Salesforce is known for its rigorous certification programs, which are highly respected in the industry. The company provides a variety of resources to help candidates prepare for the exam, including online training modules, study guides, and practice exams.

Salesforce Health Cloud Accredited Professional Sample Questions (Q110-Q115):

NEW QUESTION # 110

While a consultant is implementing Integrated Care Management for a customer, the customer requests that a change is made to the Care Plan creation wizard.

Which underlying component should the consultant customize to achieve this?

- A. Field Sets
- B. Flow
- C. FlexCard
- **D. OmniScript**

Answer: D

Explanation:

The underlying component that the consultant should customize to achieve this is OmniScript. OmniScript is a component in OmniStudio that allows the consultant to create guided scripts or wizards for users to follow. OmniScript can be used to create the Care Plan creation wizard, and it can be customized using various elements, such as steps, prompts, inputs, outputs, and actions.

NEW QUESTION # 111

What is the difference between Care Program and Care Plans in Health Cloud? (Choose 1 - Recall concept / Remember.)

- A. Care Plans can be exposed in a community while Care Programs cannot.
- B. Care Programs are an extension on Care Plans.
- C. Care Programs are just a different type of Care Plan which capture more details such as financial information.
- D. Care Plans are only used by Providers & Payers while Care Programs are only used by Life Sciences companies.
- **E. Care Programs track a patient's overall health journey, while Care Plans are more focused on specific care needs.**

Answer: E

Explanation:

According to the Salesforce documentation, care programs and care plans are different concepts in Health Cloud:

Care programs track a patient's overall health journey from enrollment to completion. They provide guidance and support for patients to proactively manage their health by increasing their adherence to treatment plans.

Care plans are practical, actionable steps to support the health of a patient. They break health problems down into doable, trackable actions. They serve as the source of truth for all the individuals involved in the care of a patient. Therefore, option A is correct.

Option B is incorrect, because both care programs and care plans can be exposed in a community. Option C is incorrect, because both care programs and care plans can be used by providers, payers, and life sciences companies. Option D is incorrect, because care programs are not a different type of care plan, but a separate object in Health Cloud. Option E is incorrect, because care programs are not an extension of care plans, but a related object in Health Cloud.

NEW QUESTION # 112

In which three ways can users access Provider Management standard objects? (Choose three)

- A. By assigning Health Cloud Platform Permission set licenses.
- B. By using Health Cloud.
- C. By assigning Health Cloud Foundation Permission set.
- D. By assigning the Provider Permission set.
- E. By using Service Cloud

Answer: A,C

Explanation:

Explanation

Health Cloud Foundation

Assigns read access to additional Health Cloud platform capabilities, including the Provider Management data model.

The Health Cloud Provider Network Management permission set grants access to provider management objects so users can manage credentialing and recruiting.

To use the Provider Network Management features of Health Cloud, assign both the Provider Network Management permission set and the Health Cloud permission set to your users

NEW QUESTION # 113

Which industry data standard should a consultant consider when designing interoperability with electronic health record (EHR) sources with Health Cloud?

- A. FHIR R4
- B. Personal Health Record (PHR)
- C. HL7 v2 Messaging
- D. Clinical Data Acquisition

Answer: A

Explanation:

FHIR R4 Standard:

* Exact Extract:

"Health Cloud supports FHIR R4 as an industry data standard for EHR interoperability." Reference: Administer Health Cloud - Interoperability Other Options:

HL7 v2 is also supported but FHIR R4 is the recommended modern standard.

Clinical Data Acquisition and PHR are not relevant data standards for EHR interoperability in this context.

NEW QUESTION # 114

Which two health cloud specific settings must be configured in a Health Cloud org that has Lightning Experience enabled person account? (Choose two)

- A. Enable "Use Person Accounts" custom setting.
- B. Under Custom Metadata Types, Update the Health cloud 'HCFeature'...
- C. Disable "Use Individual Data Model" in custom setting
- D. Under Custom Metadata Types, Create a mapping records for Person accounts.
- E. Under Custom Metadata Types, enable the Health cloud Setting

Answer: B,D

Explanation:

Under Custom Metadata Types, Update the Health cloud 'HCFeature'... and Under Custom Metadata Types, Create a mapping records for Person accounts (E) are two Health Cloud specific settings that must be configured in a Health Cloud org that has Lightning Experience enabled person account. Under Custom Metadata Types, enable the Health cloud Setting (A) and Disable "Use Individual Data Model" in custom setting (B) are not required settings for Health Cloud. Enable "Use Person Accounts" custom setting (D) is not a valid setting in Health Cloud.
