Our AD0-E725 study materials are in the process of human memory, is found that the validity of the memory used by the memory method and using memory mode decision, therefore, the AD0-E725 training materials in the process of examination knowledge teaching and summarizing, use for outstanding education methods with emphasis, allow the user to create a chain of memory, the knowledge is more stronger in my mind for a long time by our AD0-E725 study engine.

Adobe AD0-E725 Exam Syllabus Topics:

Topic	Details
Topic 1	• Cloud: This section of the exam measures the skills of Cloud Architects and covers the deployment and management of Adobe Commerce on cloud infrastructure. It requires explaining the fundamental cloud architecture, performing setup and configuration tasks, and utilizing the Adobe Commerce Cloud CLI tool to manage the environment effectively.
Topic 2	• External Integrations: This section of the exam measures the skills of Integration Specialists and focuses on connecting Adobe Commerce with external SaaS services. It encompasses the skills needed to customize data flows, utilize Adobe App Builder for extensibility, and implement Adobe I • O events and webhooks to create automated and connected business processes.
Topic 3	• Customizations: This section of the exam measures the skills of Solutions Engineers and involves modifying and extending platform functionality. This includes customizing core areas like the product catalog, checkout process, and admin panel, as well as manipulating data entities, customizing APIs, working with message queues, and writing integration tests to ensure code quality and functionality.
Topic 4	• Section 1: Architecture: This section of the exam measures the skills of Backend Developers and covers the core structural concepts of Adobe Commerce. It involves demonstrating effective cache implementation, understanding key code components like plugins and observers, and managing multi-site configurations on a single instance. The domain also includes explaining the use of Git patches, critical security features, the CRON scheduling system, and how indexing functions within the platform.

If you choose our AD0-E725 study materials and use our products well, we can promise that you can pass the AD0-E725 exam and get the AD0-E725 certification. Then you will find you have so many chances to advance in stages to a great level of social

influence and success. Our AD0-E725 Guide Torrent can also provide all candidates with our free demo, in order to exclude your concerts that you can check our AD0-E725 exam questions. We believe that you will be fond of our AD0-E725 learning guide.

Adobe Commerce Developer Expert Sample Questions (Q25-Q30):

NEW QUESTION # 25
An Adobe Commerce Developer is tasked with adding additional data to an order entity in REST API.
Remembering upgradability, which solution should the developer implement?

- A. Use API events.
- B. Use interceptor plugins.
- C. Use extension attributes.

Answer: C

Explanation:
The correct way to expose additional data for service contracts (such as REST or GraphQL APIs) is via Extension Attributes.
A (plugins): Not intended for exposing new data in APIs.
C (events): Cannot modify service contract data structures.
B is correct: Extension Attributes allow adding new fields to API entities while maintaining backward compatibility and upgradability.

Adobe Commerce DevDocs - Extension attributes

NEW QUESTION # 26
While implementing additional functionality, a Developer needs to modify a class with protected and private methods requiring custom logic. The Developer finds that no other Magento customization, such as plugins, will work.
What should the Developer do in this scenario?

- A. Use a preference and extend the original class.
- B. Use an observer to customize data processed by the class.
- C. Use a patch to implement the necessary customizations.

Answer: A

NEW QUESTION # 27
A client uses APIs on their Adobe Commerce platform and powers external programs with the data fed from the Adobe API systems. The client reports that it is becoming unmanageable to handle all the API endpoints and would like to have a centralized API system.
Which new feature will help the client with this problem?

- A. Adobe I/O Events for Adobe Commerce
- B. Adobe Bulk API Handler
- C. Adobe Commerce API Mesh

Answer: C

Explanation:
Adobe Commerce API Mesh provides a centralized GraphQL layer that aggregates data from multiple APIs (Commerce, third-party systems, microservices). This allows the client to interact with a single unified API endpoint, instead of managing multiple APIs individually.
A Bulk API Handler does not exist.
B Adobe I/O Events is for real-time event streaming, not API centralization.
C is correct: API Mesh is the official solution for centralized API management.
Reference:
Adobe Commerce API Mesh Overview

NEW QUESTION # 28

A customer asks for a new functionality which will allow them to see the total lifetime sales statistic of a product. This new data is to be made available for the API and traditional product exports. The technical architect of the company servicing the client decides that for this to be achieved, the first step is for an Extension Attribute to be created.

What are the next two steps that need to be taken? (Choose two.)

- A. Declare the extension attribute in etc/extension_attributes.xml.
- B. Implement an around plugin on the Product Repository.
- C. Implement an after plugin on the Product Repository.
- D. Declare the extension attribute in etc/webapi_rest/extension_attributes.xml.

Answer: A,C

Explanation:
To expose a new field via an Extension Attribute:
C # Declare the extension attribute in etc/extension_attributes.xml.
D # Implement an after plugin on the Product Repository to populate the new attribute with custom logic (in this case, lifetime sales).
A is incorrect: etc/webapi_rest/extension_attributes.xml does not exist (only extension_attributes.xml is valid).
B is incorrect: around plugins are discouraged here and unnecessarily complicate service contract extensions.

Adobe Commerce DevDocs - Extension attributes

NEW QUESTION # 29
A client with a multisite Adobe Commerce installation needs to manage different prices for the same product across various storefronts due to factors like regional pricing strategies and distribution costs. The lowest level of the hierarchy is used to manage localization, including product content.
How should the catalog price scope be configured to address the client's requirements?

- A. Catalog price scope should be set to Store View.
- B. Catalog price scope should be set to Website.
- C. Catalog price scope should be set to Global.

Answer: B

Explanation:
In Adobe Commerce, product prices can be scoped at the Website level. This allows different websites (regional stores) to have independent pricing for the same products.
A (Global): Same price across all websites/stores # does not meet requirements.
C (Store View): Prices cannot be set at the store view level # only attributes like descriptions or translations can be localized.
B is correct: Website scope supports regional pricing strategies while sharing catalog data.
