Salesforce Certified Nonprofit Cloud Consultant Exam Sample Questions (Q15-Q20):

NEW QUESTION # 15

A nonprofit fundraiser notices that some of the NPSP calculated donation summary fields on the Contact and Account records are displaying incorrect values when compared to the donations recorded for each donor.

What are three items the consultant should review to troubleshoot the issue?

Choose 3 answers

- A. Campaign Hierarchy
- B. Opportunity Stages
- C. NPSP Health Check
- D. Customizable Rollups
- E. Salesforce Optimizer report

Answer: C,D,E

NEW QUESTION # 16

A nonprofit organization has white papers, case studies, and impact reports on its website. The organization wants to track website visitors who download those assets. Once tracked, the organization wants to pursue the visitor as a constituent. Which solution should be considered?

- A. Affiliation record
- B. Relationship record
- C. NPSP Settings
- D. Opportunity Settings

Answer: C

NEW QUESTION # 17

A nonprofit organization receives a number of donations from Donor Advised Funds where the check is written by the financial institution that houses the Donor Advised Fund. What should the consultant recommend to ensure that the Donor Advised Fund receives credit for the donation?

- A. Use a GAU allocation to credit the donation to the Donor Advised Fund
- B. Add an additional Account lookup field on the Opportunity for the Donor Advised Fund
- C. Add an Account lookup field on the Payment for the Opportunity for the Donor Advised Fund
- D. Use Account Soft Credits to credit the Donor Advised Fund

Answer: D

NEW QUESTION # 18

A nonprofit organization using NPSP does a lot of mailings and wants to ensure states and countries are entered accurately into Salesforce. The nonprofit has heard about State and Country Picklists and asked its consultant about enabling them. What are two considerations the consultant should raise about enabling State and Country Picklists and asked its consultant about enabling them. What are two considerations the consultant should raise about enabling State and Country Picklists for NPSP?

- A. Predefined State and Country abbreviations on Address records must be used
- B. NPSP Data Import object doesn't support State and Country abbreviations in picklist form

- C. The Individual ("Bucket") account model does not support State and Country Picklists
- D. State and Country Picklist values can only be configured on the Address object

Answer: A,B

Explanation:

Enabling State and Country Picklists in Salesforce can improve data consistency and accuracy for address fields. However, there are specific considerations when using them with NPSP:

NPSP Data Import Object Doesn't Support State and Country Abbreviations in Picklist Form:

The NPSP Data Import object does not natively support state and country abbreviations in picklist form. This means that data imports using this object will require additional handling to map state and country values correctly.

Predefined State and Country Abbreviations on Address Records Must Be Used:

When using State and Country Picklists, predefined state and country abbreviations must be used. This ensures consistency and compatibility with Salesforce's standard address fields.

If your current data uses different formats (e.g., full names or alternative abbreviations), you will need to standardize these before importing or entering data.

Consideration for Existing Data:

If enabling State and Country Picklists for the first time, review and clean existing data to match the picklist values.

Use data tools to update existing records with the correct state and country abbreviations to ensure smooth transition and consistency.

By understanding these considerations and preparing your data accordingly, you can successfully implement State and Country Picklists in NPSP.

NEW QUESTION # 19

A nonprofit has been keeping track of donors' employers in a spreadsheet. The nonprofit has hired a consultant to upload data to the NPSP Affiliations object. What is the correct order for uploading the donors' employment information?

- **A. Insert Organization Accounts for the employer, insert Contact records for the donor, insert Affiliation records for the employment information**
- B. Upsert Organization Accounts, export Organization Account ID, upsert Contact record with Organization Account ID in the "Primary Affiliation" field
- C. Insert Affiliation records, export Contact records, export Account records, upsert Contact records
- D. Upsert Contact records, export Contact ID, upsert Organization Accounts for employer with Organization Account ID in the "Primary Affiliation" field

Answer: A

Explanation:

To correctly upload donors' employment information into the NPSP Affiliations object, the data should be imported in a specific order. Here's how to do it:

* Insert Organization Accounts:

* Start by inserting records for the employers (Organization Accounts).

* Ensure each employer has a unique Account ID.

* Insert Contact Records:

* Next, insert the Contact records for the donors.

* Make sure each Contact record has a unique Contact ID and is associated with the correct Account (if applicable).

* Insert Affiliation Records:

* Finally, insert Affiliation records to link the Contacts to their respective Organization Accounts (employers).

* Include fields like Contact ID, Account ID (employer), and other relevant details such as role and status.

By following this order, you ensure that all necessary data relationships are correctly established in Salesforce.
