C\_BCBAI\_2509 study materials cover all newest knowledge for you to learn. In addition, our C\_BCBAI\_2509 learning braindumps just cost you less time and efforts. And we can claim that if you prepare with our C\_BCBAI\_2509 Exam Questions for 20 to 30 hours, then you are able to pass the exam easily. What are you looking for? Just rush to buy our C\_BCBAI\_2509 practice engine!

## SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q31-Q36):

### NEW QUESTION # 31

Drag and drop the elements at the bottom to the architecture layers of the SAP LeanIX meta model.

**Answer:**

Explanation:

### NEW QUESTION # 32

(Which URL should you use to find reliable information about existing and planned features of Joule quickly?)

- A. <https://learning.sap.com/learning-journeys/Joule>
- B. <https://developers.sap.com/board?range=FIRST-LAST&q=Joule>
- C. <https://roadmaps.sap.com/board?range=FIRST-LAST&q=Joule>
- D. <https://community.sap.com/topics/joule>

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: The correct URL to quickly find reliable information about existing and planned features of Joule is the SAP Road Map Explorer, as it is the official interactive tool designed for viewing current and future product features and innovations. This aligns with SAP's official resources for product roadmaps, which detail both existing capabilities and planned enhancements for tools like Joule, SAP's generative AI copilot.

Exact extracts supporting this:

From SAP Road Map Explorer description: "The SAP Road Map Explorer is an interactive tool that supports a customer's journey to SAP's future product portfolio and the Intelligent Enterprise."pages.community.sap.com From a specific Joule roadmap asset:

"Preview the road map for the Joule copilot and start planning how to leverage its upcoming enhancements to grow efficiency and engagement across your business."sap.com The URL in option C directly searches the roadmap board for Joule across all time ranges (FIRST-LAST), providing comprehensive details on features.

Other options are incorrect because:

Option A (developers.sap.com) is for developer resources, tutorials, and boards, not specifically for product roadmaps or planned features.

Option B (learning.sap.com) focuses on learning journeys and educational content, such as courses on using Joule, but not on feature roadmaps.

Option D (community.sap.com) is a discussion forum for user topics and experiences, which may not provide official, reliable roadmap information.

### NEW QUESTION # 33

Match the outcomes in the dropdown lists to the capabilities of Joule

**Answer:**

Explanation:

### NEW QUESTION # 34

Your customer wants to deploy a generative AI model to summarize customer feedback across channels. Which AI Foundation component is best suited for this task?

- A. SAP Document AI

- B. SAP Knowledge Graph
- **C. Generative AI hub**
- D. Joule Studio

**Answer: C**

Explanation:

The Generative AI hub is the most suitable component within SAP's AI Foundation for summarizing customer feedback across channels. As per SAP Business AI documentation, the Generative AI hub provides enterprise-grade orchestration of generative AI models, enabling tasks such as text summarization, content generation, and natural language processing. This component is designed to handle large-scale, cross-channel data inputs, making it ideal for summarizing customer feedback. SAP Document AI focuses on extracting insights from structured documents, Joule Studio is a low-code environment for building AI applications, and SAP Knowledge Graph contextualizes data relationships but is not optimized for generative tasks. The Generative AI hub ensures secure, compliant, and scalable processing, delivering accurate summaries to support business decisions.

### NEW QUESTION # 35

You are asking Joule to create a new purchase requisition. Which interaction pattern does your request represent?

- A. Commercial
- B. Informational
- C. Financial
- **D. Transactional**

**Answer: D**

Explanation:

Creating a new purchase requisition with Joule represents a transactional interaction pattern. As per SAP Business AI documentation, transactional interactions involve executing specific business processes, such as creating, updating, or managing records within SAP systems. Joule's ability to handle such tasks streamlines operations by automating workflows and reducing manual effort. Informational interactions focus on retrieving data, commercial and financial are not defined interaction patterns in SAP's framework, and the act of creating a requisition is distinctly transactional. This capability enhances efficiency in procurement processes, allowing users to focus on strategic tasks while Joule manages operational activities seamlessly.

### NEW QUESTION # 36
