If you want to get a desirable position and then achieve your career dream, you are a right place now. Our AP-219 Study Tool can help you pass the exam. So, don't be hesitate, choose the AP-219 test torrent and believe in us. Let's strive to our dreams together. Life is short for us, so we all should cherish our life. The AP-219 test torrent can let users in a short time, accurately grasp the proposition trend of each year, doing all effects in the process of the difficulties in the hot, user's weak link and targeted training, and exercise the user's solving problem ability, eventually achieve the objectives of the pass Salesforce Order Management Administrator Accredited Professional qualification test.

Salesforce Order Management Administrator Accredited Professional Sample Questions (Q65-Q70):

NEW QUESTION # 65

How can an administrator localize screens in the Order Management flows?

- A. Enable localization for the flow and modify the label's value to match the desired language
- B. Create a copy of the flow with hard-coded text in the desired language
- C. Create text localization variables in the flow
- D. Add the Language Selector component at the start of the flow so users can change the language

Answer: C

NEW QUESTION # 66

An administrator needs to send an Outbound Message to an external accounting system whenever a Fulfillment Order is created. What is the best practice to create this functionality?

- A. Create a Workflow Rule
- B. Create a Flow
- C. Create an Apex Trigger
- D. Create a Process Builder

Answer: B

NEW QUESTION # 67

Universal Containers (UC) is evaluating Salesforce Order Management for managing its overarching process because their current system is written mostly in Apex code and has proved difficult to modify, deploy and debug. What are three advantages of using Flow Builder vs writing Apex code to manage the main flow of Order data?

- A. It will notify the admin before a third party integration's data interface has changed
- B. The admin can easily debug specific business cases visually.
- C. Because it is visual it is also self-documenting as changes are made
- D. It allows for non-coding members of staff to contribute suggestions for optimizations and better overall customer experience
- E. The admin can attach a debugger to live customer sessions

Answer: B,C,E

Explanation:

Three advantages of using Flow Builder vs writing Apex code to manage the main flow of Order data are:

The admin can attach a debugger to live customersessions. This allows the admin to monitor and troubleshoot the flow execution in real time, without affecting the customer experience or data integrity.

The admin can easily debug specific business cases visually. This allows the admin to test the flow with different input values and see how the flow behaves in a graphical interface, without writing any code.

Because it is visual it is also self-documenting as changes are made. This allows the admin to easily understand and maintain the flow logic, as well as track the changes and versions of the flow.

NEW QUESTION # 68

What type of relationship exists between FulfilmentOrder and Location?

- A. Many-to-One Lookup (Location) FulfilledFromLocationId
- B. Junction (Many to Many)
- C. One-to-many Lookup (Location) FulfilledFromLocation
- **D. One-to-one Lookup (Location) FulfilledFromLocationId**

Answer: D

NEW QUESTION # 69

Universal Containers (UC) has a flow which performs some custom logic in order to determine a least-cost shipping location. Some of the variables should be reset at the beginning of each loop iteration. Which design element in Flow allows the Admin to do this?

- A. Preset
- B. Reset
- C. Reassignment
- **D. Assignment**

Answer: D

Explanation:

The design element in Flow that allows the admin to reset some variables at the beginning of each loop iteration is Assignment. An Assignment element lets the admin assign new values to one or more variables or sObject fields in a flow. The admin can use an Assignment element before a Loop element to initialize the variables that are used in the loop, and then use another Assignment element inside the loop to reset the variables for each iteration.
