Benefits with DumpsReview Confluent CCDAK study material

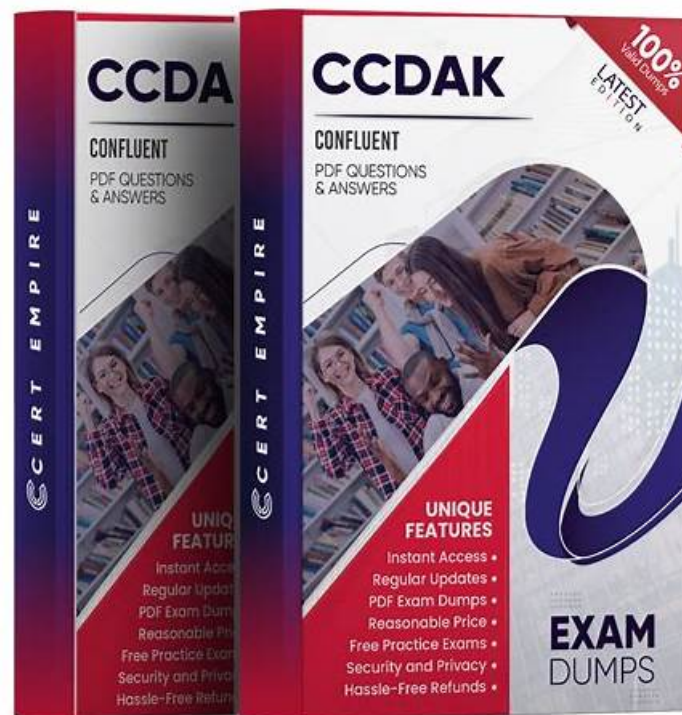

P.S. Free 2026 Confluent CCDAK dumps are available on Google Drive shared by DumpsReview: https://drive.google.com/open?id=1Z3wkYf2YTDxErPQETFdnIoalCk3RUdJ6

Once the user has used our CCDAK learning material for a mock exercise, the product's system automatically remembers and analyzes all the user's actual operations. The user must complete the test within the time specified by the simulation system, and there is a timer on the right side of the screen, as long as the user begins the practice of CCDAK Learning Materials, the timer will run automatic and start counting.

To become certified as a Confluent CCDAK certified developer for Apache Kafka, candidates must pass a rigorous online examination. CCDAK exam is computer-based and consists of 90 multiple choice questions, and has a time limit of 120 minutes. CCDAK exam is designed to challenge the technical skills and knowledge needed for creating and managing Apache Kafka applications using Confluent's platform. Passing the Confluent CCDAK Exam demonstrates a proficiency in working with Kafka streams in a distributed environment using Confluent platform, allowing candidates to leverage this certification to advance their careers.

Useful Confluent CCDAK Exam Testking - CCDAK Free Download

If you keep delivering, your company will give you more opportunity and more money to manage. I don't think you will be a clerk forever. You must do your best to pass IT certification and to be elevated people. DumpsReview Confluent CCDAK practice test will help you to open the door to the success. You can download pdf real questions and answers. What's more, you can also refer to our free demo. More and more IT people have taken action to purchase our Confluent CCDAK test. 100% guarantee to pass CCDAK test. I think you will not miss it.

Confluent Certified Developer for Apache Kafka Certification Examination Sample Questions (Q58-Q63):

NEW QUESTION # 58

You have a topic t1 with six partitions. You use Kafka Connect to send data from topic t1 in your Kafka cluster to Amazon S3.
Kafka Connect is configured for two tasks.
How many partitions will each task process?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:
When using Kafka Connect with sink connectors (like S3 Sink),each task is assigned one or more topic partitions. Thetotal number of partitions (6)isevenly distributedacross the available tasks (2). Thus, each task will handle3 partitions.
FromKafka Connect Documentation:
"Kafka Connect divides the topic partitions among available tasks. For example, a topic with six partitions and two tasks results in each task handling three partitions." Reference:Kafka Connect Concepts > Tasks and Partitions

NEW QUESTION # 59
You are working on a Kafka cluster with three nodes. You create a topic named orders with:
* replication.factor = 3
* min.insync.replicas = 2
* acks = allWhat exception will be generated if two brokers are down due to network delay?

- A. NotCoordinatorException
- B. NotLeaderForPartitionException
- C. NetworkException
- D. NotEnoughReplicasException

Answer: D

Explanation:
With acks=all and min.insync.replicas=2, Kafka requiresat least two in-sync replicasto acknowledge a write.
If onlyone broker is alive, the condition fails, andNotEnoughReplicasExceptionis thrown by the producer.
FromKafka Producer Exception Docs:
"NotEnoughReplicasException is thrown when the number of in-sync replicas is insufficient to satisfy acks=all with min.insync.replicas."
* NetworkException is generic and not raised here.
* NotCoordinatorException is related to consumer group coordination.
* NotLeaderForPartitionException is unrelated unless accessing an unassigned leader.
Reference:Kafka Producer Error Handling

NEW QUESTION # 60
You are receiving orders from different customer in an "orders" topic with multiple partitions. Each message has the customer name as the key. There is a special customer named ABC that generates a lot of orders and you would like to reserve a partition exclusively for ABC. The rest of the message should be distributed among other partitions. How can this be achieved?

- A. All messages with the same key will go the same partition, but the same partition may have messages with different keys. It is not possible to reserve
- B. Define a Kafka Broker routing rule
- C. Add metadata to the producer record
- D. Create a custom partitioner

Answer: D

Explanation:
A Custom Partitioner allows you to easily customise how the partition number gets computed from a source message.

NEW QUESTION # 61
In Kafka, every broker... (select three)

- A. is a controller
- B. knows all the metadata for all topics and partitions
- C. knows the metadata for the topics and partitions it has on its disk
- D. contains all the topics and all the partitions
- E. is a bootstrap broker
- F. contains only a subset of the topics and the partitions

Answer: B,E,F

Explanation:
Kafka topics are divided into partitions and spread across brokers. Each brokers knows about all the metadata and each broker is a bootstrap broker, but only one of them is elected controller

NEW QUESTION # 62
A consumer wants to read messages from a specific partition of a topic. How can this be achieved?

- A. Call assign() passing a Collection of TopicPartitions as the argument
- B. Call subscribe() passing TopicPartition as the argument
- C. Call subscribe(String topic, int partition) passing the topic and partition number as the arguments

Answer: A

Explanation:
assign() can be used for manual assignment of a partition to a consumer, in which case subscribe() must not be used. Assign() takes a collection of TopicPartition object as an argument https://kafka.apache.org/23 /javadoc/org/apache/kafka/clients/consumer/KafkaConsumer.html#assign-java.util.Collection-

NEW QUESTION # 63
......

The Confluent CCDAK desktop practice exam software is customizable and suits the learning needs of candidates. A free demo of the Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) desktop software is available for sampling purposes. You can change CCDAK Practice Exam's conditions such as duration and the number of questions. This simulator creates a Confluent CCDAK real exam environment that helps you to get familiar with the original test.
