Salesforce Certification PDII Exam is very popular among the IT people to enroll in the exam. Passing Salesforce certification PDII exam can not only change your work and life can bring, but also consolidate your position in the IT field. But the fact is that the passing rate is very low.

The PDII Certification Exam consists of 60 multiple-choice questions and is timed for two and a half hours. It is a proctored exam that can be taken online or in-person at a testing center. The passing score for the exam is 63%, and the exam fee is \$400. Platform Developer II certification is valid for three years and can be renewed by passing the latest version of the PDII exam or by completing relevant Trailhead modules.

Earning the Salesforce Certified Platform Developer II credential demonstrates that a developer has the skills and knowledge required to build complex custom applications on the Salesforce platform. As the demand for Salesforce development expertise continues to grow, this certification can help developers advance their careers and stand out in a competitive job market.

## Cram Pdf

Our Salesforce dumps files contain the latest PDII practice questions with detailed answers and explanations, which written by our professional trainers and experts. And we check the updating of PDII exam pdf everyday to make sure the accuracy of our questions. There are demo of PDII free vce for you download in our exam page. One week preparation prior to attend exam is highly recommended.

### Salesforce Platform Developer II Sample Questions (Q95-Q100):

#### NEW QUESTION # 95

How should a developer assert that a trigger with an asynchronous process has successfully run?

- A. Insert records into Salesforce, use `seeAllData=true`, then perform assertions.
- B. Create all test data in the test class, invoke `Test.startTest()` and `Test.stopTest()` and then perform assertions.
- C. Create all test data, use `future` in the rest class, then perform assertions.
- D. Create all test data in the test class, use `System.runAs()` to invoke the trigger, then perform assertions.

**Answer: B**

Explanation:

Use `Test.startTest()` and `Test.stopTest()`. These methods ensure asynchronous code runs within test execution and allows for accurate assertions. References: Testing Asynchronous Apex

#### NEW QUESTION # 96

Refer to the following code snippet:

Java

```
public class LeadController {
    public static List<Lead> getFetchLeadList(String searchTerm, Decimal aRevenue) { String safeTerm =
'%'+searchTerm.escapeSingleQuotes()+ '%'; return [ SELECT Name, Company, AnnualRevenue FROM Lead WHERE
AnnualRevenue >= :aRevenue AND Company LIKE :safeTerm LIMIT 20
];
}
}
```

A developer created a JavaScript function as part of a Lightning web component (LWC) that surfaces information about Leads by wire calling `getFetchLeadList` when certain criteria are met. Which three changes should the developer implement in the Apex class above to ensure the LWC can display data efficiently while preserving security?

- A. Annotate the Apex method with `@AuraEnabled(cacheable=true)`.
- B. Implement the `with sharing` keyword in the class declaration.
- C. Implement the `without sharing` keyword in the class declaration.
- D. Annotate the Apex method with `@AuraEnabled`.
- E. Use the `WITH SECURITY_ENFORCED` clause within the SOQL query.

**Answer: A,B,E**

Explanation:

Comprehensive and Detailed 11850 to 250 words of Explanation:

To make an Apex method compatible with a Lightning Web Component's `@wire` service and ensure it follows security best practices, three specific modifications are required:

\* `@AuraEnabled(cacheable=true)` (Option C): The `@wire` service in LWC requires the Apex method to be marked as cacheable. This enables client-side caching via the Lightning Data Service, which significantly improves UI performance by reducing redundant server calls. Note that `Cacheable=true` is mandatory for `@wire` but optional for imperative calls.

\* `with sharing` (Option B): In Apex, classes do not enforce sharing rules by default. To ensure the user only sees Leads they have access to according to the organization-wide defaults and sharing model, the class must explicitly use the `with sharing` keyword.

\* `WITH SECURITY_ENFORCED` (Option A): While `with sharing` handles record-level access, it does not automatically enforce field-level security (FLS) or object-level security (CRUD). Adding the `WITH SECURITY_ENFORCED` clause to the SOQL query ensures that if a user does not have permission to view the `AnnualRevenue` field, the query will throw an exception rather than exposing protected data.

Options D and E are incorrect because `without sharing` bypasses security, and a simple `@AuraEnabled` without `cacheable=true` is insufficient for the LWC `@wire` service.

### NEW QUESTION # 97

A developer has been asked to create code that will meet the following requirements:

Receives input of: Map<Id, Project\_c>, List<Account>

Performs a potentially long-running callout to an outside web service

Provides a way to confirm that the process executed successfully

Which asynchronous feature should be used?

- A. Queueable interface
- B. @future (callout=true)
- C. Database.AllowCallouts interface
- D. Schedulable interface

**Answer: A**

### NEW QUESTION # 98

A company has a custom object, Order\_\_c, that has a custom picklist field, Status\_\_c, with values of New, In Progress, or Fulfilled and a lookup field, Contact\_\_c, to Contact.

Which SOQL query will return a unique list of all the Contact records that have no Fulfilled Orders?

- A. SELECT Contact\_\_c FROM Order\_\_c Where Status\_\_c <> 'Fulfilled'
- B. SELECT id FROM Contact WHERE id NOT IN (SELECT Contact\_\_c FROM order\_\_c Where Status\_\_c = 'fulfilled')
- C. SELECT id FROM Contact WHERE id NOT IN (SELECT id From order\_\_c WHERE \_\_c = Fulfilled')
- D. SELECT Contact\_\_c From order\_\_c Where id NOT IN (SELECT id FROM \_\_c Where States\_\_c + Fulfilled')

**Answer: B**

### NEW QUESTION # 99

What is the optimal technique a developer should use to programmatically retrieve Global Picklist options in a Test Method?

- A. Use a static resource
- B. performs a SOQL Query.
- C. Use the Schema namespace.
- D. Perform a callout to the Metadata API.

**Answer: A**

### NEW QUESTION # 100

.....

Everyone wants to have a good job and decent income. But if they don't have excellent abilities and good major knowledge they are hard to find a decent job. Passing the test PDII certification can make you realize your dream and find a satisfied job. Our PDII study materials are a good tool that can help you pass the PDII Exam easily. You needn't spend too much time to learn it. Our PDII exam guide is of high quality and if you use our product the possibility for you to pass the PDII exam is very high as 99% to 100%.
