

2026 300-745 Latest Test Online | High-quality 300-745 100% Free Practice Mock

C-SERP **MINISTRY OF THE INTERIOR**

CENTRALIZED SERVICES E-RECRUITMENT PORTAL 2025/26

SUBJECT: PUBLICATION OF APTITUDE TEST RESULTS

All applicants are to note that, from **Wednesday, 4th March 2026**, the **results and qualification status** of all applicants who took the online test will be published on the applicant portal in the underlisted order. Successful applicants will be able to proceed to the **Medical Screening** phase of the recruitment process, which will be **conducted only once** for qualifying applicants irrespective of the number of Agencies the applicant applied to. The dates for the publication of results per applicant category are as follows:

- **Category A - 4th & 5th March 2026.**
- **Category B - 6th & 7th March 2026.**
- **Category C - 8th & 9th March 2026.**

All applicants who pass the Aptitude Test are to prepare themselves for the Medical Screening Phase starting on **Mon, 16th March 2026** at the various screening regions selected by applicants during the online application phase.

GHANA POLICE SERVICE **GHANA PRISONS SERVICE** **GHANA NATIONAL FIRE SERVICE** **GHANA IMMIGRATION SERVICE**

P.S. Free 2026 Cisco 300-745 dumps are available on Google Drive shared by TestsDumps: <https://drive.google.com/open?id=1L3i1APuMbZ0eLh3nZrYjb0iJIAq6aTeu>

Practice tests for 300-745 Pdf Dumps are best for self-assessment. This helps improve errors and strengthen preparation. The practice test is among the most beneficial features offered by TestsDumps to make sure that applicants are successful. It is advised to attempt the test multiple times. Every time you attempt the test, you'll be provided with a thorough result report which can help you be able to keep track of your work without any difficulty.

When some candidates trying to overcome an exam, they will all first think of choosing a good study material to prepare for their exam. The Designing Cisco Security Infrastructure prep torrent has a variety of self-learning and self-assessment functions to test learning outcome, which will help you increase confidence to pass exam. Last but not least, our website platform has no viruses and you can download 300-745 Test Guide at ease. If you encounter difficulties in installation or use of 300-745 exam torrent, we will provide you with remote assistance from a dedicated expert to help you and provide 365 days of free updates that you do not have to worry about what you missed.

Updated 300-745 Latest Test Online & Leading Offer in Qualification Exams & Verified 300-745 Practice Mock

In fact, in real life, we often use performance of high and low to measure a person's level of high or low, when we choose to find a good job, there is important to get the 300-745 certification as you can. Our product is elaborately composed with major questions and answers. We are choosing the key from past materials to finish our 300-745 Guide question. It only takes you 20 hours to 30 hours to do the practice. After your effective practice, you can master the examination point from the 300-745 test question. Then, you will have enough confidence to pass it.

Cisco 300-745 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Secure Infrastructure: Covers selecting security approaches for endpoints, identities, email, and modern environments like hybrid work, IoT, SaaS, and multi-cloud. Includes choosing VPN tunneling solutions, securing management planes, and selecting the appropriate firewall architecture based on business needs.
Topic 2	<ul style="list-style-type: none">Artificial Intelligence, Automation, and DevSecOps: Explores AI's role in securing network infrastructure, selecting tools for automated security architectures such as SOAR, IaC, and API tooling, and integrating security into DevSecOps workflows and pipelines to minimize deployment risk.
Topic 3	<ul style="list-style-type: none">Applications: Focuses on selecting security solutions to protect applications and designing secure architectures for cloud-native, containerized, and serverless environments using segmentation. Also addresses security design impacts of emerging technologies like AI, ML, and quantum computing.
Topic 4	<ul style="list-style-type: none">Risk, Events, and Requirements: Covers SOC incident handling and response tools, modifying security designs to mitigate or respond to incidents, and applying frameworks like MITRE CAPEC, NIST SP 800-37, and SAFE. Includes matching regulatory and compliance requirements to business scenarios.

Cisco Designing Cisco Security Infrastructure Sample Questions (Q40-Q45):

NEW QUESTION # 40

Refer to the exhibit.

In addition to SSL decryption, which firewall feature allows malware to be blocked?

- A. URL Filtering
- B. DLP
- C. File Inspection
- D. SSL Offloading

Answer: C

Explanation:

Based on the provided exhibits, the correct firewall feature for blocking malware in this context is File Inspection.

In image_4c047c.png, we see a Cisco Secure Firewall Access Control Policy rule named "Default Inspect".

This rule is configured to allow traffic from the "inside" zone to the "outside" zone while applying deep packet inspection. Crucially, the configuration includes a File Policy field, which is the mechanism used to perform malware analysis and file disposition lookups. By associating a File Policy with an Access Control rule, the firewall can inspect files as they transit the network, calculate their SHA-256 hash, and query the Cisco Collective Security Intelligence cloud to determine if the file is malicious, clean, or unknown.

The evidence of this feature in action is found in image_4b1ebe.png, which shows the Cisco Secure Endpoint (formerly AMP for

Endpoints) Device Trajectory. The "Activity Details" pane specifically identifies a malicious file (iodnxvg.exe) categorized

as W32.DFC.MalParent. While the log notes the file was not quarantined because it was in "audit only mode," the underlying

technology performing the detection is File Inspection. This feature provides the necessary visibility into the contents of encrypted or unencrypted data streams to identify and—when properly configured in a "Protect" or "Block" mode—stop the execution of malware.

This aligns with the Cisco SDSI objective of building a layered defense that combines perimeter traffic control with granular file-level security.

NEW QUESTION # 41

A global hotel chain is using Cisco ISE and Cisco switches to manage the network. The hotel company wants to enhance network security by segmenting users and endpoints. The company must ensure that devices within the same VLAN cannot communicate with each other. The goal is to prevent cross-communication without the use of dynamic access control lists. Which action must be taken using Cisco ISE to meet the requirement?

- A. **Configure TrustSec.**
- B. Enable identity groups.
- C. Set up endpoint profiling.
- D. Implement device posturing.

Answer: A

Explanation:

Cisco TrustSec provides software-defined segmentation by assigning Security Group Tags (SGTs) to users and devices. This allows policy enforcement that prevents communication between devices in the same VLAN without needing dynamic ACLs. It is the correct approach to achieve secure segmentation in this scenario.

NEW QUESTION # 42

A logistics company wants to deploy an application in the cloud using cloud native techniques.

The company must ensure that the development, testing, and production environments are as identical as possible with the lowest risk of the development and testing environments impacting production. Which solution must be used to accomplish the task?

- A. service quotas
- B. network access control list
- C. lambda functions
- D. **separate cloud accounts**

Answer: D

Explanation:

Using separate cloud accounts for development, testing, and production ensures strong isolation between environments. This prevents accidental impact on production while maintaining consistent, cloud-native deployments across all stages with minimal risk.

NEW QUESTION # 43

A company recently discovered that a former employee, who left to join a competitor, continued to access and exfiltrate sensitive data over several weeks after leaving. The breach highlighted vulnerabilities in the organization's data security and access management practices. To prevent such incidents in the future, the organization must adopt measures that detect and restrict unauthorized data access and transfer. Which mitigation strategy must be implemented to address the issue?

- A. Upgrade network policy access.
- B. Implement web application firewall.
- C. **Implement data loss prevention strategy.**
- D. Deploy audit logging and monitoring solution.

Answer: C

Explanation:

The scenario describes a typical "insider threat" involving data exfiltration. While the initial failure was likely in the off-boarding process (Identity Management), the technical control required to specifically "detect and restrict unauthorized data access and transfer" is a Data Loss Prevention (DLP) strategy. DLP solutions are designed to monitor, detect, and block sensitive data from leaving the organization's control.

A robust DLP strategy-integrated across Cisco platforms like Email Security (ESA), Web Security (WSA), and Cisco Umbrella-works by identifying sensitive content (such as customer lists, proprietary code, or financial data) using techniques like fingerprinting or keyword matching. If an unauthorized attempt is made to upload this data to a personal cloud drive or send it via email, the DLP engine intercepts and blocks the transfer. While Audit Logging (Option D) is essential for forensic investigation after the fact, it does not "restrict" the transfer in real-time. WAFs (Option A) protect against external attacks on web servers, and Network Policies (Option B) control traffic flow but generally lack the content-awareness required to identify sensitive business data. Implementing DLP ensures that the organization's intellectual property remains protected even if an account remains active or a user has legitimate

network access.

NEW QUESTION # 44

After a recent security breach, a financial company is reassessing their overall security posture and strategy to better protect sensitive data and resources. The company already deployed on-premises next-generation firewalls at the network edge for each branch location. Security measures must be enhanced at the endpoint level. The goal is to implement a solution that provides additional traffic filtering directly on endpoint devices, thereby offering another layer of defense against potential threats. Which technology must be implemented to meet the requirement?

- A. traditional firewall
- B. distributed firewall
- C. web application firewall
- D. host-based firewall

Answer: D

Explanation:

A host-based firewall runs directly on endpoint devices, providing traffic filtering and protection at the endpoint level. This adds another layer of defense beyond the network edge firewalls, ensuring threats are mitigated closer to where sensitive data resides.

NEW QUESTION # 45

.....

We all know that pass the 300-745 exam will bring us many benefits, but it is not easy for every candidate to achieve it. The 300-745 guide torrent is a tool that aimed to help every candidate to pass the exam. Our exam materials can installation and download set no limits for the amount of the computers and persons. We guarantee you that the 300-745 study materials we provide to you are useful and can help you pass the test. Once you buy the product you can use the convenient method to learn the 300-745 Exam Torrent at any time and place. So please take it easy before and after the purchase and trust that our 300-745 study materials carry no virus. To let you be familiar with our product, we list the features and advantages of the 300-745 study materials as follow.
