C_BCBAI_2509試験資料、C_BCBAI_2509学習範囲

ベースの速い社会生活を維持するため、C_BCBAI_2509試験問題では最速の配信サービスを提供しています。ほとんどの人は時間を節約するために速達を使用する傾向があるため、C_BCBAI_2509準備試験は購入後5~10分以内に送信されます。プラットフォームで料金を支払う限り、指定された時間内に関連するC_BCBAI_2509試験資料をメールボックスに配信します。当社では、サービス全体を重視しています。C_BCBAI_2509試験資料の配信に問題がある場合は、お知らせください。メッセージまたはメールをご利用いただけます。

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite 認定 C_BCBAI_2509 試験問題 (Q25-Q30):

質問 # 25

(What are some essential value propositions of SAP Business AI? Note: There are 3 correct answers to this question.)

- A. Use of the best technology on the market and strategic partnerships with industry leaders.
- B. Deployment of Joule, an advanced AI copilot, to help interpret business data and provide intelligent responses to business inquiries
- C. Training of large multi-modal foundation models based on customer-specific business data.
- D. Replacement of human workers with AI agents to reduce cost and human error.
- E. Use of extensive business data extracted from areas including Finance, Supply Chain, Procurement, and Human Resources.

正解: A、B、E

解説:

Comprehensive and Detailed Explanation From Exact Extract: The essential value propositions of SAP Business AI emphasize its relevance through grounding in extensive business data across key areas like Finance, Supply Chain, Procurement, and Human Resources, reliability via utilization of leading technology and strategic collaborations with industry leaders, and transformative capabilities with tools like Joule, the advanced AI copilot that interprets business data and delivers intelligent responses to inquiries. These propositions position SAP Business AI as a solution that drives efficiency, innovation, and productivity without aiming to replace human workers but rather to augment them, while avoiding training foundation models directly on customer-specific data to uphold privacy and ethics.

Exact extracts supporting this:

Use of extensive business data: "AI is grounded in business data and embedded into every business function, driving impact...

Industry-specific benefits: Drives value across functions like supply chain (agile, resilient, customer-centric), procurement (optimize spend, reduce risk), finance (manage risk, ensure compliance), HR (employee engagement, faster hiring)...".sap.com "With SAP Business AI, we are building the system of intelligence with three core principles: relevant, reliable, and responsible. Relevant SAP's AI..."news.sap.com "SAP Business AI provides reliable, accurate, and secure generative AI that is grounded in customers' business data..."learning.sap.com Deployment of Joule: "AI-powered scenarios: Access to over 230 AI-powered scenarios, expanding to 400 by the end of 2025, with Joule enabling navigational and transactional tasks up to 90% faster."sap.com "Process procurement data searches 95% faster with Joule... Speed up HR tasks 90% faster with Joule in SAP SuccessFactors... Complete sales tasks 80% faster with Joule in SAP Sales Cloud."sap.com Use of best technology and partnerships: "SAP Business AI provides reliable, accurate, and secure... we established an AI foundation..."learning.sap.com "Reliable: built on best technology and partnerships..."news.sap.com Other options are incorrect because:

Option B: SAP does not train large multi-modal foundation models on customer-specific data; instead, it grounds AI in business data using techniques like retrieval-augmented generation (RAG) to ensure privacy, as "Customer data is not shared with third-party large language model (LLM) providers for training their models." (from related ethics, but aligned with value props focusing on secure grounding rather than training).

Option E: SAP's propositions focus on augmentation and collaboration, not replacement, as "Solve complex challenges with AI agents that securely collaborate across your entire business... Helps teams get more done faster and more efficiently with AI that understands business processes and data."sap.com Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Derived from the official SAP Business AI product page and SAP Learning course "Discovering SAP Business AI," specifically units on articulating the value of SAP Business AI, which highlight relevance (data grounding), reliability (tech and partnerships), and tools like Joule as core propositions for integrating AI into the SAP Business Suite. Additional support from SAP News blogs on unlocking potential with SAP Business AI, aligned with C_BCB AI_2502 certification materials.

質問 # 26

What are some value propositions of the generative AI hub? Note: There are 2 correct answers to this question.

- A. Secure and compliant frameworks
- B. Scalability and compliance of business documents
- C. Enterprise-grade orchestration of models
- D. Preconfigured content

正解: A、C

質問 # 27

What is the semantic backbone of the AI Foundation that seamlessly links and contextualizes enterprise data for AI insights?

- A. SAP Knowledge Graph

- B. SAP Document AI
- C. Document grounding
- D. Joule Studio

正解: A

解説:

The SAP Knowledge Graph serves as the semantic backbone of SAP's AI Foundation, enabling seamless linking and contextualization of enterprise data for AI-driven insights. According to SAP Business AI documentation, the SAP Knowledge Graph integrates data from multiple SAP and third-party systems, creating a structured, interconnected data model that disambiguates terms and links concepts to entities. This facilitates contextual insights by providing a unified view of enterprise data, enhancing AI applications' ability to deliver relevant and accurate recommendations. SAP Document AI focuses on document processing, Joule Studio is a low-code development environment, and document grounding is a process, not a component. The Knowledge Graph's ability to ground AI insights in domain-specific knowledge ensures robust and meaningful outcomes for businesses.

質問 # 28

(What are some ways that Joule revolutionizes how users can interact with SAP business systems? Note: There are 3 correct answers to this question.)

- A. Better outcomes
- B. Better control
- C. Smarter insights
- D. Faster work
- E. Perfect predictions

正解: A、C、D

解説:

Comprehensive and Detailed Explanation From Exact Extract: Joule revolutionizes user interactions with SAP business systems by delivering better outcomes through connected, cross-enterprise AI agents; providing smarter insights via context-aware, data-grounded responses; and enabling faster work by streamlining tasks and accelerating processes up to 80-90% more efficiently. These capabilities transform productivity, decision-making, and efficiency without claiming perfect predictions or enhanced control as primary revolutions.

Exact extracts supporting this:

"Joule revolutionizes how you interact with your SAP business systems, making every touch-point count and every task simpler."help.sap.com

"Faster Work: Streamline tasks with an AI ..."learning.sap.com "enables employees to work 80% more efficiently."community.sap.com For better outcomes and smarter insights: "Collaborative AI agents in Joule, working across the business to deliver connected, cross-enterprise outcomes" and "offer intelligent suggestions."news.sap.com sap.com Other options are incorrect because:

Option B: Better control is not emphasized as a revolutionary aspect; Joule focuses on simplification and automation rather than increased user control.

Option C: Perfect predictions are not claimed; SAP Business AI prioritizes reliable, data-grounded insights over infallible predictions.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Based on SAP product page "Joule Copilot from SAP" and SAP Learning course "Discovering SAP Business AI," explaining key capabilities like faster work, smarter insights, and better outcomes. Additional support from SAP News articles on Joule, positioned within the C_BCBAI_2502 certification for articulating Joule's transformative role in SAP Business Suite interactions.

質問 # 29

Drag and drop the elements at the bottom to the architecture layers of the SAP LeanIX meta model.
