasks
- **B. Functional Setup Manager > Setup: Manufacturing and Supply Chain Materials Management**
- C. Scheduled Processes
- **D. Work Execution work area tasks**

**Answer: B,D**

Explanation:

User-defined work order statuses can be created and edited in the following areas of Oracle Manufacturing Cloud:

\* Functional Setup Manager : This is where the configuration of user-defined work order statuses is performed under the " Manufacturing and Supply Chain Materials Management " setup. Users can define new statuses and configure their behavior.

\* Work Execution work area tasks : Users can also manage work order statuses directly in the Work Execution area, which is part of the day-to-day management of production orders.

Incorrect options:

\* Scheduled Processes (A) and Work Definition work area tasks (B) are not areas where work order statuses are defined or edited.

Oracle Cloud 's Functional Setup Manager and Work Execution work area documentation outline how user- defined statuses are configured and maintained.

## NEW QUESTION # 30

.....

All the 1z0-1075-25 training files of our company are designed by the experts and professors in the field. The quality of our study materials is guaranteed. According to the actual situation of all customers, we will make the suitable study plan for all customers. If you buy the 1z0-1075-25 Learning Materials from our company, we can promise that you will get the professional training to help you pass your 1z0-1075-25 exam easily. By our professional training, you will pass your 1z0-1075-25 exam and get the related certification in the shortest time.
