CheckPoint Check Point Certified Security Administrator - R82 Sample Questions (Q60-Q65):

NEW QUESTION # 60
You want to store the GAiA configuration in a file for later reference. What command should you use?

- A. write mem <filename>
- B. show config -f <filename>
- C. save configuration <filename>
- D. save config -o <filename>

Answer: C

Explanation:
The correct answer is D because the command save onfiguration <filename> stores the Gaia configuration in a file for later reference1. The oter commands are not valid in Gaia Clish1. Gaia R81.10 Administration Guide

NEW QUESTION # 61
R80 is supported by which of the following operating systems:

- A. Gaia only
- B. Windows only
- C. Gaia, SecurePlatform, and Windows
- D. SecurePlatform only

Answer: A

Explanation:
R80 is supported by Gaia only, which is Check Point's unified security operating system for all Check Point appliances, open servers, and virtualized gateways1, p. 14. Windows and SecurePlatform are not supported by R80. Check Point CCSA - R81: Practice Test & Explanation, [Check Point Learning and Training Frequently Asked Questions (FAQs)]

NEW QUESTION # 62
Which of the following is used to initially create trust between a Gateway and Security Management Server?

- A. Token
- B. One-time Password
- C. Certificate
- D. Internal Certificate Authority

Answer: B

Explanation:
A one-time password is used to initially create trust between a Gateway and Security Management Server. The administrator generates a one-time password from SmartConsole and enters it on the gateway command line interface using the cpconfig command. This establishes a Secure Internal Communication (SIC) between the gateway and the server . The other options are not used for this purpose. [Configuring Secure Internal Communication (SIC)], [Check Point CCSA - R81: Practice Test & Explanation]

NEW QUESTION # 63
Core Protections are installed as part of what Policy?

- A. Desktop Firewall Policy
- B. Threat Prevention Policy.
- C. Access Control Policy.
- D. Mobile Access Policy.

Answer: B

Explanation:
Core Protections are installed as part of the Threat Prevention Policy. Core Protections are a set of IPS protections that are essential for securing your network against malicious traffic4. The other policies do not include Core Protections.

NEW QUESTION # 64
Your internal networks 10.1.1.0/24, 10.2.2.0/24 and 192.168.0.0/16 are behind the Internet Security Gateway. Considering that Layer 2 and Layer 3 setup is correct, what are the steps you will need to do in SmartConsole in order to get the connection working?

- A. 1. Define an accept rule in Security Policy.2. Define automatic NAT for each network to NAT the networks behind a

public IP.3. Publish and install the policy.
- B. 1. Define an accept rule in Security Policy.2. Define automatic NAT for each network to NAT the networks behind a public IP.3. Publish the policy.
- C. 1. Define an accept rule in Security Policy.2. Define Security Gateway to hide all internal networks behind the gateway's external IP.3. Publish and install the policy.
- D. 1. Define an accept rule in Security Policy.2. Define Security Gateway to hide all internal networks behind the gateway's external IP.3. Publish the policy.

Answer: A

Explanation:
The steps you will need to do in SmartConsole in order to get the connection working behind the Internet Security Gateway are:
Define an accept rule in Security Policy. This rule allows the traffic from your internal networks to pass through the Security Gateway.
Define automatic NAT for each network to NAT the networks behind a public IP. This option translates the private IP addresses of your internal networks to a public IP address assigned by your ISP router. This way, your internal networks can communicate with the Internet using a valid IP address.
Publish and install the policy. This step applies the changes you made to the Security Gateway and activates the security and NAT rules.

NEW QUESTION # 65
......

Many candidates who are ready to participate in the CheckPoint certification 156-215.82 exam may see many websites available online to provide resources about CheckPoint certification 156-215.82 exam. However, iPassleader is the only website whose exam practice questions and answers are developed by a study of the leading IT experts's reference materials.
