

# Latest H12-811\_V2.0 Dumps Ebook - New H12-811\_V2.0 Exam Prep

You buy our Real4dumps Huawei H12-811\_V2.0 Certification which is 100% risk free. Before you decide to use Real4dumps Huawei H12-811\_V2.0 dumps, you can try our free demo and pdf. Click Real4dumps, download it now! Affordable, and good service – free update for a year. Quality first. Welcomes your order. Thank you.

If you want to pass the exam in the shortest time, our study materials can help you achieve this dream. H12-811\_V2.0 learning quiz according to your specific circumstances, for you to develop a suitable schedule and learning materials, so that you can prepare in the shortest possible time to pass the exam needs everything. If you use our H12-811\_V2.0 training prep, you only need to spend twenty to thirty hours to practice our H12-811\_V2.0 study materials and you are ready to take the exam.

## New Huawei H12-811\_V2.0 Exam Prep - Sample H12-811\_V2.0 Test Online

To develop a new study system needs to spend a lot of manpower and financial resources, first of all, essential, of course, is the most intuitive skill learning materials, to some extent this greatly affected the overall quality of the learning materials. Our HClA-Datacom V2.0 study training dumps do our best to find all the valuable reference books, then, the product we hired experts will carefully analyzing and summarizing the related materials, such as: Huawei H12-811\_V2.0 exam, eventually form a complete set of the review system. Experts before starting the compilation of "the H12-811\_V2.0 Latest Questions ", has put all the contents of the knowledge point build a clear framework in mind, though it needs a long wait, but product experts and not give up, but always adhere to the effort, in the end, they finished all the compilation. So, you're lucky enough to meet our H12-811\_V2.0 test guide 1, and it's all the work of the experts. If you want to pass the qualifying exam with high quality, choose our products. We are absolutely responsible for you. Don't hesitate!

## Huawei HCIA-Datacom V2.0 Sample Questions (Q58-Q63):

### NEW QUESTION # 58

After the root bridge is elected on an STP network, which of the following parameters may be compared by ports on non-root bridge nodes to elect the root port? (Select all that apply)

- A. PID of a port on the local device
- B. BID of the device that sends BPDUs
- C. Root path cost (RPC)
- D. PID of a port on the device that sends BPDUs

**Answer: A,B,C,D**

Explanation:

On a non-root bridge, the root port is the port that receives the best BPDU toward the root bridge. STP selects the root port by comparing several parameters in order. The first important parameter is the root path cost (RPC), so option B is correct. If multiple ports have the same RPC, the switch then compares the bridge ID (BID) of the upstream device sending the BPDU, making option C correct. If those are still equal, the switch compares the port ID (PID) of the upstream sending port, so option D is also correct. If all of those values remain identical from the switch's perspective, the device can finally compare the local port ID to determine which local interface becomes the root port, so option A is also correct. HCIA-Datacom teaches this comparison logic as part of STP election rules. The process ensures deterministic selection of a single root port on every non-root switch. Understanding the comparison sequence is essential for predicting STP topology behavior and for influencing port roles through path cost tuning or bridge-priority adjustments during campus network design and troubleshooting.

### NEW QUESTION # 59

OSPF has five types of packets. Which type is used to notify an OSPF neighbor of its required LSAs?

- A. Hello
- B. DD
- C. LSR
- D. LSU

**Answer: C**

Explanation:

In OSPF, the packet type used to request specific link-state advertisements from a neighbor is the Link State Request (LSR) packet. Therefore, option B is correct. During database synchronization, OSPF neighbors first discover each other with Hello packets, then exchange summaries of their databases using Database Description (DD) packets. If one router finds that it is missing certain LSAs or has older versions, it sends an LSR packet to request the needed LSAs from its neighbor.

The neighbor then responds with a Link State Update (LSU) packet containing the requested LSAs. Finally, the receiving router confirms proper receipt with a Link State Acknowledgment (LSAck) packet. HCIA-Datacom emphasizes understanding the roles of these five OSPF packet types because they are central to neighbor formation, adjacency establishment, and LSDB synchronization. This question specifically tests whether the learner can distinguish between the request packet (LSR) and the update packet (LSU). The router does not use a DD packet to request detailed LSA content; DD packets provide database summaries, while LSR packets explicitly request the LSAs that are needed.

### NEW QUESTION # 60

Which of the following statements are true about the Python code shown below? (Select all that apply)

```
import paramiko
import time
ssh = paramiko.SSHClient()
ssh.set_missing_host_key_policy(paramiko.AutoAddPolicy())
ssh.connect('192.168.1.254',
username='python', password='Huawei@123')
channel = ssh.invoke_shell()
channel.send('screen-length 0 temporary\n')
time.sleep(1)
output = channel.recv(65535).decode('utf-8')
print(output)
ssh.close()
```

- A. `ssh.close()` is used to terminate the SSH connection.
- B. `channel = ssh.invoke_shell()` is used to create an interactive shell session.
- C. `import paramiko` and `import time` are used to import the modules required by the code.
- D. `ssh.connect('192.168.1.254', username='python', password='Huawei@123')` is used to set up a connection with the device whose IP address is 192.168.1.254.

**Answer: A,B,C,D**

Explanation:

All four statements are correct. The code uses the Paramiko library to automate SSH login to a network device. `import paramiko` and `import time` load the Python modules required for SSH communication and delay control, so option C is correct. The statement `ssh = paramiko.SSHClient()` creates an SSH client object, and `ssh.set_missing_host_key_policy(paramiko.AutoAddPolicy())` allows the client to accept an unknown host key automatically in this example scenario.

The command `ssh.connect('192.168.1.254', username='python', password='Huawei@123')` establishes an SSH connection to the target device, so option B is correct. Then `channel = ssh.invoke_shell()` opens an interactive shell channel, which is commonly used to send CLI commands and receive output just as an administrator would in a terminal session, making option D correct. The command `channel.send('screen-length 0 temporary\n')` disables page-by-page output for the current session, which is useful in network automation.

Finally, `ssh.close()` closes the SSH session and releases the connection, so option A is correct. HCIA-Datacom automation knowledge often uses Paramiko examples to demonstrate basic Python-based device O & M.

### NEW QUESTION # 61

You can enter a question mark (?) in the CLI of a Huawei switch to obtain online help. Which of the following statements is true about the meaning of < cr > in the output of the command `sysname SW1?`

```
[HUAWEI] sysname SW1?
```

```
< cr >
```

- A. The command is incomplete.
- B. There are too many parameters in that position.
- C. The entered keywords are incorrect.
- D. There is no keyword or parameter in that position.

**Answer: D**

Explanation:

In the Huawei command-line interface, the question mark ? provides real-time command help based on the current input. When the output shows < cr >, it means that the command can end at that point by pressing Enter. In other words, there is no additional keyword or parameter required in that position. Therefore, option B is correct.

In the example `sysname SW1?`, the device interprets SW1 as a complete and valid hostname parameter for the `sysname` command. Since nothing else is required after the hostname, the CLI displays < cr > to indicate command completion is allowed. This behavior is common in Huawei devices and is important for daily operation and troubleshooting because it helps engineers understand whether a command is complete, whether more arguments are needed, or whether optional parameters are available. Options about incorrect keywords or incomplete commands do not apply here, because the entered command syntax is already valid.

Understanding < cr > is a basic but important CLI skill in HCIA-Datacom operations.

### NEW QUESTION # 62

The administrator configures an Eth-Trunk in LACP mode between two switches, and sets the maximum number of active links in the Eth-Trunk to 3 and the number of remaining standby links to 1. If one of the active links fails, the two switches automatically adjust the number of active links to 2 through negotiation, and the standby link remains in the standby state.

- A. FALSE
- B. TRUE

**Answer: A**

Explanation:

This statement is false. In an Eth-Trunk operating in LACP mode, if the administrator sets the maximum number of active links to 3 and there is 1 standby link, then when one active member fails, LACP can automatically promote the standby member to active status. The purpose of the standby member is to maintain the configured active-link capacity whenever possible.

Therefore, after one active link fails, the normal expectation is not that the active-link count is reduced from 3 to 2 while the standby link remains idle. Instead, the standby link should participate and replace the failed member, so that the Eth-Trunk continues operating with 3 active links if the standby link and negotiation conditions are normal. This reflects the redundancy and fast recovery capabilities of LACP-based aggregation. HCIA-Datacom highlights that compared with manual mode, LACP provides more intelligent link selection, active/standby management, and fault adaptation. The statement is wrong because it ignores the intended behavior of the standby link in maintaining the number of active forwarding links after a failure.

## NEW QUESTION # 63

.....

All these features make the H12-811\_V2.0 exam practice question the ideal study material for H12-811\_V2.0 exam preparation and it is designed to assist you in HCIA-Datacom V2.0 (H12-811\_V2.0) practice test. We guarantee you that you will not find all these top-rated features anywhere. They are only available with H12-811\_V2.0 exam questions format.

**New H12-811\_V2.0 Exam Prep:** [https://www.real4dumps.com/H12-811\\_V2.0\\_examcollection.html](https://www.real4dumps.com/H12-811_V2.0_examcollection.html)

Our exam prep will assist you efficiently to study that the fastest way is only 20-30 hours with our H12-811\_V2.0 preparation labs, You can enjoy the instant download of H12-811\_V2.0 exam dumps after purchase so you can start studying with no time wasted, One of the main unique qualities of Real4dumps New H12-811\_V2.0 Exam Prep New H12-811\_V2.0 Exam Prep - HCIA-Datacom V2.0 Exam Questions is its ease of use, Huawei Latest H12-811\_V2.0 Dumps Ebook Maybe the training material at your hands is wearisome and dull for you to study.

Take all the data collected from all the connected smart Latest H12-811\_V2.0 Dumps Ebook homes and devices in a given community, and just imagine what you can do, But the reason they can charge so much and are increasingly hard to get into New H12-811\_V2.0 Exam Prep Korfu, for example only accepts out of applicants is their track record getting their graduates jobs.

## Pass Guaranteed Quiz Huawei - H12-811\_V2.0 - HCIA-Datacom V2.0 Updated Latest Dumps Ebook

Our exam prep will assist you efficiently to study that the fastest way is only 20-30 hours with our H12-811\_V2.0 Preparation labs, You can enjoy the instant download of H12-811\_V2.0 exam dumps after purchase so you can start studying with no time wasted.

One of the main unique qualities of Real4dumps HCIA-Datacom V2.0 Exam H12-811\_V2.0 Questions is its ease of use, Maybe the training material at your hands is wearisome and dull for you to study.

If you have any difficulty in choosing the correct H12-811\_V2.0 preparation materials, here comes a piece of good news for you.
