Efficient Snowflake - COF-C02 - SnowPro Core Certification Exam Learning Engine

Obtaining the certification may be not an easy thing for some candidates. If you choose us, we can help you pass the exam and obtain corresponding certification easily. COF-C02 learning materials are edited by professional experts, and you can use them at ease. Furthermore, COF-C02 exam braindumps have the most of the knowledge points for the exam, and you can learn a lot in the process of learning. We offer you free update for 365 days after payment for COF-C02 Exam Dumps, and our system will send you the latest version automatically. We have online and offline service, if you have any questions, you can consult us.

Snowflake SnowPro Core Certification Exam Sample Questions (Q91-Q96):

NEW QUESTION # 91

Which statement about billing applies to Snowflake credits?

- A. Credits are consumed based on the warehouse size and the time the warehouse is running
- B. Credits are used to pay for cloud data storage usage
- C. Credits are billed per-minute with a 60-minute minimum
- D. Credits are consumed based on the number of credits billed for each hour that a warehouse runs

Answer: A

Explanation:

Snowflake credits are the unit of measure for the compute resources used in Snowflake. The number of credits consumed depends on the size of the virtual warehouse and the time it is running. Larger warehouses consume more credits per hour than smaller ones, and credits are billed for the time the warehouse is active, regardless of the actual usage within that time.

NEW QUESTION # 92

Which function will return the URL for an external stage by using the stage name as the input?

- A. GET_PREIGNED_URL
- **B. GET_STAGE_LOCATION**
- C. BUILD_STAGE_FILE_URL
- D. GET_ABSOLUTE_PATH

Answer: B

Explanation:

The GET_STAGE_LOCATION function retrieves the full external URL associated with a named stage. It is useful for accessing the storage location of external stages configured in Snowflake.

Snowflake Docs: GET_STAGE_LOCATION

NEW QUESTION # 93

A user wants to access files stored in a stage without authenticating into Snowflake. Which type of URL should be used?

- A. Staged URL
- **B. Pre-signed URL**
- C. Scoped URL
- D. File URL

Answer: B

Explanation:

A Pre-signed URL should be used to access files stored in a Snowflake stage without requiring authentication into Snowflake. Pre-signed URLs are simple HTTPS URLs that provide temporary access to a file via a web browser, using a pre-signed access token. The expiration time for the access token is configurable, and this type of URL allows users or applications to directly access or download the files without needing to authenticate into Snowflake.

NEW QUESTION # 94

True or False: Snowpipe via REST API can only reference External Stages as source.

- **A. False**
- B. True

Answer: A

Explanation:

NEW QUESTION # 95

Which function unloads data from a relational table to JSON?

- A. TO_VARIANT
- **B. TO_JSON**
- C. OBJECT CONSTRUCT
- D. TO_OBJECT

Answer: B

Explanation:

The `TO_JSON` function is used to convert a `VARIANT` value into a string containing the JSON representation of the value. This function is suitable for unloading data from a relational table to JSON format. Reference: [COF-C02] SnowPro Core Certification Exam Study Guide

NEW QUESTION # 96
