## Sharing-and-Visibility-Architect Valid Test Cram, Reliable Sharing-and-Visibility-Architect Test Sims

As the talent competition increases in the labor market, it has become an accepted fact that the Sharing-and-Visibility-Architect certification has become an essential part for a lot of people, especially these people who are looking for a good job, because the certification can help more and more people receive the renewed attention from the leader of many big companies. So it is very important for a lot of people to gain the Sharing-and-Visibility-Architect certification. We must pay more attention to the certification and try our best to gain the Sharing-and-Visibility-Architect Certification. First of all, you are bound to choose the best and most suitable study materials for yourself to help you prepare for your exam. Now we would like to introduce the Sharing-and-Visibility-Architect certification guide from our company to you. We sincerely hope that our study materials will help you through problems in a short time.

Salesforce Sharing-and-Visibility-Architect exam covers a wide range of topics, including Salesforce sharing rules, role hierarchy, manual sharing, record ownership, and other key concepts related to sharing and visibility in Salesforce. Sharing-and-Visibility-Architect Exam also tests an individual's ability to design and implement complex sharing and visibility solutions using advanced features such as Apex sharing, sharing sets, and criteria-based sharing rules.

## Salesforce Certified Sharing and Visibility Architect Sample Questions (Q70-Q75):

### NEW QUESTION # 70

Universal Containers (UC) has 200 distributors that use Partner Community licenses. Partners cannot see each other's data, but UC is also trying to give more visibility to data for certain individuals at a distributor.

Which scalable option give users in the partner manager role access to all case and container records for partner users at the same distributor?

- A. Create sharing sets.
- **B. Create an ownership based sharing rule.**
- C. Give Super User permission to the individual partner manager users.

**Answer: B**

### NEW QUESTION # 71

Sales operations at Universal Containers (UC) wants to create list views to filter opportunities for certain geographies.

How should UC hide list views that are not relevant to an individual user since there will be more than SO list views?

- A. Share the list views with the appropriate queue.
- B. Share the list views with the appropriate individual users.
- **C. Share the list views with the appropriate public group.**

**Answer: C**

### NEW QUESTION # 72

Customer complaints for bad interactions with a customer support agent are logged as Cases and assigned to a human resources representative. The agent of the complaint should not see the case, but their manager should.

How is this accomplished?

- **A. Trigger on Case to lookup and share to the manager of an Assigned Agent custom field (the subject of the complaint) using Apex Managed Sharing.**
- B. Case is owned by the subject of the complaint, so their manager in the role hierarchy can access the record. CRED permission are removed on Case so the agent cannot read the case record.
- C. Criteria based Sharing Rule on Case that shares to the Role Manager and above when a custom field Assigned Agent (subject of the complaint) is not blank.

**Answer: A**

Explanation:

This scenario requires highly specific sharing logic where:

\* The case is hidden from the subject of the complaint.

\* The subject's manager has access.

Apex Managed Sharing provides the precision needed to achieve this requirement. The trigger would identify the agent assigned as the subject of the complaint, lookup their manager, and create a manual sharing rule (via the CaseShare object) granting access to the manager.

\* Option A (Correct): Apex Managed Sharing allows for granular sharing logic tailored to specific business requirements.

\* Option B: Criteria-based sharing rules cannot dynamically account for relationships such as "manager of the assigned agent."

\* Option C: Role Hierarchy sharing doesn't meet the requirement to hide cases from the agent while allowing their manager to see them.

Apex Managed Sharing for Custom Sharing Logic

Case Sharing Architecture

### NEW QUESTION # 73

Universal Containers is planning to pilot a new application to a small set of Sales Reps.

What is the optimal way to grant inly this Sales Reps access to the new functionality, while hiding ..

- A. Create new user records for the pilot user that they will use for the pilot.
- B. Revoke access to legacy function in the Sales Rep profile and create a permission set for the ..
- C. Create a permission set to grant access to the new functionality and hide the old functionality.

- **D. Clone the Sales Rep profile, adjust settings, and assign the pilot users the new profile.**

**Answer: D**

Explanation:

Explanation

Cloning the Sales Rep profile, adjusting settings, and assigning the pilot users the new profile is the optimal way to grant only this Sales Reps access to the new functionality, while hiding it from other users. This way, the pilot users can have different permissions and access than the other Sales Reps who are not part of the pilot. Option B is incorrect, since revoking access to legacy function in the Sales Rep profile and creating a permission set for the new functionality would affect all Sales Reps, not just the pilot users. Option C is incorrect, since creating a permission set to grant access to the new functionality and hide the old functionality would not work, as permission sets cannot revoke access. Option D is incorrect, since creating new user records for the pilot user that they will use for the pilot would be unnecessary and inefficient.

#### NEW QUESTION # 74

Universal Computers (UC) is looking to expand its delivery capabilities through a network of distributors that use a Partner Community license. UC employees currently can view all delivery records through the organization-wide default (OWD) setting of Public Read Only.

Which approach would an architect recommend to limit the records a distributor can see?

- **A. Set the External OWD to Private for the Delivery object.**
- B. Remove Read permission from the distributor profile.
- C. Create an ownership-based sharing rule to grant access to the distributor.
- D. Create a criteria-based sharing rule to grant access to the distributor

**Answer: A**
