## Free Updates of Rreal CrowdStrike CCSE-204 Exam Questions

With "reliable credit" as the soul of our CCSE-204 study tool, "utmost service consciousness" as the management philosophy, we endeavor to provide customers with high quality service. Our customer service staff, who are willing to be your little helper and answer your any questions about our CCSE-204 qualification test, fully implement the service principle of customer-oriented service on our CCSE-204 Exam Questions. Any puzzle about our CCSE-204 test torrent will receive timely and effective response, just leave a message on our official website or send us an e-mail for our CCSE-204 study guide.

## CrowdStrike Certified SIEM Engineer Sample Questions (Q33-Q38):

### NEW QUESTION # 33

What is the recommended order of the three required activities to build an efficient CQL query?

- A. Format > Filter > Aggregate
- B. Filter > Aggregate > Format
- C. Filter > Format > Aggregate

- D. Aggregate > Filter > Format

**Answer: B**

Explanation:

The correct answer is B. CrowdStrike's query best-practices documentation says to filter first, then do transformations/formatting, then aggregate, and finally do any output-style post-processing such as table/sorting. Among the choices given, Filter > Aggregate > Format is the best match because formatting/output belongs at the end for efficiency.

This is also consistent with CrowdStrike's explanation that CQL pipelines chain filter and transformation steps before aggregate functions, and that aggregate functions produce new result structures rather than raw events.

#### NEW QUESTION # 34

What is the correct mode to enroll LogCollector into Fleet Management with configuration of the log sources stored and managed centrally in Next-Gen SIEM?

- A. Complete
- **B. Full**
- C. localConfig
- D. Central

**Answer: B**

Explanation:

The correct answer is A. Full.

CrowdStrike's Falcon LogScale Collector Fleet Management enrollment documentation states that the enrollment mode can be full or localConfig, and it specifically defines full as the mode that enrolls the collector into Fleet Management with the configuration of log sources stored and managed centrally in LogScale/Next-Gen SIEM.

Why the other options are incorrect:

B). Complete and C. Central are not documented enrollment mode names. D. localConfig is a valid mode, but CrowdStrike says that mode keeps the log source configuration managed and stored locally on the host, not centrally.

#### NEW QUESTION # 35

Which two tags are compliant with the CrowdStrike Parsing Standard (CPS)?

- A. #vendor.name and #event.type
- B. #observer.type and #vendor.name
- **C. #observer.type and #event.kind**
- D. #event.type and #event.kind

**Answer: C**

Explanation:

The correct answer is C. #observer.type and #event.kind.

CrowdStrike's CPS migration documentation lists the CPS-compliant parser tags, including #event.dataset, #event.kind, #event.module, and #observer.type. Since both #observer.type and #event.kind are explicitly listed, option C is the correct pair.

Why the other options are incorrect:

The documentation lists #Vendor as a tag, not #vendor.name, and it does not list #event.type among the CPS parser tags in the tag list. That makes options A, B, and D incorrect.

#### NEW QUESTION # 36

What is true about first-party data from the Falcon platform and its integration into Next-Gen SIEM?

- A. It is quickly ingested to Next-Gen SIEM via a third-party integration
- B. First-party data requires a log collector installation
- **C. It is instantly accessible within Next-Gen SIEM**

**Answer: C**

Explanation:

The correct answer is C. It is instantly accessible within Next-Gen SIEM .

CrowdStrike states that Falcon Next-Gen SIEM provides instant availability of first-party data , including native CrowdStrike telemetry such as endpoint, cloud, and identity data. This means first-party Falcon data does not require a separate onboarding step like third-party sources often do.

Why the other options are incorrect:

A is incorrect because first-party Falcon telemetry does not require a separate log collector installation to become available inside the platform. B is incorrect because the question is about first-party data, not third- party integration. CrowdStrike distinguishes native Falcon telemetry from externally integrated log sources.

#### **NEW QUESTION # 37**

You suspect that an API key you recently generated has been compromised.

What should you do?

- A. Search the audit logs for the connector creation event and replicate it
- **B. Regenerate a new API key directly from the platform**
- C. Contact CrowdStrike Support to retrieve and send the key to you
- D. View the API key details in the platform and clone a new API key

**Answer: B**

Explanation:

The correct answer is A. Regenerate a new API key directly from the platform .

CrowdStrike guidance around connector onboarding shows that after a connector is created, you generate an API key in the platform and use that key for the integration. Related integration guidance also shows a Regenerate API key action in the platform flow, which is the correct response when a key may be exposed or compromised.

Why the other options are incorrect:

\* B does not address credential compromise; recreating the connector event does not invalidate the exposed key.

\* C is incorrect because the issue is not viewing or cloning details; the security action is to rotate

/regenerate the credential.

\* D is incorrect because CrowdStrike documentation consistently indicates secrets/keys are generated in- platform and may only be shown once, meaning Support is not the normal mechanism to retrieve and resend an existing secret.

#### **NEW QUESTION # 38**

.....

One of the advantages of taking the ActualCollection CrowdStrike Certified SIEM Engineer (CCSE-204) practice exam (desktop and web-based) is that it helps applicants to focus on their weak areas. It also helps applicants to track their progress and make improvements. CrowdStrike CCSE-204 Practice Exams are particularly helpful in identifying areas where one needs more practice.
