Do you want to double your salary in a short time? Yes, it is not a dream. Our AI-102 latest study guide can help you. IT field is becoming competitive; a Microsoft certification can help you do that. If you get a certification with our AI-102 latest study guide, maybe your career will change. A useful certification will bring you much outstanding advantage when you apply for any jobs about Microsoft company or products. Just only dozens of money on AI-102 Latest Study Guide will assist you 100% pass exam and 24-hours worm aid service.

To help you learn with the newest content for the AI-102 preparation materials, our experts check the updates status every day, and their diligent works as well as professional attitude bring high quality for our AI-102 practice materials. You may doubtful if you are newbie for our AI-102 training engine, free demos are provided for your reference. The free demo of AI-102 exam questions contains a few of the real practice questions, and you will love it as long as you download and check it.

Premium AI-102 Files | AI-102 Lab Questions

In this rapid rhythm society, the competitions among talents are growing with each passing day, some job might ask more than one's academic knowledge it might also require the professional AI-102 certification and so on. It can't be denied that professional certification is an efficient way for employees to show their personal Designing and Implementing a Microsoft Azure AI Solution abilities. In order to get more chances, more and more people tend to add shining points, for example a certification to their resumes. Passing exam won't be a problem anymore as long as you are familiar with our AI-102 Exam Material (only about 20 to 30 hours practice). High accuracy and high quality are the reasons why you should choose us.

Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q260-Q265):

NEW QUESTION # 260

You have an Azure subscription that contains a multi-service Azure Cognitive Services Translator resource named Translator1. You are building an app that will translate text and documents by using Translator1. You need to create the REST API request for the app. Which headers should you include in the request?

- A. the subscription key, the subscription region, and the content type
- B. the access control request, the content type, and the content length
- C. the resource ID and the content language
- D. the subscription key and the client trace ID

Answer: A

Explanation:

When using Azure Translator REST API, required headers are:

- * Ocp-Apim-Subscription-Key # subscription key
- * Ocp-Apim-Subscription-Region # resource region (if using a multi-service Cognitive Services resource)
- * Content-Type # typically application/json or application/xml

Other options:

- * Client trace ID is optional for debugging.
- * Resource ID, access control request, content language, content length are not required headers.

The answer: B

Reference: Azure Translator API reference

NEW QUESTION # 261

You are building a Language Understanding solution. You discover that many intents have similar utterances containing airport names or airport codes. You need to minimize the number of utterances used to train the model. Which type of custom entity should you use?

- A. regular expression
- B. Pattern.any
- C. list
- D. machine-learning

Answer: B

Explanation:

- * When many utterances differ only by airport names or codes, you don't want to list them all.
- * A Pattern.any entity acts as a placeholder for free-form input inside patterns, allowing the model to accept any word/phrase in that slot.
- * Machine-learning entities require lots of labeled utterances.
- * List entities work for fixed sets (e.g., specific known airport codes), but this scenario implies dynamic airport data.
- * Regex entities are for structured formats (like postal codes).

The answer: A

Reference: Pattern.any entities in Language Understanding

NEW QUESTION # 262

You are designing a conversation flow to be used in a chatbot.

You need to test the conversation flow by using the Microsoft Bot Framework Emulator.

How should you complete the .chat file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

Reference:

<https://docs.microsoft.com/en-us/azure/bot-service/bot-builder-howto-add-media-attachments?view=azure-bot-service-4.0&tabs=csharp>

NEW QUESTION # 263

You have a Docker host named Host1 that contains a container base image.

You have an Azure subscription that contains a custom speech-to-text model named model1.

You need to run model1 on Host1.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

☐

Answer:

Explanation:

☐

Explanation:

According to the course AI-102T00: Designing and Implementing a Microsoft Azure AI Solution1, the correct sequence of actions to run model1 on Host1 is:

* Export model1 to Host1

* Run the container

* Configure disk logging

The explanation and references are as follows:

* Export model1 to Host1: This step is required to deploy the custom speech-to-text model to the Docker host. You can use the Azure portal or the Azure CLI to export the model as a container image2.

* Run the container: This step is required to start the container and run the model on the Docker host. You can use the Docker CLI to run the container image3.

* Configure disk logging: This step is optional but recommended to monitor the performance and health of the container. You can use the Docker CLI to configure disk logging for the container4.

NEW QUESTION # 264

Hotspot Question

You are building a call handling system that will perform the following actions:

- Accept incoming voicemails in French.

- Convert voicemails from French to English.

Which Azure AI Speech SDK class should you use for each action? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

Explanation:

Box 1: AudioConfig

If you want to specify the audio input device, then you need to create an AudioConfig class instance and provide the audioConfig parameter when initializing TranslationRecognizer.

If you want to provide an audio file instead of using a microphone, you still need to provide an audioConfig parameter.

Box 2: TranslationRecognizer

* TranslationRecognizer

Initialize a translation recognizer

After you created a SpeechTranslationConfig instance, the next step is to initialize TranslationRecognizer. When you initialize TranslationRecognizer, you need to pass it your speechTranslationConfig instance. The configuration object provides the credentials that the Speech service requires to validate your request.
