New CAS-004 Exam Experience | Reliable CAS-004 Test Syllabus

We believe you will also competent enough to cope with demanding and professorial work with competence with the help of our CAS-004 exam braindumps. Our experts made a rigorously study of professional knowledge about this CAS-004 exam. So do not splurge time on searching for the perfect practice materials, because our CAS-004 Guide materials are exactly what you need to have. Just come and buy our CAS-004 practice guide, you will be a winner!

CompTIA Advanced Security Practitioner (CASP+) Exam Sample Questions (Q232-Q237):

NEW QUESTION # 232
The information security manager of an e-commerce company receives an alert over the weekend that all the servers in a datacenter have gone offline.
Upon discussing this situation with the facilities manager, the information security manager learns there was planned electrical maintenance.
The information security manager is upset at not being part of the maintenance planning, as this could have resulted in a loss of:

- A. data confidentiality.
- B. data security.
- C. PCI compliance
- D. business availability.

Answer: D

NEW QUESTION # 233
A large number of emails have been reported, and a security analyst is reviewing the following information from the emails:
As part of the image process, which of the following is the FIRST step the analyst should take?

- A. Validate the final "Received" header against the DNS entry of the domain.
- B. Ignore the emails, as SPF validation is successful, and it is a false positive
- C. Compare the 'Return-Path' and "Received" fields.
- D. Block the email address carl b@comptia1 com, as it is sending spam to subject matter experts

Answer: C

NEW QUESTION # 234
A company has decided that only administrators are permitted to use PowerShell on their Windows computers. Which of the following is the BEST way for an administrator to implement this decision?
Monitor the Application and Services Logs group within Windows Event Log.

- A. Configure user settings in Group Policy.
- B. Uninstall PowerSheII from all workstations.
- C. Provide user education and training.
- D. Block PowerSheII via HIDS.

Answer: C

Explanation:
Configuring user settings in Group Policy is the best way for an administrator to implement the decision to restrict PowerShell access to only administrators. Group Policy is a feature of Windows that allows administrators to manage and enforce settings for users and computers in a domain. By using Group Policy, an administrator can create a policy that blocks or disables PowerShell for all users except for a particular group, such as administrators. This policy can be applied to all computers in the domain or to specific organizational units. This method is more effective and manageable than uninstalling PowerShell, monitoring event logs, providing user education, or blocking PowerShell via HIDS. Verified Reference:

NEW QUESTION # 235

Which of the following provides the best solution for organizations that want to securely back up the MFA seeds for its employees in a central, offline location with minimal management overhead?

- A. Secrets management
- B. Hardware security module
- C. Encrypted database
- D. Key escrow service

Answer: B

Explanation:
A Hardware Security Module (HSM) provides the best solution for securely backing up MFA seeds in a central, offline location with minimal management overhead. HSMs are specialized hardware devices designed for cryptographic key management, including storing sensitive data like MFA seeds securely. HSMs offer high levels of protection against tampering and provide offline security, making them an ideal choice for backing up cryptographic materials. CASP+ recognizes HSMs as critical components for managing and securing cryptographic keys in centralized, secure environments.

* CompTIA CASP+ Study Guide: Secure Backup and Key Management with HSM

NEW QUESTION # 236

You are a security analyst tasked with interpreting an Nmap scan output from company's privileged network.
The company's hardening guidelines indicate the following:
There should be one primary server or service per device.
Only default ports should be used.
Non-secure protocols should be disabled.
INSTRUCTIONS
Using the Nmap output, identify the devices on the network and their roles, and any open ports that should be closed.
For each device found by Nmap, add a device entry to the Devices Discovered list, with the following information:
The IP address of the device
The primary server or service of the device (Note that each IP should by associated with one service/port only) The protocol(s) that should be disabled based on the hardening guidelines (Note that multiple ports may need to be closed to comply with the hardening guidelines) If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

Answer:

Explanation:
See explanation below.
Explanation:
10.1.45.65 SFTP Server Disable 8080
10.1.45.66 Email Server Disable 415 and 443
10.1.45.67 Web Server Disable 21, 80
10.1.45.68 UTM Appliance Disable 21

NEW QUESTION # 237

......

In recent years, some changes are taking place in this line about the new points are being constantly tested in the CAS-004 real exam. So our experts highlights the new type of questions and add updates into the CAS-004 practice materials, and look for shifts closely when them take place. At the same time, as we can see that the electronic devices are changing our life day by day, our CAS-004 study questions are also developed to apply all kinds of eletronic devices.
