

Unparalleled Dynatrace Dynatrace-Associate Materials - Actualtests4sure Free Download

Dynatrace Dynatrace-Associate is a certification exam to test IT professional knowledge. Actualtests4sure is a website which can help you quickly pass the Dynatrace certification Dynatrace-Associate Exams. Before the exam, you use pertinence training and test exercises and answers that we provide, and in a short time you'll have a lot of harvest.

And you can also use the Dynatrace Dynatrace-Associate PDF on smart devices like smartphones, laptops, and tablets. The second one is the web-based Dynatrace Dynatrace-Associate practice exam which can be accessed through the browsers like Firefox, Safari, and Google Chrome. The customers don't need to download or install excessive plugins or software to get the full advantage from web-based Dynatrace-Associate Practice Tests.

Dynatrace Dynatrace-Associate Test Testking | Dynatrace-Associate Reliable Test Objectives

The web-based Dynatrace Associate Certification Exam Dynatrace-Associate practice exam is also compatible with Chrome, Microsoft Edge, Internet Explorer, Firefox, Safari, and Opera. If you want to assess your Dynatrace-Associate Test Preparation without software installation, the Dynatrace-Associate web-based practice exam is ideal for you. And Dynatrace offers 365 days updates.

Dynatrace Dynatrace-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Business Analytics: Covers capturing and correlating business metrics with technical data to measure the impact of application performance on business outcomes.
Topic 2	<ul style="list-style-type: none"> • Automation: Covers workflows, event-driven automation, and integrations that enable teams to automate remediation and operational tasks.
Topic 3	<ul style="list-style-type: none"> • Traces: Covers distributed tracing and PurePath technology to track and analyze individual transactions end-to-end across services.
Topic 4	<ul style="list-style-type: none"> • Synthetics: Covers the creation and monitoring of synthetic tests to simulate user interactions and proactively detect availability or performance issues.
Topic 5	<ul style="list-style-type: none"> • Dashboards: Covers building and customizing dashboards to visualize and communicate observability data across teams and stakeholders.
Topic 6	<ul style="list-style-type: none"> • Infrastructure Observability: Covers monitoring and visibility into hosts, services, and infrastructure components to detect and analyze performance issues.
Topic 7	<ul style="list-style-type: none"> • Log Investigation: Covers querying, filtering, and analyzing log data within Dynatrace to troubleshoot and identify root causes of problems.

Dynatrace Associate Certification Exam Sample Questions (Q16-Q21):

NEW QUESTION # 16

How can Dynatrace RUM be added for a website when you cannot install the OneAgent to the server?

- A. Dynatrace ActiveGate
- B. Dynatrace Operator
- C. Dynatrace OneAgent in Discovery mode
- **D. Agentless RUM**

Answer: D

Explanation:

Agentless RUM enables Real User Monitoring without requiring OneAgent installation on the server. It works by injecting a JavaScript snippet into the web application, which captures user interactions and performance data directly from the browser.

This approach is useful when:

- * You do not have access to the server
- * Installing OneAgent is not possible
- * You still need frontend visibility

Other options do not apply:

- * Dynatrace Operator is for Kubernetes deployments
- * ActiveGate is used for routing and extending connectivity
- * Discovery mode still requires OneAgent installation

Reference: Based on official Dynatrace University training materials on Real User Monitoring deployment methods.

NEW QUESTION # 17

Which Dynatrace components are required for full VMware vSphere monitoring? (Select all that apply)

- A. Dynatrace Operator
- B. Dynatrace OneAgent SDK
- **C. Dynatrace OneAgent**
- D. Synthetic Monitor
- **E. Dynatrace ActiveGate**

Answer: C,E

Explanation:

For full VMware vSphere monitoring, Dynatrace requires:

- * OneAgent to monitor hosts and workloads running within the virtual machines
- * ActiveGate to connect to the vSphere API and collect metrics from the vCenter server ActiveGate enables integration with vSphere and retrieves infrastructure-level data such as clusters, hosts, and virtual machines.

Other options are not required:

- * OneAgent SDK is for custom instrumentation
- * Dynatrace Operator is for Kubernetes environments
- * Synthetic Monitor is unrelated to infrastructure monitoring

This combination ensures full visibility across both infrastructure and application layers in VMware environments.

Reference: Based on official Dynatrace University training materials covering VMware monitoring and ActiveGate integrations.

NEW QUESTION # 18

Which of the following Synthetics simulate an HTTP request to a URL or endpoint?

- A. Single-URL browser monitors
- B. Browser clickpaths
- C. Ping test
- **D. HTTP monitor**

Answer: D

Explanation:

HTTP monitors are designed specifically to simulate HTTP requests to a defined URL or endpoint. They validate response codes, headers, and content, and measure availability and response time from various locations.

- * Ping tests only check network-level availability using ICMP and do not perform HTTP requests
- * Single-URL browser monitors simulate real browser interactions, including page rendering and JavaScript execution
- * Browser clickpaths simulate multi-step user journeys through an application Therefore, HTTP monitors are the correct choice for simulating direct HTTP requests.

Reference: Based on official Dynatrace University training materials on Synthetic Monitoring types.

NEW QUESTION # 19

What sort of outage occurs when all Synthetic Locations simultaneously experience 1-5 consecutive failures?

- A. Public Synthetics
- **B. Global outage**
- C. Local outage
- D. Private Synthetics

Answer: B

Explanation:

A Global outage is detected when all configured Synthetic locations report failures at the same time within a defined number of consecutive failed executions. This indicates that the issue is not location-specific but instead affects the application or service globally.

Dynatrace Synthetic Monitoring differentiates between:

- * Local outages, where only a subset of locations fail (indicating regional or network-specific issues)
- * Global outages, where all locations fail simultaneously, indicating a widespread availability problem Options such as Public Synthetics and Private Synthetics refer to types of Synthetic locations, not outage classifications.

Reference: Based on official Dynatrace University training materials covering Synthetic Monitoring and outage detection.

NEW QUESTION # 20

Select the log ingestion options available. (Select all that apply)

- A. Dynatrace Operator
- **B. Dynatrace Extensions**
- **C. Dynatrace API**

- D. Dynatrace Hub
- E. Dynatrace OneAgent

Answer: B,C,E

Explanation:

Dynatrace supports multiple methods for log ingestion :

- * OneAgent automatically collects logs from monitored hosts and containers
- * Dynatrace API allows pushing logs directly into the platform
- * Dynatrace Extensions can be used to ingest logs from specific technologies Dynatrace Operator is used for Kubernetes deployment, not direct log ingestion.

Dynatrace Hub is a repository for extensions, not an ingestion mechanism itself.

Reference: Based on official Dynatrace University training materials on log monitoring and ingestion methods.

NEW QUESTION # 21

.....

Passing the Dynatrace Associate Certification Exam (Dynatrace-Associate) certification is crucial for those who want to excel in the Dynatrace industry. However, one of the biggest challenges that individuals face after deciding to take the Dynatrace Associate Certification Exam (Dynatrace-Associate) exam is finding authentic Dynatrace-Associate questions for efficient preparation. Those who do not study with real Dynatrace Associate Certification Exam (Dynatrace-Associate) dumps often fail the test and waste their valuable resources.
