Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q41-Q46):

NEW QUESTION # 41

Which of the following design-thinking techniques helps break down Features while considering the end-to- end user flow?

- A. Story Mapping
- B. Market research
- C. Personas
- D. Gemba walks

Answer: A

Explanation:
Story Mapping is a design-thinking technique that helps break down Features while considering the end-to- end user flow. It is a collaborative practice that visually maps the user journey and the activities that the user performs to reach a desired outcome. Story Mapping helps teams understand the user needs, prioritize the backlog, and plan the iterations and PIs. References: Story Mapping, Story, Exam Study Guide: SP (6.0) - SAFe Practitioner

NEW QUESTION # 42
What is the primary goal of assigning business value to PI Objectives?

- A. to show economic impact to the customer
- B. none of the above
- C. to help the teams on the train prioritize work
- D. to have Business Owner buy-in

Answer: C

NEW QUESTION # 43
Which of the following statements describes the balanced Agile testing pyramid?

- A. Many large, manual tests of the end-to-end solution and fewer small, automated tests
- B. Many small, low-level, automated tests & fewer large, manual tests
- C. Many solution tests run by internal team members & fewer run by external testers
- D. Many solution tests run by external testers and fewer run by internal team members

Answer: B

Explanation:
The balanced Agile testing pyramid is a testing strategy that illustrates the distribution of different types of tests in a test suite. It suggests that we should have many unit tests, which are small, low-level, and automated tests that verify the functionality of individual components of the codebase. We should also have many service or integration tests, which are automated tests that verify the interaction and integration of different components or services. Finally, we should have fewer large, manual tests, such as graphical user interface tests or end-to-end tests, which verify the functionality and usability of the whole system from the user's perspective. The balanced Agile testing pyramid helps agile teams to achieve faster feedback, higher quality, and lower maintenance costs. References: The Practical Test Pyramid, What is Testing Pyramid? NEW QUESTION # 44
What is one key purpose of DevOps?

- A. DevOps enables continuous release by building a scalable Continuous Delivery Pipeline
- B. DevOps focuses on a set of practices applied to large systems
- C. DevOps joins development & operations to enable continuous delivery
- D. DevOps focuses on automating the delivery pipeline to reduce transaction cost

Answer: C

Explanation:
= DevOps is a mindset, culture, and set of technical practices that supports the integration, automation, and collaboration needed to effectively develop and operate a solution. DevOps joins development and operations to enable continuous delivery, which means

delivering value to customers in the shortest sustainable lead time. Continuous delivery is achieved by creating a Continuous Delivery Pipeline (CDP), which is a high- performance innovation engine that consists of four elements: Continuous Exploration, Continuous Integration, Continuous Deployment, and Release on Demand. DevOps also helps to improve the quality, reliability, and security of the solution by applying practices such as testing, monitoring, and feedback throughout the CDP. NEW QUESTION # 45
What is one way to understand WIP in a system?

- A. Size stories smaller
- B. Make current work visible
- C. Pair to complete the work faster
- D. Split stories

Answer: B

Explanation:
WIP stands for work in process, which is the amount of work that is currently being done in a system. One way to understand WIP is to make it visible to all stakeholders, using tools such as Kanban boards, cumulative flow diagrams, or burn-up charts. By making WIP visible, we can see the current state of the work, identify bottlenecks, limit WIP to match capacity, and improve flow efficiency.
