1Z0-1061-24熱門證照 - 最新1Z0-1061-24考證

我們KaoGuTi是一個優秀的IT認證資訊來源，在KaoGuTi裏，你可以找到為你認證考試的學習技巧以及學習材料，我們KaoGuTi Oracle的1Z0-1061-24考試培訓資料是由經驗豐富和擁有長期學生經驗和他們的要求的IT專業人士研究出來的培訓資料，內容精確性和邏輯性特別強，遇到KaoGuTi，你將遇到最好的培訓資料，放心使用我們的KaoGuTi Oracle的1Z0-1061-24考試培訓資料，有了它你就已經做好了充分的準備來迎接這個認證考試。

最新的 Fusion Sales 1Z0-1061-24 免費考試真題 (Q175-Q180):

問題 #175

Which feature in Oracle Profitability and Cost Management Cloud Service allows you to integrate with external systems?

- A. Data Management
- **B. Integration Cloud Service**
- C. Smart View

- D. Strategic Modeling

答案： B

解題說明：

Option 1: Incorrect. Data Management is used for managing dimensions and mappings, not for integration with external systems. Option 2: Correct. Integration Cloud Service provides a platform for integrating Oracle Profitability and Cost Management Cloud Service with other systems. Option 3: Incorrect. Strategic Modeling is used for strategic modeling and analysis, not for integration with external systems. Option 4: Incorrect. Smart View is used for ad hoc analysis and reporting, not for integration with external systems.

問題 #176

In Oracle Profitability and Cost Management Cloud Service, what is the difference between a Direct Allocation and a Sequential Less-Than Allocation?

- A. A Direct Allocation distributes the total amount of cost entered for a source entity based on a driver while a Sequential Less-Than Allocation sequentially distributes costs to the target entities in sequence subject to the condition that any target entity's allocation is less than the remaining costs to allocate.
- B. A Direct Allocation evenly distributes the total amount of cost entered for a source entity among all the target entities while a Sequential Less-Than Allocation distributes costs to the target entities in sequence subject to the condition that any target entity's allocation is less than the remaining costs to allocate.
- C. A Direct Allocation sequentially distributes the total amount of cost entered for a source entity among all the target entities while a Sequential Less-Than Allocation distributes costs to the target entities in sequence subject to the condition that any target entity's allocation is less than the remaining costs to allocate.
- D. A Direct Allocation sequentially distributes the total amount of cost entered for a source entity among all the target entities while a Sequential Less-Than Allocation distributes costs to the target entities in the order specified by the user.

答案： B

解題說明：

Option 1: The correct answer is A Direct Allocation, also known as a straight-line allocation, is the simplest method and is used when there is no preference for one allocation over another. It evenly distributes the total amount of cost entered for a source entity among all the target entities. On the other hand, a Sequential Less-Than Allocation is used when there are distribution preferences that want to be reflected in the allocation calculation. It distributes costs to the target entities in sequence subject to the condition that any target entity's allocation is less than the remaining costs to allocate. Option 2: This answer is incorrect because it describes the process of Sequential Less-Than Allocation correctly but the process of Direct Allocation is described incorrectly because it is not done sequentially. Option 3: This answer is incorrect because it describes the process of Direct Allocation incorrectly. Direct Allocation distributes the total amount of cost entered for a source entity based on a driver; therefore, it is not always evenly distributed among the target entities. Option 4: This answer is incorrect because it describes the process of Sequential Less-Than Allocation incorrectly. Sequential Less-Than Allocation is done with sequence in mind, which is specified by the user, so it is not always done in the order in which the cost was entered.

問題 #177

In Oracle Profitability and Cost Management Cloud Service, what are the two types of rules that can be created in a model?

- A. Allocation rules and consolidation rules
- B. Calculation rules and consolidation rules
- C. Mapping rules and allocation rules
- D. Calculation rules and mapping rules

答案： B

解題說明：

Option 1: This option is incorrect because there is no such thing as mapping rules in a model. Calculation rules are valid, but the second type of rule is incorrect. Option 2: This option is correct because there are two types of rules that can be created in a model, which includes calculation rules and consolidation rules. Consolidation rules come into play when creating hierarchies or consolidation functions. Option 3: This option is incorrect because mapping rules are not a type of rule in a model, they are part of the import/export data process. Allocation rules are part of the rule creation process though. Option 4: This option is incorrect because allocation and consolidation rules are valid types of rules, but there is no such thing as mapping rules. consolidation rules are

valid types of rules, but there is no such thing as mapping rules. consolidation rules are valid types of rules, but there is no such thing as mapping rules.

問題 #178

Which of the following components make up the architecture of Oracle Profitability and Cost Management Cloud Service 2023?

- A. Calculation Manager
- B. Data Management
- C. Financial Close and Consolidation
- D. Business Intelligence

答案： D

解題說明：

Option 1: Incorrect. Data Management is a component of Oracle Profitability and Cost Management Cloud Service 2023, but it is not the only component. Option 2: Correct. Business Intelligence is one of the components that make up the architecture of Oracle Profitability and Cost Management Cloud Service 2023. It provides reporting and analysis capabilities. Option 3: Incorrect. Calculation Manager is a component of Oracle Profitability and Cost Management Cloud Service 2023, but it is not the only component. Option 4: Incorrect. Financial Close and Consolidation is a component of Oracle Profitability and Cost Management Cloud Service 2023, but it is not the only component.

問題 #179

Which of the following options is the best way to create a hierarchy of accounts and cost centers in Oracle Profitability and Cost Management Cloud Service 2023?

- A. Create separate Dimensions for accounts and cost centers, then create an Application that combines them into a single hierarchy
- B. Create a Dimension library that combines the accounts and cost centers into a single hierarchy
- C. Create separate Applications for accounts and cost centers, then create a Calculation Manager rule that combines them into a single hierarchy
- D. Create a single Dimension for either accounts or cost centers, then use formula logic to roll up the hierarchy

答案： A

解題說明：

Option 1: This option is incorrect because creating a Dimension library will not allow you to combine accounts and cost centers into a single hierarchy. A Dimension library is simply a collection of Dimensions that can be reused across multiple Applications. Option 2: This option is correct. Creating separate Dimensions for accounts and cost centers, then combining them into a single hierarchy within an Application is the best way to create a hierarchy of accounts and cost centers. This allows you to maintain separate hierarchies for each dimension while still being able to combine them into a single hierarchy in the Application. Option 3: This option is incorrect because creating a single Dimension for either accounts or cost centers and using formula logic to roll up the hierarchy will not allow you to combine both dimensions into a single hierarchy. This option also requires more complex formula logic to be created for the roll-up. Option 4: This option is incorrect because creating separate Applications for accounts and cost centers and then combining them into a single hierarchy using Calculation Manager is not the best way to create a hierarchy of accounts and cost centers. This option requires more work to maintain the separate Applications and the Calculation Manager rule increases complexity.

問題 #180

.....

許多考生花費了大量的時間和精力學習Oracle 1Z0-1061-24考試相關知識，但是到最後卻沒有成功，分析他們失敗的原因，我們得出結論是沒有針對性的復習。現在，KaoGuTi專門針對認證考試研發出有針對性的Oracle 1Z0-1061-24考古題，為考生獲得認證節約更多的時間和金錢。1Z0-1061-24題庫的高效率和準確性兩大特點讓我們收到廣大考生的好評，獲得如此有價值的認證方案對您來說是非常划算的。

1Z0-1061-24熱門證照: https://www.kaoguti.com/1Z0-1061-24_exam-pdf.html

想通過學習Oracle的1Z0-1061-24認證考試的相關知識來提高自己的技能，讓別人更加認可你嗎，所以你要是參加

Oracle 1Z0-1061-24 認證考試並且選擇我們的KaoGuTi, KaoGuTi不僅可以保證為你提供一份覆蓋面很廣和品質很好的考試資料來讓您做好準備來面對這個非常專業的考試, 而且幫你順利通過Oracle 1Z0-1061-24 認證考試拿到認證證書, 值得信賴的 1Z0-1061-24熱門證照 - Oracle CX Sales 2024 Implementation Professional 考古題, 不通過, 全額退款, KaoGuTi 1Z0-1061-24熱門證照實行“無效即退還購買費用”承諾, 為什麼KaoGuTi 1Z0-1061-24熱門證照能得到大家的信任呢?
