Updated 100-150 Exam Questions: Cisco Certified Support Technician (CCST) Networking are the most veracious Preparation Dumps - PDFBraindumps

Our 100-150 study guide provides free trial services, so that you can gain some information about our study contents, topics and how to make full use of the software before purchasing. It's a good way for you to choose what kind of 100-150 test prep is suitable and make the right choice to avoid unnecessary waste. Besides, if you have any trouble in the purchasing 100-150 practice torrent or trial process, you can contact us immediately and we will provide professional experts to help you online on the 100-150 learning materials.

Cisco Certified Support Technician (CCST) Networking Sample Questions (Q79-Q84):

NEW QUESTION # 79

What is the purpose of VLANs in a switched network environment within an enterprise organization?

- A. Encrypt traffic

- B. Segment network logically
- C. Increase cable length
- D. Assign IP addresses

Answer: B

Explanation:

VLANs logically divide a network into separate broadcast domains, improving security, performance, and management without requiring additional physical infrastructure.

NEW QUESTION # 80

How does a firewall determine which traffic to block?

- A. The firewall matches traffic based on source and destination IP address.
- B. The firewall matches traffic based on the IP address in the ARP table.
- C. The firewall performs a one-to-one network address translation.
- D. The firewall performs a one-to-many network address translation.

Answer: A

Explanation:

A firewall applies rules to traffic by examining packet details such as source and destination IP addresses. It uses those matching criteria to decide whether the traffic should be permitted or blocked.

NEW QUESTION # 81

Hotspot Question

For each statement about the output, select True or False.

Note: You will receive partial credit for each correct selection.

Answer Area

Low bandwidth can increase network latency.

True

☐

False

☐

High levels of network latency decrease network bandwidth.

☐
☐

You can increase throughput by decreasing network latency.

☐
☐

Answer:

Explanation:

Answer Area

Low bandwidth can increase network latency.

High levels of network latency decrease network bandwidth.

You can increase throughput by decreasing network latency.

True

False

NEW QUESTION # 82

Move each cloud computing service model from the list on the left to the correct example on the right Note: You will receive partial credit for each correct answer.

Cloud Computing Service Models

IaaS

PaaS

SaaS

Examples

Three virtual machines are connected by a virtual network in the cloud.

Users access a web-based graphics design application in the cloud for a monthly fee.

A company develops applications using cloud-based resources and tools.

Model

Model

Model

Answer:

Explanation:

Cloud Computing Service Models

IaaS

PaaS

SaaS

Examples

Three virtual machines are connected by a virtual network in the cloud.

Users access a web-based graphics design application in the cloud for a monthly fee.

A company develops applications using cloud-based resources and tools.

IaaS

SaaS

PaaS

Explanation:

- * Three virtual machines are connected by a virtual network in the cloud.
- * Model: IaaS (Infrastructure as a Service)
- * Explanation: IaaS provides virtualized computing resources over the internet, including virtual machines, storage, and networks.
- * Users access a web-based graphics design application in the cloud for a monthly fee.
- * Model: SaaS (Software as a Service)
- * Explanation: SaaS delivers software applications over the internet, typically on a subscription basis, accessible via a web browser.
- * A company develops applications using cloud-based resources and tools.
- * Model: PaaS (Platform as a Service)
- * Explanation: PaaS provides a platform allowing customers to develop, run, and manage applications without dealing with the infrastructure.
- * IaaS (Infrastructure as a Service): Provides virtualized hardware resources that customers can use to build their own computing environments.
- * PaaS (Platform as a Service): Offers a platform with tools and services to develop, test, and deploy applications.
- * SaaS (Software as a Service): Delivers fully functional applications over the internet that users can access and use without managing the underlying infrastructure.

NEW QUESTION # 83

Which device is an Internet of Things (IoT) device?

- A. A cloud-based file storage array
- B. A virtual private network concentrator
- C. A video streaming server
- D. An internet-accessible thermostat

Answer: D

Explanation:

An Internet of Things device is a physical endpoint with embedded connectivity that can collect, send, or receive data over a network. An internet-accessible thermostat matches that definition because it is a connected smart device used in the physical environment.

NEW QUESTION # 84

.....

Nowadays, online shopping has been greatly developed, but because of the fear of some uncontrollable problems after payment, there are still many people don't trust to buy things online, especially electronic products. But you don't have to worry about this when buying our 100-150 Actual Exam. Not only will we fully consider for customers before and during the purchase on our 100-150 practice guide, but we will also provide you with warm and thoughtful service on the 100-150 training guide.
