Pass4sure ISO-IEC-27001-Foundation Dumps Pdf - ISO-IEC-27001-Foundation Practice Test Pdf

Try our best to get the related ISO-IEC-27001-Foundation certification is the best way to show our professional ability, however, the exam is hard nut to crack and there are so many ISO-IEC-27001-Foundation preparation questions related to the exam, it seems impossible for us to systematize all of the key points needed for the exam by ourselves. We would like to help you out with the ISO-IEC-27001-Foundation Training Materials compiled by our company. There are so many strong points of our ISO-IEC-27001-Foundation training materials, you will be bound to pass the ISO-IEC-27001-Foundation exam with high scores.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.
Topic 2	<ul style="list-style-type: none"> • Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
Topic 3	<ul style="list-style-type: none"> • Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.
Topic 4	<ul style="list-style-type: none"> • Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.
Topic 5	<ul style="list-style-type: none"> • Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.
Topic 6	<ul style="list-style-type: none"> • Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q23-Q28):

NEW QUESTION # 23

Which attribute is NOT a required focus of continual ISMS improvement?

- A. Effectiveness
- B. Adequacy
- C. Suitability
- **D. Importance**

Answer: D

Explanation:

Clause 10.2 (Continual Improvement) specifies that the organization must "continually improve the suitability, adequacy and effectiveness of the information security management system." This makes it clear that three attributes are explicitly required to be addressed:

- * Suitability: ensuring the ISMS continues to meet organizational needs in changing contexts.
- * Adequacy: ensuring the ISMS covers the necessary scope and provides sufficient control coverage.
- * Effectiveness: ensuring the ISMS achieves intended outcomes in protecting information security.

The word "importance" is not part of the continual improvement requirement. Importance is implicit in prioritization of risks and actions, but it is not a required continual improvement attribute in ISO/IEC 27001.

Therefore, option D: Importance is the correct choice as it is not specified.

This distinction reinforces that continual improvement is not about subjective importance, but about systematic enhancement of the ISMS's suitability, adequacy, and effectiveness.

NEW QUESTION # 24

What international standard provides guidance on the integration of ISO/IEC 27001 and the IT Service Management standard?

- A. ISO/IEC 27002
- B. ISO/IEC 20000-1
- C. None of the above
- **D. ISO/IEC 27013**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27013 standards:

ISO/IEC 27013 is titled:

"Information technology - Security techniques - Guidance on the integrated implementation of ISO/IEC 27001 and ISO/IEC 20000-1."

This standard provides organizations with specific advice on how to integrate an Information Security Management System (ISMS) with an IT Service Management System (ITSMS). ISO/IEC 20000-1 is the IT Service Management requirements standard, but integration guidance is provided in 27013. ISO/IEC 27002 (A) is guidance for controls, not integration. Option D is incorrect since ISO/IEC 27013 explicitly exists for this purpose.

Therefore, the correct verified answer is B: ISO/IEC 27013.

NEW QUESTION # 25

Which information is required to be included in the Statement of Applicability?

- A. The criteria against which risk will be evaluated
- B. The scope and boundaries of the ISMS
- C. The risk assessment approach of the organization
- **D. The justification for including each information security control**

Answer: D

Explanation:

Clause 6.1.3 (d) requires that the organization "produce a Statement of Applicability that contains the necessary controls (see Annex A), and justification for inclusions, whether they are implemented or not, and the justification for exclusions." This is the defining requirement of the SoA: it documents which Annex A controls are relevant, which are implemented, and the justification for inclusion/exclusion. While the ISMS scope (A) is documented in Clause 4.3, and risk evaluation criteria (C) are defined in Clause 6.1.2, these do not belong in the SoA. The SoA does not describe the full risk assessment approach (B); that is part of the risk assessment methodology.

Therefore, the mandatory requirement for the SoA is justification for including (or excluding) each information security control.

NEW QUESTION # 26

What activity is done first when preparing for an initial certification audit?

- A. Provide documents to the Certification Body auditor for the Stage 1 audit
- B. Provide records to the Certification Body auditor for the Stage 2 audit
- **C. Agree the scope of the ISMS with the Certification Body auditor**
- D. Provide evidence that nonconformities from an internal audit have been actioned

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001:2022 standards and certification guidance:

Before a certification audit can begin, the scope of the ISMS must be clearly defined and agreed with the Certification Body.

ISO/IEC 27001 Clause 4.3 requires: "The scope shall be available as documented information." Certification Bodies require this scope statement to plan audit duration, resources, and coverage. Only after the scope is agreed does the Stage 1 audit begin, which reviews documented information and readiness. Stage

2 focuses on implementation and effectiveness. Evidence of corrective actions (C) is checked at Stage 2 if issues were identified earlier. Records provision (D) occurs during Stage 2, not first.

Thus, the first step in preparing for certification is A: Agreeing the scope of the ISMS with the Certification Body auditor.

NEW QUESTION # 27

Which of the following statements about the differences between an internal audit and a certification audit is true?

An internal audit is conducted at planned intervals and a certification audit is conducted annually. An internal audit is known as a 1st party audit and a certification audit is known as a 3rd party audit.

- **A. Only 2 is true**
- B. Both 1 and 2 are true

- C. Only 1 is true
- D. Neither 1 or 2 is true

Answer: A

Explanation:

ISO/IEC 27001 Clause 9.2 requires internal audits to be conducted at planned intervals, but it does not specify an annual frequency. Certification audits, under ISO/IEC 17021 rules, typically occur on a 3-year cycle with annual surveillance, not strictly "annually." This makes statement 1 inaccurate.

Audit types are defined in ISO/IEC 19011:

First-party audits: conducted internally by or on behalf of the organization (internal audits).

Third-party audits: conducted by independent external certification bodies.

Thus, statement 2 is correct. Therefore, the accurate choice is B: Only 2 is true.

NEW QUESTION # 28

.....

It is our company that can provide you with special and individual service which includes our ISO-IEC-27001-Foundation preparation quiz and good after-sale services. Our experts will check whether there is an update every day, so you needn't worry about the accuracy of ISO-IEC-27001-Foundation Study Materials. If there is an update system, we will send them to the customer automatically. As is known to all, our ISO-IEC-27001-Foundation simulating materials are high pass-rate in this field, that's why we are so famous.
