## HPE6-A88 PDF Dumps - Effortless Solution To Pass Exam

Allowing for there is a steady and growing demand for our HPE6-A88 real exam with high quality at moderate prices, we never stop the pace of doing better. All newly supplementary updates of our HPE6-A88 exam questions will be sent to your mailbox one year long. And we shall appreciate it if you choose any version of our HPE6-A88 practice materials for exam and related tests in the future.

## HPE Aruba Networking ClearPass Exam Sample Questions (Q87-Q92):

### NEW QUESTION # 87

An IT administrator needs to quickly identify all devices connected to a specific subnet within their network.

They decide to use the search feature to find all IP addresses within the 10.0.0.0/8 subnet. Which search term should they use?

- A. 10.0.0.0/16
- B. 10.0.0
- C. 10.

**Answer: C**

**Explanation:**

The search bar in the ClearPass Endpoints and Access Tracker views supports partial-string matching. To find all devices in the 10.x.x.x (10/8) range, simply typing "10." will filter the list to show every entry where the IP address field begins with those two characters. This is the most efficient way to perform broad subnet filtering without using complex query syntax.

### NEW QUESTION # 88

An IT specialist is tasked with ensuring that guests receive their login credentials via SMS after completing the self-registration process. What configuration must be checked to guarantee that this feature is enabled?

- A. ClearPass must be configured to send the guest account information via SMS.
- B. The network must disable email notifications to enable SMS notifications.
- C. The guest's browser must support SMS messaging.

**Answer: A**

Explanation:

ClearPass Guest must be configured with an SMS delivery option so that guest account credentials are sent via SMS after self-registration. This requires proper SMS gateway integration and enabling SMS as a credential delivery method within the guest workflow.

### NEW QUESTION # 89

Which ClearPass component helps identify the type of device connecting to the network for segmentation purposes?

Response:

- A. Endpoint Repository
- B. Device Profiling Engine
- C. Access Tracker
- D. RADIUS Accounting Module

**Answer: B**

### NEW QUESTION # 90

An IT administrator is managing a network with ClearPass and notices that one of the devices is sending multiple health checks throughout the day via different networks (wired, wireless, and VPN). How does OnGuard handle the license usage for this device?

- A. OnGuard debits one license per day for the device regardless of the number of health checks or networks used.
- B. OnGuard debits a separate license for each health check sent by the device.
- C. OnGuard debits a license for each network the device connects to throughout the day.

**Answer: A**

Explanation:

OnGuard licensing is device-based and time-bound. A single device consumes one license per day, regardless of how many health checks it performs or how many different networks it connects to during that period.

### NEW QUESTION # 91

If a guest user must sponsor themselves using their own email address, what is a critical step to ensure they can access the network?

- A. Complete a phone verification process.
- B. Verify their email address before access is granted.
- C. Submit a secondary form for verification.

**Answer: B**

Explanation:

When self-sponsorship is used, ClearPass relies on email verification to confirm the guest's identity and approval. The guest must verify their email address before the account is activated and network access is allowed.

### NEW QUESTION # 92

.....

You don't need to worry about wasting your precious time but failing to get the HPE6-A88 certification. Many people have used our
