

JN0-363 Reliable Exam Pdf | Latest Juniper Valid Test

JN0-363 Testking: Service Provider Routing and Switching, Specialist (JNCIS-SP)

XACTIMATE LEVEL 2 (LV2) PRACTICE QUESTIONS GRADE BOOSTER 2026 REVISED EXAM

Question 1

A room measures 14' × 16' with 8' walls. No openings.
What is the **total wall surface area**?

- Perimeter = $(14 + 16) \times 2 = 60$ ft
- Wall area = 60×8

A. 420 SF
B. 448 SF
C. 480 SF
D. 512 SF

✔ Answer: C (480 SF)

Question 2

A room is 12' × 15'. What is the **floor area**?

A. 150 SF
B. 180 SF
C. 195 SF
D. 210 SF

✔ Answer: B (180 SF)

Question 3

What does a **7/12 roof pitch** mean?

- A. Roof rises 12 inches for every 7 inches horizontally
B. Roof rises 7 inches for every 12 inches horizontally

I think our JN0-363 test torrent will be a better choice for you than other study materials. We all know that most candidates will worry about the quality of our product, In order to guarantee quality of our study materials, all workers of our company are working together, just for a common goal, to produce a high-quality product; it is our JN0-363 Exam Questions. If you purchase our JN0-363 guide torrent, we can guarantee that we will provide you with quality products, reasonable price and professional after sales service.

The JN0-363 Exam covers a range of topics, including OSPF, BGP, MPLS, Layer 2 VPNs, and Layer 3 VPNs. JN0-363 exam also tests the candidate's knowledge of Juniper Networks equipment, including routers and switches. Candidates must have a strong understanding of these topics in order to pass the exam and earn their certification.

Juniper Service Provider Routing and Switching, Specialist (JNCIS-SP) Sample Questions (Q52-Q57):

NEW QUESTION # 52

Which statement is correct about the FE80::/10 prefix?

- A. This prefix range is not reserved.
- **B. This prefix range is used for the link local address.**
- C. This prefix range is used on the loopback interface.
- D. This prefix range is reserved for multicast applications

Answer: B

NEW QUESTION # 53

Click the Exhibit button.

```
[edit routing-options]
user@router# show
generate {
    defaults {
        preference 5;
    }
    route 0.0.0.0/0 policy ISP-NET;
}
```

```
[edit]
user@router# show policy-options
policy-statement ISP-NET {
    term 1 {
        from protocol bgp;
        then accept;
    }
    term 2 {
        then reject;
    }
}
```

Referring to the exhibit, which two statements are correct? (Choose two.)

- **A. The router will remove the 0.0.0.0/0 route from the routing table when no BGP prefixes are present**
- B. The router will remove the 0.0.0.0/0 route from the routing table when any BGP prefixes are present
- C. The router will install the 0.0.0.0/0 route into the routing table when no BGP prefixes are present
- **D. The router will install the 0.0.0.0/0 route into the routing table when any BGP prefixes are present**

Answer: A,D

NEW QUESTION # 54

Exhibit

Routers R1 and R4 have a VRRP priority of 90, while R2 and R3 have default VRRP priorities. Referring to the exhibit, which router will be elected as the primary VRRP router?

- A. R2
- B. R4
- C. R3
- **D. R1**

Answer: D

NEW QUESTION # 55

Exhibit

The screenshot shows the output of the 'show vrrp summary' command on two routers, R1 and R2. Both routers show the VRRP group as 'master' and 'Active'.

Interface	State	Group	VR state	VR Mode	Type	Address
ge-0/0/4.0	up	10	master	Active	lcl	172.25.100.2
					vip	172.25.100.1

Interface	State	Group	VR state	VR Mode	Type	Address
ge-0/0/4.0	up	10	master	Active	lcl	172.25.100.3
					vip	172.25.100.1

Referring to the exhibit, which statement is true about VRRP?

- A. The routers should use different virtual IP addresses for VRRP to function correctly.
- B. Both routers are in the same state because they have the same VRRP priority.
- **C. VRRP is functioning normally in active/active mode.**
- D. VRRP communication between the two devices is not functioning correctly.

Answer: C

Explanation:

The exhibit shows the show vrrp summary output from two routers, with both routers listing the state of their VRRP group as master.

VRRP allows for multiple routers to share a virtual IP address and a virtual MAC address, but usually, only one router is the master at any given time while others are in backup state. However, in some configurations, VRRP can operate in an active/active mode where multiple routers handle traffic simultaneously for load sharing. Since both routers show the state as master and there is no evidence of misconfiguration in the virtual IP addresses or priority, it indicates that VRRP is likely functioning in an active/active setup.

NEW QUESTION # 56

You are implementing traffic engineering in your MPLS network. You must ensure that the MPLS routes are used to traverse your network. Your solution should not affect IGP routes in your route tables.

In this scenario, which traffic engineering setting will accomplish this behavior?

- A. `bgp-igp-both-ribs`
- B. `mpls-forwarding`
- C. `bgp`
- D. `bgp-igp`

Answer: C

Explanation:

`bgp`-On BGP destinations only. Ingress routes are installed in the `inet.3` routing table.

`bgp-igp`-On both BGP and IGP destinations. Ingress routes are installed in the `inet.0` routing table. If IGP shortcuts are enabled, the shortcut routes are automatically installed in the `inet.0` routing table.

`bgp-igp-both-ribs`-On both BGP and IGP destinations. Ingress routes are installed in the `inet.0` and `inet.3` routing tables. This option is used to support VPNs.

`mpls-forwarding`-On both BGP and IGP destinations. Use ingress routes for forwarding only, not for routing.

NEW QUESTION # 57

.....

Our JN0-363 training dumps are deemed as a highly genius invention so all exam candidates who choose our JN0-363 exam questions have analogous feeling that high quality our practice materials is different from other practice materials in the market. So our JN0-363 study braindumps are a valuable invest which cost only tens of dollars but will bring you permanent reward. So many our customers have benefited from our JN0-363 preparation quiz, so will you!
