Quiz VMCE_v12 - Veeam Certified Engineer v12– Efficient New Exam Review

VEEAM CERTIFIED ENGINEER V12 VMCE_V12
SAMPLE QUESTIONS

A Veeam administrator is creating a protection group that needs to back up all servers for the accounting department using Veeam Agent for Microsoft Windows. New accounting servers must be automatically added to the protection group.
How is this accomplished?
A. Create a protection group that reads a .csv file listing the accounting servers.
B. Create a protection group and set it to automatically scan every three hours for new servers.
C. Install a configuration file on each of the accounting servers that adds it to the protection group.
D. Create an Active Directory based protection group targeted at an Active Directory security group. - Answer - Answer: D

A backup administrator decided to move the Veeam Backup & Replication server and configuration database to new servers.
Which configuration restore mode should be used?
A. Migrate
B. Planned failover
C. Restore
D. Failover plan - Answer - Answer: A

A file on a Windows VM hosted on vSphere is corrupted and must be restored. VMware tools are installed and up to date on the VM. For some reason, the Veeam mount server cannot connect to the VM through the network.
Which of the following restore methods provides the fastest restore (RTO)?
A. Run Veeam file restore wizard and let it restore through VIX.
B. Start an Instant VM Recovery session and log on into the restored image to copy/paste the file to restore.
C. It is impossible to restore the file on the VM if the mount server cannot reach it through the network.
D. Run Veeam file restore wizard and use the "copy to" to download the file locally in a shared folder. - Answer - Answer: A

Veeam ONE has been installed and configured. The infrastructure contains five Veeam Backup & Replication servers.
The administrator needs to check the remaining capacity on each of the backup repository servers. Where can they see this information?
A. Under Infrastructure View, look up the Veeam Backup & Replication servers to see the guest disk space.
B. Under Data Protection View, look up the backup repository servers to see the remaining capacity.

The Veeam VMCE_v12 certification examination is an essential component of professional development, and passing this Veeam VMCE_v12 test can increase career options and a rise in salary. Nonetheless, getting ready for the Veeam Certified Engineer v12 (VMCE_v12) exam may be difficult, and many working professionals have trouble locating the Veeam VMCE_v12 practice questions they need to succeed in this endeavor.

Veeam VMCE_v12 Exam Syllabus Topics:

Topic	Details
Topic 1	• Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories.
Topic 2	• Moving or copying backups: This section of the exam covers use cases for backup processes using VeeaMover.

Topic 3	• Scale-out Backup Repository: This section of the exam covers the description of the architecture, placement policies, and data tiers.
Topic 4	• Transport modes: This section aims to analyze different methods to collect and read data from the production environment.
Topic 5	• Agent backup: This section of the exam covers the identification of protection groups for automating the installation of Veeam Agents.
Topic 6	• Initial security considerations: This section defines ways and tools to secure the Veeam backup server.
Topic 7	• Core components: This section of the exam covers exploring the functionality of Veeam Backup & Replication and system requirements.
Topic 8	• Risk scenarios: This section covers exploring various risk scenarios and identifying the type of risks we may face in the environment.
Topic 9	• Veeam Backup Enterprise Manager: The section describes the use cases for Veeam Backup Enterprise Manager.
Topic 10	• Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas.

New New VMCE_v12 Exam Review Pass Certify | Valid VMCE_v12 Latest Exam Forum: Veeam Certified Engineer v12

We all know the effective diligence is in direct proportion to outcome, so by years of diligent work, our experts have collected the frequent-tested knowledge into our Veeam VMCE_v12 practice materials for your reference. So our Veeam Certified Engineer v12 training materials are triumph of their endeavor.

Veeam Certified Engineer v12 Sample Questions (Q50-Q55):

NEW QUESTION # 50
Which of the following is a unique feature that allows Veeam Cloud Service Providers to offer backup and replication services to customers?

- A. Veeam Cloud Connect
- B. Veeam Archive Services
- C. Veeam Cloud Scale-out Repository
- D. Veeam Data Vault

Answer: A

NEW QUESTION # 51
Which of these repository types CANNOT be an extent of a scale-out backup respository? Choose two options.

- A. Another scale out repository
- B. A shared folder (CIFS/SMB share)
- C. A deduplicating storage appliance
- D. A Linux Server
- E. A Windows server
- F. A Cloud Connect cloud repository

Answer: A,F

NEW QUESTION # 52

An engineer has 3 Veeam Backup servers in 3 different data centers. The engineer needs a way to have centralized licensing and role-based access control. How should the engineer accomplish this with the least effort?

- A. Deploy the Enterprise Manager
- B. Use the Veeam Web Portal
- C. Install the Remote console on a different client
- D. Create a web portal using REST API
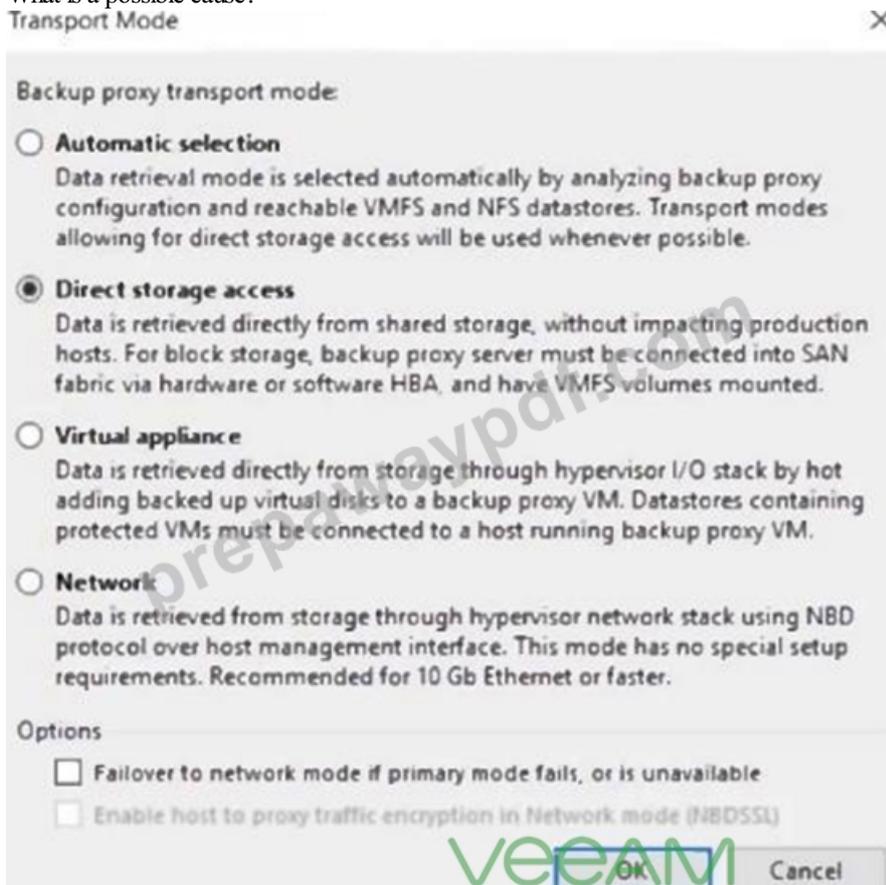

Answer: A

Explanation:

Veeam Enterprise Manager provides centralized management for Veeam Backup & Replication environments. It enables the administrator to manage licensing and role-based access control across multiple Veeam Backup servers in different locations, offering a unified control panel with minimal effort compared to other options that would require more complex setups or custom development work.

NEW QUESTION # 53

A Veeam proxy server is configured as follows. No modifications are allowed to the transport mode.
When performing a restore of a VMware virtual disk using this proxy server, the restore fails.
What is a possible cause?

Transport Mode   ✕

Backup proxy transport mode:

○ **Automatic selection**
Data retrieval mode is selected automatically by analyzing backup proxy configuration and reachable VMFS and NFS datastores. Transport modes allowing for direct storage access will be used whenever possible.

⦿ **Direct storage access**
Data is retrieved directly from shared storage, without impacting production hosts. For block storage, backup proxy server must be connected into SAN fabric via hardware or software HBA, and have VMFS volumes mounted.

○ **Virtual appliance**
Data is retrieved directly from storage through hypervisor I/O stack by hot adding backed up virtual disks to a backup proxy VM. Datastores containing protected VMs must be connected to a host running backup proxy VM.

○ **Network**
Data is retrieved from storage through hypervisor network stack using NBD protocol over host management interface. This mode has no special setup requirements. Recommended for 10 Gb Ethernet or faster.

Options

☐ Failover to network mode if primary mode fails, or is unavailable

☐ Enable host to proxy traffic encryption in Network mode (NBDSSL)

                                                          OK   Cancel

- A. The virtual disk is thick-provisioned
- B. CBT is enabled on the virtual disk.
- C. The virtual disk is thin-provisioned.
- D. CBT is disabled on the virtual disk.

Answer: C

Explanation:
Given the provided transport modes and the fact that no modifications are allowed to these settings, a possible cause for the restore

of a VMware virtual disk to fail using this proxy server is C: The virtual disk is thin-provisioned. In the transport modes shown, the Direct storage access and Virtual appliance options would require the VM disk files to be accessible in a certain way that might not be compatible with thin-provisioned disks depending on the storage configuration and the current state of the VM. If the storage integration specifics or the snapshot handling do not support the thin- provisioned format, the restore operation could fail. It's important to ensure that the transport mode selected is compatible with the type of virtual disk being restored to prevent such issues.

NEW QUESTION # 54

At 18:00, after a power outage, a VM is stuck in an infinite boot loop. The VM is configured as follows.

Platform	VMware vSphere
Application	IIS Web Server
Disk 1 (OS)	60 GB, CBT enabled
Disk 2 (DATA)	400 GB, CBT enabled

The last backup was created at 01:00. Choose the recovery approach that results in the least amount of data loss and lowest chance of data corruption.

- A. VM disk recovery with quick rollback
- B. VM disk recovery
- C. Instant VM Recovery
- D. Instant VM Recovery with quick rollback

Answer: C

NEW QUESTION # 55

......

The VMCE_v12 certification verifies that you are a skilled professional. PrepAwayPDF product is designed by keeping all the rules and regulations in focus that Veeam publishes. Our main goal is that you can memorize the actual Veeam VMCE_v12 exam question to complete the Veeam Certified Engineer v12 (VMCE_v12) test in time with extraordinary grades. Veeam VMCE_v12 Exam Dumps includes Veeam VMCE_v12 dumps PDF format, desktop VMCE_v12 practice exam software, and web-based VMCE_v12 practice test software.
