

# Network-Security-Essentials zu bestehen mit allseitigen Garantien

## Levels of Network Security Practices

Es existiert viele Methoden, mit der Sie sich auf die WatchGuard Network-Security-Essentials Zertifizierungsprüfung vorzubereiten. Unsere Website bietet zuverlässige Prüfungsmaterialien, mit den Sie sich auf die nächste WatchGuard Network-Security-Essentials Zertifizierungsprüfung vorbereiten. Die Lernmaterialien zur WatchGuard Network-Security-Essentials Zertifizierungsprüfung von ExamFragen enthalten sowohl Fragen als auch Antworten. Unsere Materialien sind von der Praxis überprüfte Software. Wir werden alle Ihren Bedürfnisse zur WatchGuard Network-Security-Essentials Zertifizierung abdecken.

Die WatchGuard Network-Security-Essentials Zertifizierungsprüfung stellt eine wichtige Position in der IT-Branche dar, worüber viele IT-Experten sich einig sind. Die WatchGuard Network-Security-Essentials (Network Security Essentials for Locally-Managed Fireboxes) Zertifizierungsprüfung zu bestehen ist jedoch nicht einfach. Es erfordert umfangreiche Fachkenntnisse und Erfahrungen, weil die WatchGuard Network-Security-Essentials Zertifizierungsprüfung sowieso eine autoritäre Prüfung, die das Niveau der IT-Fachkenntnissen überprüft. Wenn Sie das WatchGuard Network-Security-Essentials Zertifikat bekommen, wird Ihre Fähigkeit von den Firmen akzeptiert. Das bedeutet, dass die zielgerichteten Schulungsunterlagen von ExamFragen sehr wirksam ist. Mit unseren Prüfungsmaterialien können Sie 100% die Prüfung bestehen.

## Network-Security-Essentials Prüfungsfragen Prüfungsvorbereitungen, Network-Security-Essentials Fragen und Antworten, Network Security Essentials for Locally-Managed Fireboxes

Warum sind wir vorrangiger als die anderen Websites? Weil die WatchGuard Network-Security-Essentials Schulungsunterlagen von uns die umfassendste, die genaueste sind. Außerdem sind sie von guter Qualität. So ist ExamFragen Ihnen die beste Wahl und die beste Garantie zur WatchGuard Network-Security-Essentials Zertifizierungsprüfung.

## WatchGuard Network Security Essentials for Locally-Managed Fireboxes

## Network-Security-Essentials Prüfungsfragen mit Lösungen (Q19-Q24):

### 19. Frage

You configured a Firebox for a school environment. Students must have more restricted access than teachers, and unauthenticated users cannot have any Internet access. You added Student and Teacher groups to your proxy policies that handle web traffic. Based on the image below, this configuration can accomplish your goals.

- A. False
- **B. True**

**Antwort: B**

Begründung:

The image shows a configuration for a school environment with separate HTTP and HTTPS proxy policies for Students and Teachers. This separation allows for different levels of access control based on group membership, providing more restrictive access for students compared to teachers.

\* Students are restricted by specific HTTP and HTTPS proxy policies, limiting their access to designated content and sites.

\* Teachers have their own policies, which can be configured with more permissive rules.

\* Unauthenticated users are not included in any policy, effectively blocking their internet access, as the firewall denies traffic not explicitly allowed by a policy.

This configuration meets the requirements by:

\* Allowing teachers and students access as per their respective policies.

\* Blocking unauthenticated users from internet access entirely.

### 20. Frage

If the Firebox does not have a feature key installed, which of these statements are true? (Select three.)

- A. Only one user can connect to the Internet through the Firebox
- **B. You cannot upgrade the Firebox**
- C. You cannot run the Web Setup Wizard
- **D. You cannot configure subscription services**
- **E. You cannot save configuration changes to the Firebox**

**Antwort: B,D,E**

Begründung:

Without a feature key:

\* Option A: Upgrades are restricted, as the device relies on the feature key to validate software entitlement.

\* Option B: Subscription services like antivirus, IPS, or web filtering cannot be configured without the feature key, which activates these services.

\* Option D: Configuration changes cannot be permanently saved to the Firebox without the feature key, limiting the device's functionality.

\* Option C (Web Setup Wizard) and Option E (one user internet access) do not depend on the feature key and are not restricted in this scenario.

### 21. Frage

As you troubleshoot a Branch Office VPN tunnel, you see the log message below. Which settings can you modify in the BOVPN virtual interface configuration to resolve this issue? (Select one.)

- A. Gateway Settings
- B. VPN Routes
- C. BOVPN-Allow policies
- **D. Phase 2 Settings**
- E. Phase 1 Settings

**Antwort: D**

Begründung:

When troubleshooting a Branch Office VPN (BOVPN) tunnel, issues in the Phase 2 settings can commonly cause connectivity

problems. Adjusting settings such as the encryption and integrity algorithms, or setting correct lifetimes in Phase 2, may resolve compatibility or timeout issues with third-party VPN endpoints. This configuration ensures the two VPN endpoints can securely exchange data in alignment with each other's capabilities and settings.

## 22. Frage

In Firebox System Manager, where can you perform each of these tasks?

### Antwort:

Begründung:

Explanation:

Here are the correct answers based on the Firebox System Manager interface functions:

- \* See the routing table and interface statisticsanswer:Firebox System Manager - Status Report Explanation: The Status Report section in Firebox System Manager includes information on network routing and interface statistics, providing insights into network paths and interface performance.
  - \* See a list of users connected to the Fireboxanswer:Firebox System Manager - Authentication List Explanation: The Authentication List displays all active user sessions connected to the Firebox, showing authenticated users and their session details.
  - \* Learn the status of your IPS signature databaseanswer:Firebox System Manager - Subscription Services Explanation: Subscription Services in FSM gives information on the status of services like IPS, showing the update status and version of the signature database.
  - \* Ping the source of a denied packetanswer:Firebox System Manager - Traffic Monitor Explanation: The Traffic Monitor tool allows administrators to track packet details and offers functionality to ping sources directly, aiding in network troubleshooting.
  - \* Block all traffic for an IP addressanswer:Firebox System Manager - Blocked Sites List Explanation: The Blocked Sites List feature in FSM lets administrators add IP addresses to a blacklist, blocking all incoming and outgoing traffic for specified addresses.
- These answers utilize standard Firebox management features for performing administrative and diagnostic tasks efficiently. Let me know if you need further assistance with Firebox System Manager capabilities.

## 23. Frage

Your network was the target of an attack last week. You want to learn more about the source of the attack. What monitoring tools can you use to get started? (Select one.)

- A. Traffic Monitor in Firebox System Manager
- **B. Log Search and reports in WatchGuard Cloud or Dimension**
- C. WatchGuard Log Catalog
- D. FireWatch in Fireware Web UI
- E. Discovery in Fireware Web UI

### Antwort: B

Begründung:

To investigate an attack and learn more about the source, Log Search and reports in WatchGuard Cloud or Dimension offer detailed logs and analytical reports. These tools provide historical data, allowing you to review traffic, pinpoint the source of the attack, and analyze patterns.

While other tools like Traffic Monitor or FireWatch offer real-time monitoring, they do not provide the in-depth historical analysis and reporting features required for post-incident investigation.

## 24. Frage

.....

Wofür zögern Sie noch? Sie haben nur eine Chance. Jetzt können Sie die vollständige Version zur WatchGuard Network-Security-Essentials Zertifizierungsprüfung bekommen. Sobald Sie die ExamFragen klicken, wird Ihr kleiner Traum verwirklicht werden. Sie haben die besten Schulungsunterlagen zur WatchGuard Network-Security-Essentials Zertifizierungsprüfung gekriegen. Benutzen Sie beruhigt unsere WatchGuard Network-Security-Essentials Prüfungsfragen und Antworten, werden Sie sicher die WatchGuard Network-Security-Essentials Prüfung bestehen.
