- B. The Scrum Team includes not only developers but also business analysts, architects, and testers.
- C. The Scrum Team includes skilled individuals who together have all the skills necessary to create value each Sprint.
- D. Developers on the Scrum Team work closely with business analysts, architects, developers, and testers who are not on the

**Answer: C**

### Explanation:

The correct answer is B. The Scrum Team includes skilled individuals who together have all the skills necessary to create value each Sprint. According to the Scrum Guide1, "Scrum Teams are cross-functional, meaning the members have all the skills necessary to create value in each Sprint." This does not mean that every individual has all the skills, but rather that the team as a whole does.
