

MB-335 Übungsmaterialien & MB-335 Lernführung: Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert & MB-335 Lernguide

Automatic BOM consumption stage	Field
Start	Flushing principle Never Status
Operation	Always Flushing principle Status + quantity
Report as Finished	Status + quantity Always Never

2026 Die neuesten DeutschPrüfung MB-335 PDF- Versionen Prüfungsfragen und MB-335 Fragen und Antworten sind kostenlos verfügbar: <https://drive.google.com/open?id=10uJmd9wX1uUDdPbMdIVozlQoPbz-6J2h>

Schulungsunterlagen zur Microsoft MB-335 Zertifizierungsprüfung von DeutschPrüfung werden uns dabei helfen, die Prüfung erfolgreich zu bestehen, was auch der kürzeste Weg zum Erfolg ist. Jeder könnte erfolgreich werden, solange man die richtige Wahl fällen kann. Nach langjährigen Bemühungen haben unsere Erfolgsquote von der Microsoft MB-335 Zertifizierungsprüfung 100% erreicht. Wählen Sie DeutschPrüfung, wählen Sie Erfolg.

Die Senior Experten haben die online Prüfungsfragen zur Microsoft MB-335 Zertifizierungsprüfung nach ihren Kenntnissen und Erfahrungen bearbeitet, deren Ähnlichkeit mit den realen Prüfungen 95% beträgt. Ich habe Vertrauen in unsere Produkte. Wenn Sie die Produkte von DeutschPrüfung kaufen, wird DeutschPrüfung Ihnen helfen, die Microsoft MB-335 Zertifizierungsprüfung einmalig zu bestehen. Sonst erstatteten wir Ihnen gesamte Einkaufsgebühren.

MB-335 Zertifizierung, MB-335 Prüfungsinformationen

In dieser Gesellschaft, wo es zahlreiche Talent gibt, muss man immer noch seine Kenntnisse verbessern. Und der Bedarf an den spitzen IT-Fachleuten nimmt weiter zu. In der internationalen Gesellschaft ist es auch so. So wollen viele Leute die Microsoft MB-335 Zertifizierungsprüfung bestehen. Aber es ist nicht so leicht. Jedoch ist sehr wahrscheinlich, dass Sie gute Schulungsunterlagen wählen und die Prüfung somit bestehen können. Unsere Schulungsunterlagen zur Microsoft MB-335 Zertifizierungsprüfung von DeutschPrüfung befähigen Sie, diese Zertifizierung zu bestehen. Die Schulungsunterlagen von DeutschPrüfung hat von vielen Kandidaten überprüft. Sie sind in der internationalen Gesellschaft immer Vorläufer. Wenn Sie die Microsoft MB-335 Zertifizierungsprüfung bestehen wollen, schicken doch die Schulungsunterlagen zur Microsoft MB-335 Zertifizierungsprüfung in den Warenkorb.

Die Microsoft MB-335 Zertifizierungsprüfung ist konzipiert, um die Fähigkeiten und Kenntnisse von Personen zu testen, die sich für eine Karriere als Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert interessieren. Diese Zertifizierungsprüfung konzentriert sich darauf, die Fähigkeit des Kandidaten zu testen, mit verschiedenen Supply Chain Management-Funktionalitäten von Dynamics 365 zu arbeiten. Die Prüfung testet auch die Fähigkeit des Kandidaten, mit unterschiedlichen Geschäftsprozessen zu arbeiten, Lösungen zu entwerfen, das System zu konfigurieren und zu implementieren sowie Stakeholdern Unterstützung zu bieten.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant

Expert MB-335 Prüfungsfragen mit Lösungen (Q210-Q215):

210. Frage

A company produces energy-efficient LED lighting solutions. Production is dependent on primary and secondary resources.

The primary resource is skilled assembly workers responsible for assembling LED lighting fixtures. The workers can work on only one fixture at a time during production.

The secondary resource is automated LED soldering machines, which typically operate at a 50% load capacity. The machines can work on multiple LED lighting fixtures at the same time.

The company must optimize the allocation of resources to meet customer demands efficiently.

You need to configure the resources to meet the customer demand.

What should you do?

- A. Navigate to the primary resource and define priority.
- B. Navigate to the primary resource and disable Finite material.
- C. Navigate to the primary resource and enable Exclusive.
- D. Navigate to the primary resource and disable Finite capacity.

Antwort: C

211. Frage

A manufacturer uses Dynamics 365 Supply Chain Management to create bicycle parts as a configure-to-order configuration. All bicycle parts are sourced from external sources and assembled in the manufacturing facility.

The manufacturer plans to expand its capabilities to create custom bicycle parts in an engineer-to-order model. All bicycle parts will be created in the manufacturing facility. The custom bicycle parts must be omitted from any master planning process.

You need to describe the concepts for the requirements.

Which concepts should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Redesign the manufacturing facility for the new facility capabilities.

Configure for the engineer-to-order items.

Concept

Lean
Unified
Process
Lean
Discrete

Supply policies
Supply policies
Supply schedule
Planning optimization
Priority-based planning

Antwort:

Begründung:

Answer Area

Requirement

Redesign the manufacturing facility for the new facility capabilities.

Configure for the engineer-to-order items.

Concept

Lean
Unified
Process
Lean
Discrete

Supply policies
Supply policies
Supply schedule
Planning optimization
Priority-based planning

Explanation:

To describe the concepts for the requirements, you should use the following:

* Redesign the manufacturing facility for the new facility capabilities: You should use the Discrete concept. Discrete manufacturing is a type of manufacturing that produces distinct items that can be easily counted, touched, or seen¹. Discrete manufacturing is suitable for producing custom bicycle parts in an engineer-to-order model, because it allows you to create unique products based on customer specifications and engineering drawings². Discrete manufacturing also supports complex production processes that involve multiple steps, resources, and materials².

* Configure for the engineer-to-order items: You should use the Supply policies concept. Supply policies are rules that determine how supply is generated for a product based on its demand³. Supply policies can be configured at the product level, the product

master level, or the coverage group level³. For engineer-to-order items, you can configure a supply policy that omits them from any master planning process. For example, you can set the coverage code to None, which means that no planned orders are generated for the product. You can also set the replenishment system to None, which means that no replenishment orders are generated for the product.

1: What is discrete manufacturing? 2: Discrete manufacturing overview 3: Supply policies 4: [Coverage codes]

5: [Replenishment systems]

212. Frage

You need to resolve the issue for UserB.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a catch weight item.
- B. Set up configuration and weight for partial visibility.
- C. Set up configuration and weight for full visibility.
- D. Create a product master with predefined variants for ounces and boxes.

Antwort: A,C

213. Frage

You need to meet the substitution requirements for User4 and User5.

What must you configure? To answer, drag the appropriate configurations to the correct substitution requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Configurations	Answer Area	
	Substitution requirement	Configuration
To-date, From-date	User4	
Plan group, priority	User5	
Open production order, add to BOM		

Antwort:

Begründung:

Configurations	Answer Area	
	Substitution requirement	Configuration
To-date, From-date	User4	Open production order, add to BOM
Plan group, priority	User5	To-date, From-date
Open production order, add to BOM		

Explanation:

Configurations	Answer Area	
	Substitution requirement	Configuration
To-date, From-date	User4	Open production order, add to BOM
Plan group, priority	User5	To-date, From-date
Open production order, add to BOM		

214. Frage

A discrete manufacturer uses the time and attendance registration for production operations.

All employees register daily clock in and clock out times during a 40-hour, Monday through Friday workweek.

Pay periods are every two weeks. Workers are paid hourly.

The production manager will create work schedules with the following windows:

- * Mandatory work hours
- * Work hours during which employees can leave early without accruing absences
- * Work hours during which employees can work extra time

If a junior production worker works over 90 hours in a pay period, the worker will receive time and a half over

80 hours. If a senior production worker works over 90 hours in a pay period, the worker will receive double time over 80 hours.

You need to configure the system for these requirements.

Where should you configure this functionality? To answer, drag the appropriate forms to the correct requirements. Each form may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows the Microsoft Dynamics 365 interface for configuring time and attendance. On the left, under 'Forms', there are four options: 'Workers', 'Flex groups', 'Worker groups', and 'Calendar working times'. In the center, under 'Requirement', there are two requirements: 'Configure the overtime calculations' and 'Configure the periods of time that a worker can choose whether to work'. On the right, under 'Form', there are two empty boxes for selecting forms.

Antwort:

Begründung:

The screenshot shows the Microsoft Dynamics 365 interface for configuring time and attendance. On the left, under 'Forms', there are four options: 'Workers', 'Flex groups', 'Worker groups', and 'Calendar working times'. In the center, under 'Requirement', there are two requirements: 'Configure the overtime calculations' and 'Configure the periods of time that a worker can choose whether to work'. On the right, under 'Form', there are two boxes: 'Workers' and 'Flex groups', both of which are selected with red checkmarks.

Explanation:

To configure the system for these requirements, you should use the following forms:

- * Configure the overtime calculations: You should use the Workers form. This form allows you to set up and maintain information about workers, such as their personal details, employment status, and compensation¹. You can also specify the overtime rate for each worker on the Time and attendance tab². For example, you can set the overtime rate to 1.5 for junior production workers and 2 for senior production workers.

- * Configure the periods of time that a worker can choose whether to work: You should use the Flex groups form. This form allows you to set up and maintain flex groups, which are groups of workers who have flexible work hours³. You can also define flex profiles for each flex group, which specify the mandatory work hours, the flex time hours, and the extra time hours for each day of the week³. For example, you can create a flex profile that has mandatory work hours from 8:00 AM to 4:00 PM, flex time hours from 4:00 PM to 6:00 PM, and extra time hours from 6:00 PM to 8:00 PM.

1: Workers 2: Set up overtime rates 3: Flex groups : [Flex profiles]
