**CBCI Valid Test Pattern | Exam CBCI Training**

If you are willing to clear exam successfully, you need to not only read books and study materials but also purchase BCI CBCI reliable exam cram for well-directed review which will make you half the work with double results. You can find three versions for each exam: PDF version, Software version and APP version. You can choose one or more versions of CBCI Reliable Exam Cram based on your studying methods and habits.

## BCI Certificate of the Business Continuity Institute (CBCI) Sample Questions (Q114-Q119):

### NEW QUESTION # 114

Which of the following statements about the methods used to collect information following an exercise is correct?

- A. Surveys are especially effective if an exercise and its participants are spread out over multiple locations
- B. Only senior level exercise participants should provide opinions during the debrief
- C. A hot debrief should be conducted within one month after the conclusion of an exercise
- D. One-on-one interviews with all exercise participants should be conducted within one month following the exercise

**Answer: A**

Explanation:

Surveys are a practical and efficient way to collect feedback from participants who may be geographically dispersed or involved in staggered exercise sessions. The CBCI 7.0 course emphasizes that surveys enable broad participation and timely input collection, which can be crucial when participants cannot all meet in person or at the same time. Hot debriefs are typically immediate post-exercise discussions, not extended over a month. One-on-one interviews and limiting input to senior personnel restrict breadth and may delay feedback.

### NEW QUESTION # 115

Which of the following describes an operational plan?

- A. Pre-prepared information to facilitate the coordination of response activities when several different operational teams are involved
- B. Documented plans to protect people and property while supporting the recovery of the organization's prioritised activities
- C. Documented procedures that are still in draft form as they have not yet been tested via exercises or actual incidents
- D. Detailed information on any processes that have not been risk assessed by the organization and therefore present an increased risk

**Answer: B**

Explanation:

Operational plans sit within Enabling Solutions (PP5) and are designed to support the continuity and recovery of prioritised activities at the departmental or specialist-service level (e.g., facilities, ICT, logistics), from the beginning of an incident through recovery and return to normal. They translate agreed continuity solutions and resource requirements into actionable procedures for operational teams.

Option A is the best description because it captures the operational intent: protect people/property (immediate operational control and safety) while enabling recovery of prioritised activities and services. Option D is closer to what BCI guidance describes as a tactical plan outcome—a coordination framework between strategic and operational teams—rather than an operational plan itself. Option B confuses plan status (draft/untested) with plan type; an operational plan can be draft or validated, but that does not define it. Option C is about risk documentation, not operational recovery planning. Operational plans are therefore best represented by A.

### NEW QUESTION # 116

Which type of exercise is always carried out in the normal operational environment, alternative premises, or command centres and is designed to include everyone that could be involved in the response if the incident were real?

- A. Simulation
- B. Discussion-based
- C. Scenario
- D. Live

**Answer: D**

Explanation:

The CBCI 7.0 course describes live exercises as the most comprehensive type of Business Continuity exercise.

These are conducted in actual or alternate operational environments, including command centres, to simulate real incident conditions as closely as possible. Live exercises involve all personnel who would participate in an actual incident response, testing systems, processes, communication, and physical infrastructure. Their scope, realism, and inclusiveness help identify practical issues that other exercise types may miss. They require significant resources and planning but provide critical assurance of organizational preparedness under authentic conditions.

Reference: CBCI 7.0 Study Guide, Module 6: Exercising and Validation, pages 120-122.

#### NEW QUESTION # 117

For a strategic response team to be effective, its members should have:

- A. Skill in coordinating resources, operations and suppliers
- **B. Decisiveness and the ability to make decisions quickly**
- C. A detailed understanding of each requirement set out in Business Continuity plans
- D. Ability to identify commercial opportunities in adverse situations

**Answer: B**

Explanation:

Strategic response teams play a crucial role in managing crises by making timely, high-level decisions that guide the organization's overall continuity response. The CBCI 7.0 course emphasizes that decisiveness and rapid decision-making are essential qualities for such teams, as delays can exacerbate disruptions and increase impacts. While coordination skills and understanding of Business Continuity plans are important, the strategic team must prioritize swift, confident decisions to steer operational teams and allocate resources effectively during dynamic and stressful situations. Identifying commercial opportunities is beneficial but secondary to ensuring continuity and stability.

Reference: CBCI 7.0 Study Guide, Module 2: Response Structures and Roles, pages 80-83.

#### NEW QUESTION # 118

Following the completion of the Analysis stage of the Business Continuity Management System (BCMS), the next stage would be to:

- A. Develop the operational plans.
- **B. Identify strategies and solutions for resuming business operations.**
- C. Establish governance for the BCMS.
- D. Conduct a risk assessment on prioritised activities.

**Answer: B**

Explanation:

In the GPG 7.0 structure used by CBCI 7.0, Analysis (PP3) covers the Business Impact Analysis (BIA) and Risk Assessment, producing requirements such as priorities, resource needs, and recovery targets. Once those requirements are understood, the next step is Solutions Design (PP4)-selecting and designing strategies and solutions that can meet the recovery requirements (e.g., meeting RTOs, securing resources, reducing single points of failure).

That sequencing is why option B is correct: after analysis, you identify strategies and solutions for resuming/continuing operations.

Option A (governance) is established earlier as part of setting up the BCMS framework. Option C is part of the analysis stage itself, not the next stage. Option D (operational plans) aligns more with Enabling Solutions (PP5), where solutions are implemented and supported by response structures and plans.

#### NEW QUESTION # 119

.....

The CBCI practice test is supported by all major browsers such as Chrome, IE, Firefox, Safari, and Opera. This Certificate of the Business Continuity Institute (CBCI) (CBCI) practice test consists of real Certificate of the Business Continuity Institute (CBCI) (CBCI) exam questions and thousands of customers have successfully cleared the CBCI Exam with confidence.
