

Latest DP-203 Practice Questions & Exam DP-203 Objectives Pdf

Answer Area

2026 Latest TestBraindump DP-203 PDF Dumps and DP-203 Exam Engine Free Share: https://drive.google.com/open?id=1DotOlv595qIwiEhccyF2eIR9X_SUEUOR

The test material sorts out the speculations and genuine factors in any case in the event that you truly need a specific limit, you want to deal with the applications or live undertakings for better execution in the Data Engineering on Microsoft Azure (DP-203) exam. You will get unprecedented information about the subject and work on it impeccably for the Microsoft DP-203 dumps.

One of the best features of Microsoft DP-203 exam dumps is its Data Engineering on Microsoft Azure exam passing a money-back guarantee. Now with TestBraindump DP-203 exam dumps your investment is secured with a money-back guarantee. If you fail in Microsoft DP-203 Exam despite using TestBraindump Exam Questions you can claim your paid amount.

Reliable Latest DP-203 Practice Questions - Pass DP-203 Once - Well-Prepared Exam DP-203 Objectives Pdf

We offer three different formats for preparing for the Data Engineering on Microsoft Azure (DP-203) exam questions, all of which will ensure your definite success on your Data Engineering on Microsoft Azure (DP-203) exam dumps. TestBraindump is there with updated DP-203 Questions so you can pass the Data Engineering on Microsoft Azure (DP-203) exam and move toward the new era of technology with full ease and confidence.

Microsoft Data Engineering on Microsoft Azure Sample Questions (Q240-Q245):

NEW QUESTION # 240

You are building a database in an Azure Synapse Analytics serverless SQL pool.

You have data stored in Parquet files in an Azure Data Lake Storage Gen2 container.

Records are structured as shown in the following sample.

```
{  
  "id": 123,  
  "address_housenumber": "19c",  
  "address_line": "Memory Lane",  
  "applicant1_name": "Jane",  
  "applicant2_name": "Dev"  
}
```

The records contain two applicants at most.

You need to build a table that includes only the address fields.

How should you complete the Transact-SQL statement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: CREATE EXTERNAL TABLE

An external table points to data located in Hadoop, Azure Storage blob, or Azure Data Lake Storage. External tables are used to read data from files or write data to files in Azure Storage. With Synapse SQL, you can use external tables to read external data using dedicated SQL pool or serverless SQL pool.

Syntax:

```
CREATE EXTERNAL TABLE { database_name.schema_name.table_name | schema_name.table_name | table_name } ( <column_definition> [ ...n ] ) WITH ( LOCATION = 'folder_or_filepath', DATA_SOURCE = external_data_source_name, FILE_FORMAT = external_file_format_name )
```

Box 2. OPENROWSET When using serverless SQL pool, CETAS is used to create an external table and export query results to Azure Storage Blob or Azure Data Lake Storage Gen2.

Example:

AS

```
SELECT decennialTime, stateName, SUM(population) AS population
FROM
OPENROWSET(BULK 'https://azureopendatastorage.blob.core.windows.net/censusdatacontainer/release
/us_population_county/year=**/*.parquet',
FORMAT=PARQUET) AS [r]
GROUP BY decennialTime, stateName
GO
```

NEW QUESTION # 241

You are designing a folder structure for the files in an Azure Data Lake Storage Gen2 account. The account has one container that contains three years of data.

You need to recommend a folder structure that meets the following requirements:

- * Supports partition elimination for queries by Azure Synapse Analytics serverless SQL pool
- * Supports fast data retrieval for data from the current month
- * Simplifies data security management by department

Which folder structure should you recommend?

- A. \DataSource\Department\YYYYMM\DataFile_YYYYMMDD.parquet
- B. \DD\MM\YYYY\Department\DataSource\DataFile_DDMMYY.parquet
- C. \YY\MM\DD\Department\DataSource\DataFile_YYMMDD.parquet
- D. \Depdftment\DataSource\YYYYMM\DataFile_YYYYMMDD.parquet

Answer: B

NEW QUESTION # 242

You have a Microsoft SQL Server database that uses a third normal form schema.

You plan to migrate the data in the database to a star schema in an Azure Synapse Analytics dedicated SQL pool.

You need to design the dimension tables. The solution must optimize read operations.

What should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Text, table Description automatically generated

Box 1: Denormalize to a second normal form

Denormalization is the process of transforming higher normal forms to lower normal forms via storing the join of higher normal form relations as a base relation. Denormalization increases the performance in data retrieval at cost of bringing update anomalies to a database.

Box 2: New identity columns

The collapsing relations strategy can be used in this step to collapse classification entities into component entities to obtain at dimension tables with single-part keys that connect directly to the fact table. The single-part key is a surrogate key generated to ensure it remains unique over time.

Example:

Diagram Description automatically generated

Note: A surrogate key on a table is a column with a unique identifier for each row. The key is not generated from the table data. Data modelers like to create surrogate keys on their tables when they design data warehouse models. You can use the IDENTITY property to achieve this goal simply and effectively without affecting load performance.

<https://www.mssqltips.com/sqlservertip/5614/explore-the-role-of-normal-forms-in-dimensional-modeling/>

<https://docs.microsoft.com/en-us/azure/synapse-analytics/sql-data-warehouse/sql-data-warehouse-tables-identity>

NEW QUESTION # 243

You build an Azure Data Factory pipeline to move data from an Azure Data Lake Storage Gen2 container to a database in an Azure Synapse Analytics dedicated SQL pool.

Data in the container is stored in the following folder structure.

/in/{YYYY}/{MM}/{DD}/{HH}/{mm}

The earliest folder is /in/2021/01/01/00/00. The latest folder is /in/2021/01/15/01/45.

You need to configure a pipeline trigger to meet the following requirements:

Existing data must be loaded.

Data must be loaded every 30 minutes.

Late-arriving data of up to two minutes must be included in the load for the time at which the data should have arrived.

How should you configure the pipeline trigger? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/data-factory/how-to-create-tumbling-window-trigger>

NEW QUESTION # 244

You have an Azure Data Factory instance that contains two pipelines named Pipeline1 and Pipeline2.

Pipeline1 has the activities shown in the following exhibit.

Pipeline2 has the activities shown in the following exhibit.

You execute Pipeline2, and Stored procedure1 in Pipeline1 fails.

What is the status of the pipeline runs?

- A. Pipeline1 and Pipeline2 failed.
- B. Pipeline1 and Pipeline2 succeeded.
- C. Pipeline1 failed and Pipeline2 succeeded.
- D. Pipeline1 succeeded and Pipeline2 failed.

Answer: B

Explanation:

Activities are linked together via dependencies. A dependency has a condition of one of the following:

Succeeded, Failed, Skipped, or Completed.

Consider Pipeline1:

If we have a pipeline with two activities where Activity2 has a failure dependency on Activity1, the pipeline will not fail just because Activity1 failed. If Activity1 fails and Activity2 succeeds, the pipeline will succeed.

This scenario is treated as a try-catch block by Data Factory.

The failure dependency means this pipeline reports success.

Note:

If we have a pipeline containing Activity1 and Activity2, and Activity2 has a success dependency on Activity1, it will only execute if Activity1 is successful. In this scenario, if Activity1 fails, the pipeline will fail.

NEW QUESTION # 245

.....

The authority of Microsoft DP-203 exam questions rests on its being high-quality and prepared according to the latest pattern. TestBraindump is proud to announce that our Microsoft DP-203 Exam Dumps help the desiring candidates of Microsoft DP-203 certification to climb the ladder of success by grabbing the Microsoft Exam Questions.

Exam DP-203 Objectives Pdf: <https://www.testbraindump.com/DP-203-exam-prep.html>

By handpicking what the DP-203 study questions usually tested in exam and compile them into our DP-203 practice guide, they win wide acceptance with first-rank praise. Several Microsoft DP-203 exam candidates have already passed their Data Engineering on Microsoft Azure exam with good scores. Microsoft Latest DP-203 Practice Questions The APP online version, Microsoft Latest DP-203 Practice Questions You will have no regret spending your valuable time on our introduction.

Secondly, since our DP-203 training quiz appeared on the market, seldom do we have the cases of customer information disclosure. The greeting at this Website reflects the wisdom of extensive experience: People Latest DP-203 Practice Questions who write bad requirements should not be surprised when they get bad products, but they always are!

Pass-Sure Latest DP-203 Practice Questions – Find Shortcut to Pass DP-203 Exam

By handpicking what the DP-203 study questions usually tested in exam and compile them into our DP-203 practice guide, they win wide acceptance with first-rank praise.

Several Microsoft DP-203 exam candidates have already passed their Data Engineering on Microsoft Azure exam with good scores. The APP online version, You will have no regret spending your valuable time on our introduction.

After you visit the pages of our DP-203 test torrent on the websites, you can know the version of the product, the updated time, the quantity of the questions and answers, the characteristics DP-203 and merits of the Data Engineering on Microsoft Azure guide torrent, the price of the product and the discounts.
