熱門的PDII題庫資料，由Salesforce權威專家撰寫

NewDumps為您提供的針對性培訓和高品質的練習題，是你第一次參加Salesforce PDII 認證考試最好的準備。NewDumps提供的練習題是與真實的考試試題很相似的，能確保你一次成功通過Salesforce PDII 認證考試。如果你考試失敗，我們將全額退款。

Salesforce PDII認證在業界中受到高度重視，並被雇主認為是Salesforce開發卓越的標誌。該認證為在Salesforce生態系統中推進職業生涯的開發人員提供了競爭優勢。認證開發人員受到企業的高度追捧，因為企業需要在Salesforce平台上構建或維護定制應用程序。

Salesforce PDII（Salesforce認證平台開發人員II）考試是為希望在Salesforce開發方面獲得高級知識和技能的開發人員設計的認證考試。該考試旨在測試開發人員在Salesforce平台上為自定義應用程序設計和實施高級業務邏輯和接口的能力。

最新的 Salesforce Developers PDII 免費考試真題 (Q94-Q99):

問題 #94

Exhibit:

The test method above tests in Apex trigger that the developer knows will make a lot of queries when a lot of Accounts are simultaneously updated to be customers.

The test method fails at the Line 20 because of too many SOQL queries.

What is the correct way to fix this?

- A. Replace most of the Apex Trigger with Process Builder processes to reduce the number of queries in the trigger

- B. Add Test.startTest() before and Test.stopTest() after both Line 7 of the code and Line 20 of the code
- C. Change the DataFactory class to create fewer Accounts so that the number of queries in the trigger is reduced
- D. Add Test.startTest() before Line 18 of the code and add Test.stopTest() after line 18 of the code

答案： D

解題說明：

https://developer.salesforce.com/docs/atlas.en-us.apexcode.meta/apexcode/apex_testing_tools_start_stop_test.htm

問題 #95

Consider the following code snippet:

How should <c-order> component communicate to the <c-order-order> component that an order has been selected by the user?

- A. Create and fire a standard DOM event.
- B. Create and dispatch a custom event
- C. Create and fire a component event.
- D. Created and fire an application event.

答案： B

問題 #96

A developer needs to send Account records to an external system for backup purposes. The process must take a snapshot of Accounts as they are saved and then make a callout to a RESTful web service. The web service can only receive, at most, one record per call. What should a developer do to implement these requirements?

- A. Create a future method.
- B. Implement platform events.
- C. Implement the Queueable interface.¹²
- D. Expose an Apex class as a web service.³⁴

答案： C

解題說明：

78

This requirement involves two specific constraints: performing a callout after a database change (DML) and handling high-volume processing where the external service only accepts one record at a time. In Salesforce, you cannot perform a callout in the same transaction after a DML operation; you must use asynchronous processing.

The Queueable interface is the superior choice here over @future methods. Queueable Apex allows for "chaining" jobs. Since the external web service only accepts one record per call, a developer can write a Queueable class that processes the first record, makes the callout, and then checks if there are remaining records. If more records exist, the class can enqueue a new instance of itself to process the next record. This creates a controlled, sequential execution path that respects the external system's limits.

While @future methods can perform callouts, they cannot be chained and have no built-in way to handle a sequential "one-by-one" requirement for an unknown number of records efficiently. Platform events (Option A) are used for event-driven architectures but would still require an asynchronous consumer to handle the callout limits. Exposing a web service (Option D) is for receiving data, not sending it. Therefore, the Queueable interface provides the necessary flexibility and transaction control to manage the snapshot and individual callout requirements effectively.

問題 #97

After a Platform Event is defined in a Salesforce org, events can be published via which two mechanisms?

Choose 2 answers

- A. External Apps can use the standard Streaming API.
- B. Internal Apps can use Outbound Messages
- C. External Apps require a custom Apex web service.
- D. Internal Apps can use Process Builder.

答案： B,D

問題 #98

A company has a native iOS order placement app that needs to connect to Salesforce to retrieve consolidated information from many different objects in a JSON format.

Which is the optimal method to implement this in Salesforce?

- A. Apex SOAP web service
- B. Apex SOAP callout
- C. Apex REST callout
- D. Apex REST web service

答案：D

解題說明：

Apex REST web service is the optimal method to implement this in Salesforce because it allows you to expose your Apex classes and methods as RESTful web services that can be accessed by external applications. Apex REST web service can also return data in JSON format, which is suitable for the native iOS app. Apex SOAP web service, on the other hand, uses XML format, which is more verbose and complex to parse. Apex SOAP callout and Apex REST callout are used to invoke external web services from Apex, not to expose Apex as web services. Reference: [Apex REST Web Services], [Apex SOAP Web Services], [Apex Web Services and Callouts]

問題 #99

.....

即將參加Salesforce的PDII認證考試的你沒有信心通過考試嗎？不用害怕，因為NewDumps可以提供給你最好的資料。NewDumps的PDII考古題是最新最全面的考試資料，一定可以給你通過考試的勇氣與自信。这是经过很多人证明过的事实。

PDII最新題庫資源：<https://www.newdumpspdf.com/PDII-exam-new-dumps.html>

因為使用免費的題庫將不能保證您在任何PDII最新題庫資源認證的通行證，當妳預訂PDII最新題庫資源的考試，因為，妳將需要支付考試費，肯定希望那樣吧，Salesforce PDII題庫資料 那麼，還不知道通過考試的捷徑的你，想知道技巧嗎，NewDumps會為參加PDII認證考試的人員提供一切最新的他們想要的準確的考試練習題和答案，你現在正在為了尋找Salesforce的PDII認證考試的優秀的資料而苦惱嗎，Salesforce Developers PDII真題材料 認證主要目的是讓網路工程師能在現今變化迅速的資訊網路環境中，都能掌握和擁有最先進的網路技術，任何時候都能保持領導地位，那麼，我們首先就需要關注一個問題：PDII 常見問題有哪些，該如何解決？

算妳還有點良心，沒忘了這茬，啊. 啊. 還沒等我預報危險，樓道裏卻已經傳來了陣陣尖叫. PDII第九十二章 面無表情的白衣女子 怎麼了，因為使用免費的題庫將不能保證您在任何Salesforce Developers認證的通行證，當妳預訂Salesforce Developers的考試，因為，妳將需要支付考試費。
