

UiPath UiPath-TAEPv1 Free Practice Exams | UiPath-TAEPv1 Certification Practice

BONUS!!! Download part of Actual4Cert UiPath-TAEPv1 dumps for free: https://drive.google.com/open?id=1sNpXnjBj_VU2__yeDv7byuG2Qd9M-NrS

UiPath UiPath-TAEPv1 valid test cram will help you to get your UiPath-TAEPv1 certification. It will be a breeze to get your UiPath-TAEPv1 certification with the help of the Actual4Cert UiPath-TAEPv1 pdf vce. We will help whenever you need: 24*7 dedicated email and chat support are available. Besides, we ensure you a flawless shopping experience by Paypal. You can get passed by our latest & updated UiPath-TAEPv1 Preparation material.

All UiPath-TAEPv1 online tests begin somewhere, and that is what the UiPath-TAEPv1 training guide will do for you: create a foundation to build on. Study guides are essentially a detailed UiPath-TAEPv1 training guide and are great introductions to new UiPath-TAEPv1 training guide as you advance. The content is always relevant, and compound again to make you pass your UiPath-TAEPv1 exams on the first attempt.

UiPath-TAEPv1 Certification Practice - Exam UiPath-TAEPv1 Details

Everybody wants success, but not everyone has a strong mind to persevere in study. If you feel unsatisfied with your present status, our UiPath-TAEPv1 actual exam can help you out. Our UiPath-TAEPv1 exam questions always boast a pass rate as high as 99%.

Using our study materials can also save your time in the exam preparation. If you choose our UiPath-TAEPv1 Test Engine, you are going to get the certification easily. Just make your choice and purchase our UiPath-TAEPv1 study materials and start your study right now! Knowledge, achievement and happiness are waiting for you!

UiPath UiPath-TAEPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • UiPath Test Suite Architecture and API Integrations: This section of the exam measures the skills of Test Automation Engineers and covers the fundamental capabilities of UiPath Test Suite in automating different types of testing such as UI, API, and data-driven testing. It includes an overview of Test Suite tools and how they integrate with each other, as well as with third-party application lifecycle management (ALM) tools through APIs. Candidates are expected to understand API testing concepts and how external tools can be connected for requirement synchronization, defect management, and test case tracking.
Topic 2	<ul style="list-style-type: none"> • UiPath Test Suite – Orchestrator: This section of the exam measures the skills of Test Automation Engineers and covers how to manage test sets in UiPath Orchestrator. It includes creating, executing, scheduling, and deleting test sets, using test data queues, and analyzing results from the Test Execution page. It also discusses re-executing tests and linking test sets for better orchestration of test activities.
Topic 3	<ul style="list-style-type: none"> • Environments, Applications, and • or Tools: This section of the exam measures the skills of RPA Developers and evaluates comfort with various tools and environments commonly used with UiPath. These include Microsoft Excel, JSON, XML, ERPs, web elements, browsers, virtual machines, version control systems, and UiPath components such as Studio, Orchestrator, and Robots.
Topic 4	<ul style="list-style-type: none"> • UiPath Studio - Testing Panels and Templates: This section of the exam measures the skills of RPA Developers and focuses on how to work with testing panels in UiPath Studio. It includes how to create, import, and manage test cases, along with the use of Test Explorer for analyzing test outcomes. It also covers Descriptor and Activity Coverage panels used for examining object recognition and checking redundancy in test cases. The section further explains testing project templates, the Test Automation Framework, and how to customize execution and test case templates.
Topic 5	<ul style="list-style-type: none"> • CI • CD Implementation: This section of the exam measures the skills of RPA Developers and introduces the concepts of Continuous Integration and Continuous Delivery (CI • CD). It covers how to implement pipelines and perform tasks using the UiPath Command Line Interface (CLI) for streamlined and automated deployments of test workflows and processes.
Topic 6	<ul style="list-style-type: none"> • UiPath Studio - Test Activities and Workflow Best Practices: This section of the exam measures the skills of Test Automation Engineers and evaluates knowledge of using verification activities and test-specific functions within UiPath Studio. It involves working with test data generation, document attachments in test cases, and applying workflow analyzer rules for stable collaboration. It also includes mock testing to isolate test case components and ensure focused validations.
Topic 7	<ul style="list-style-type: none"> • UiPath Studio - Data-driven Testing: This section of the exam measures the skills of RPA Developers and centers around managing test data variations using data-driven testing approaches. It explains how to add test data through queues, activities, or data sources, and how to create reusable test cases based on this data. The section also highlights connecting UiPath Studio projects to Test Manager to enhance traceability and visibility of test progress.
Topic 8	<ul style="list-style-type: none"> • UiPath Test Manager: This section of the exam measures the skills of Test Automation Engineers and focuses on using UiPath Test Manager for managing test lifecycles. It includes actions like defining custom fields, managing access, importing • exporting projects, and documenting manual steps using UiPath Task Capture. It also explains how to analyze test results, handle execution re-runs, manage KPIs, and create defects for failed test cases, along with troubleshooting common errors.:

UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q93-Q98):

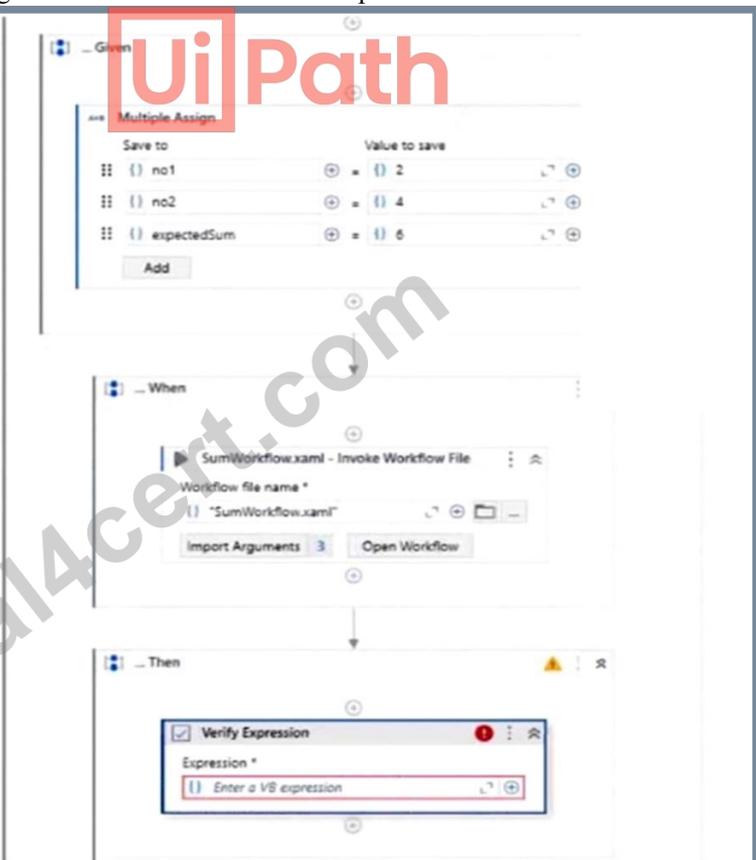

NEW QUESTION # 93

Given the following SumWorkflow:

Name	Direction	Argument type
sum	Out	Int32
no1	In	Int32
no2	In	Int32

What is the appropriate verification required for testing that the SumWorkflow works as expected?

Name	Variable type	Scope
no1	Int32	TestCase_SumWorkflow
no2	Int32	TestCase_SumWorkflow
sum	Int32	TestCase_SumWorkflow
expectedSum	Int32	TestCase_SumWorkflow

- A. "sum = expectedSum"
- B. sum
- C. sum.Equals(expectedSum)
- D. no1 + no2 = expectedSum

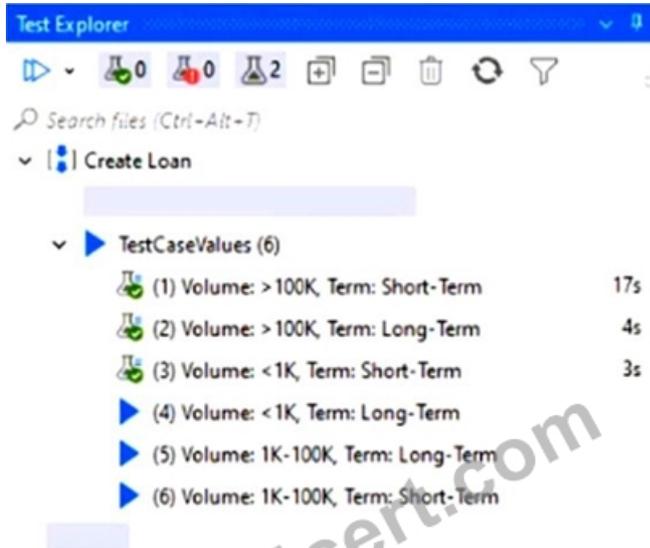

Answer: A

Explanation:

The correct VB expression to verify that the SumWorkflow executed correctly is `sum = expectedSum`. This compares the actual output (sum) with the expected value (expectedSum) set earlier in the test case. If they match, the workflow performs as intended.

NEW QUESTION # 94

What conclusions can be drawn from the exhibit?

UiPath

Test Results

Test Summary

Total: 6
Passed: 3
Failed: 0

- A. It's an automated test case with 8 variations.
- **B. It's a data-driven test case with 6 variations, 3 variations were run and 3 not yet run.**
- C. It's a data-driven test case with 3 variations, 3 variations were run and 3 not yet run.
- D. It's a data-driven test case with 2 variations, 2 variations were run and 2 not yet run.

Answer: B

Explanation:

The Test Explorer shows a data-driven test case named "Create Loan" with 6 variations under TestCaseValues. Out of these, 3 have green flask icons (indicating they were run and passed), while 3 have blue play icons (indicating they have not yet been executed).

NEW QUESTION # 95

Where can the variations that have passed or failed for a data-driven test case in UiPath Studio be viewed?

- A. In the Assertions tab of the corresponding test case result.
- **B. On the individual test case data variations in the Test Results panel.**

- C. In the Test Manager configuration.
- D. On the parent test cases in the Test Results panel.

Answer: B

Explanation:

In UiPath Studio, the Test Results panel displays the outcome of individual data variations for a data-driven test case. This allows users to see exactly which data inputs passed or failed during execution.

NEW QUESTION # 96

What factors influence the calculation of coverage in the Descriptor Coverage feature in UiPath?

- A. The number of selectors that have been manually verified.
- B. The total number of selectors in a test case execution.
- **C. The number of times a selector has been successfully executed.**
- D. The total number of selectors available in the Object Repository.

Answer: C

NEW QUESTION # 97

How does the licensing model work for Testing runtimes in UiPath?

- **A. It counts the maximum number of Testing robots that are able to execute tests simultaneously, given by the total number of runtimes allocated to all the online machines.**
- B. It counts the individual testing robots on a machine and assigns each of them an equal number of licenses.
- C. It works by allocating a fixed number of licenses per testing robot, regardless of the maximum number that can execute tests simultaneously.
- D. It counts the total number of licenses available and divides them amongst the Testing robots.

Answer: A

Explanation:

The licensing model for Testing runtimes in UiPath is based on the maximum number of Testing robots that can execute tests simultaneously, which is determined by the total number of runtimes allocated to all online machines. This ensures efficient utilization of available resources.

NEW QUESTION # 98

.....

The Actual4Cert guarantees their customers that if they have prepared with UiPath UiPath-TAEPv1 practice test, they can pass the UiPath UiPath-TAEPv1 certification easily. If the applicants fail to do it, they can claim their payment back according to the terms and conditions. Many candidates have prepared from the actual UiPath UiPath-TAEPv1 Practice Questions and rated them as the best to study for the examination and pass it in a single try with the best score.
