SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q76-Q81):

NEW QUESTION # 76

What scenario can be controlled with separate storage locations for sales and for production?

- A. Distinguish material that is still in inbound processing from material that has reached the final bins
- B. Distinguish material quantities that are assigned to a sales order
- C. Distinguish material that is supplied for production from material which is available for sales
- D. Distinguish material that is in goods receipt from production vs in goods receipt from external vendors

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Separate storage locations in SAP EWM (mapped from ERP) manage stock purposes. Option D ("Distinguish material that is supplied for production from material which is available for sales") is correct because storage locations can segregate production stock (e.g., "PROD") from sales stock (e.g., "SALE"), configured via warehouse number mapping in SPRO: SCM Extended Warehouse Management > Interfaces > ERP Integration. Options A, B, and C are managed by stock types or processes, not storage locations.

NEW QUESTION # 77

Which of the following is a prerequisite for assigning a warehouse order to a resource automatically?

- A. The resource group of the resource must be assigned to the warehouse order creation rule.
- B. The creation of a pick-handling unit must be done automatically with a packaging specification.
- C. The warehouse order must be in a queue that is assigned to the resource either directly or through a resource group.
- D. The warehouse order must be picked from the same activity area that is assigned to the resource.

Answer: D

NEW QUESTION # 78

You need to create warehouse tasks for putaway. Which SAP Extended Warehouse Management document do you use as your reference document?

- A. Inbound delivery
- B. Posting change request
- C. Inbound delivery notification
- D. Expected goods receipt

Answer: A

NEW QUESTION # 79

Which standard functions can be executed in the background when you enter an exception code in a radio frequency (RF) transaction? Note: There are 3 correct answers to this question.

- A. Cancel physical inventory document
- B. Generate workflow process
- C. Block a bin
- D. Trigger replenishment
- E. Confirm warehouse order

Answer: B,C,D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Exception codes in RF transactions (e.g., /SCWM/RFUI) trigger background actions. Option B ("Trigger replenishment") is correct as it can initiate stock replenishment, configured in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Exception Handling. Option C ("Block a bin") is correct because it can lock a bin due to issues. Option E ("Generate workflow process") is correct as it can start a workflow for resolution. Option A (cancel PI document) and D (confirm order) are not standard background functions for exception codes.

NEW QUESTION # 80

Which of the following can be elements of an inspection rule? Note: There are 2 correct answers to this question.

- A. Work center
- B. Inspection procedure
- C. Sample drawing procedure
- D. EWM stock type

Answer: B,C

NEW QUESTION # 81

.....
