What component enables application development and integration in the toolchain?

- A. SAP Business Technology Platform and SAP Build
- B. SAP S/4HANA
- C. SAP HANA Studio
- D. SAP GUI

Answer: A

Explanation:

SAP Business Technology Platform (BTP), together with SAP Build, provides the infrastructure for creating extensions, integrations, and custom applications while preserving a clean core. The other tools do not serve as the primary integration or extension platform in modern cloud transformation.

- A. Best practice content
- B. Simplification lists

Fit-to-standard workshops rely on SAP Best Practice content to demonstrate standard business processes. This content includes ready-made process models, configuration guides, test scripts, and role definitions that help validate whether standard processes meet business requirements.
