Microsoft PL-200 Certification Exam focuses on the Power Platform, a suite of tools that enables users to build custom business applications. PL-200 exam is designed for individuals who want to demonstrate their knowledge and skills in implementing and configuring Microsoft Power Platform solutions. Microsoft Power Platform Functional Consultant certification validates a functional consultant's ability to work with customers to gather requirements and implement solutions that meet business needs.

Configuring the Common Data Service (25-30%)

The first section entails the expertise of the candidates in:

- Configuring Common Data Service settings (configuring Relevance Search; configuring auditing; performing data management tasks; configuring duplicate detection settings);
- Managing an existing data model (assigning a type for an entity, such as virtual, standard, or activity; configuring entity ownership; creating new entities or modifying existing ones, etc.);
- Creating and managing processes (defining the requirements for business rules; defining and implementing business rule logic; defining the scope for business rules, etc.);
- Configuring security settings (creating and managing business units; creating and managing security roles; creating and manage users as well as teams, etc.).
