問題 #41

A Salesforce associate wants to add a new related list of cases to the Account. Where should the associate go to add the related list to Account?

- A. Case Record page
- **B. Page Layout**
- C. Account Record page

答案: B

解題說明:

The related list of cases can be added to the account page layout, which determines the fields, buttons, and related lists that users see when they view an account record.

問題 #42

A Salesforce associate is using Global Search to find a record but does not remember the name of the record they want to find. What should the associate use to search for the record?

- A. Object Manager
- **B. Wildcards and operators**
- C. List view for each object

答案: B

解題說明:

Wildcards and operators are symbols that can be used to search for records when the name of the record is not known. For example, the asterisk (*) can be used to match any string of characters, and the AND operator can be used to combine multiple terms.

問題 #43

Get Cloudy Consulting wants to group its contacts by Region for reporting. What data type should the Salesforce associate recommend for this new Region field?

- A. Multi-select picklist
- B. Text
- **C. Picklist**

答案: C

解題說明:

When grouping contacts by a specific category like Region for reporting, the recommended data type is a Picklist. Picklists ensure data consistency by restricting input to predefined values, making it easier to categorize and analyze data in reports.

* A. Multi-select picklist: While this allows multiple values for a single record, it complicates reporting and grouping.

* C. Text: A text field lacks standardized input, increasing the risk of inconsistent data and reporting challenges.

References from Salesforce Documentation:

* Custom Field Types

* Picklists in Reports

問題 #44

Refer to the image below:

□ A Salesforce associate reviews a report that shows more information than they need. The associated see individual records but only

wants to see the Record Count.

Which switches should the associate toggle to only show the Record Count?

- A. Row Counts and Grand Total
- B. Subtotals and Detail Rows
- C. Grand Total and Subtotals

答案： A

解題說明：

The switches that the associate should toggle to only show the Record Count are Row Counts and Grand Total. Row Counts is a switch that shows the number of rows in the report, which is the same as the number of records. Grand Total is a switch that shows the sum, average, minimum, maximum, or other aggregate functions of a numeric field in the report. By toggling these two switches on and the other two switches off, the associate can see the Record Count and the Grand Total of the report, without seeing the individual records or the subtotals. Subtotals and Detail Rows are switches that show the breakdown and the details of the records in the report, which are not needed for the Record Count.
