

# The Open Group OGEA-101 Official Cert Guide - OGEA-101 Testdump

2026 Latest TestPDF OGEA-101 PDF Dumps and OGEA-101 Exam Engine Free Share: <https://drive.google.com/open?id=1YPaD1dPD9Mc4xlhgw4xKHJ0pA8ZY5Fx8>

If you are quite anxious about the exam due to you don't know the real environment, then you need to try our OGEA-101 study material. OGEA-101 soft test engine stimulates the real environment of the exam, it will help you know the general process of the exam and will strengthen your confidence. Furthermore, we have a team with the most outstanding experts to revise the OGEA-101 Study Materials, therefore you can use the material with ease.

If you have any doubts about the OGEA-101 pdf dump, please feel free to contact us, our team I live 24/7 to assist you and we will try our best to satisfy you. Now, you can download our OGEA-101 free demo for try. If you think our OGEA-101 study torrent is valid and worthy of purchase, please do your right decision. TestPDF will give you the best useful and latest OGEA-101 Training Material and help you 100% pass. Besides, your information is 100% secure and protected, we will never share it to the third part without your permission.

## The Open Group OGEA-101 Testdump - OGEA-101 Exam Vce Format

Now on the Internet, a lot of online learning platform management is not standard, some web information may include some viruses, cause far-reaching influence to pay end users and adverse effect. If you purchase our OGEA-101 test torrent this issue is impossible. We hire experienced staff to handle this issue perfectly. We are sure that our products and payment process are surely safe and anti-virus. If you have any question about downloading and using our OGEA-101 Study Tool, we have professional staff to remotely handle for you immediately, let users to use the TOGAF Enterprise Architecture Part 1 Exam guide torrent in a safe environment, bring more comfortable experience for the user.

## The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Introduction to the Architecture Development Method (ADM): The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 exam</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Architecture Change Management: Focusing on managing architecture changes, this topic of the TOGAF Enterprise Architecture Part 1 exam assesses skills of practitioners in handling change requests and maintaining architecture repositories.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Architecture Vision:</b> Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 exam and implementing enterprise architecture.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Business Architecture:</b> This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Architecture Governance:</b> This topic of The Open Group OGEA-101 Exam covers the governance framework and responsibilities of architecture boards. It evaluates the skills of TOGAF practitioners in establishing governance structures.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• <b>Implementation Governance:</b> This topic of The Open Group OGEA-101 exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• <b>Fundamental Concepts of Enterprise Architecture:</b> This topic covers the definition, purpose, and benefits of enterprise architecture, emphasizing its role in aligning business objectives with IT strategies. It measures the understanding of TOGAF practitioners about foundational principles essential for effective enterprise architecture practice, crucial for passing the OGEA-101 exam.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• <b>Information Systems Architecture:</b> Focusing on data and application architectures, this topic of the OGEA-101 exam assesses ability of TOGAF practitioners to define and manage information systems. It measures their skills in identifying data entities and application components.</li> </ul>

## The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q152-Q157):

### NEW QUESTION # 152

What are the four dimensions used to scope an architecture?

- A. Strategy Segment Capability Budget
- B. Business Data Application Technology
- **C. Breadth Depth Time Period Architecture Domains**
- D. Strategy Portfolio Project Solution Delivery

**Answer: C**

Explanation:

\* The four dimensions used to scope an architecture are Breadth, Depth, Time Period, and Architecture Domains<sup>1</sup>, p. 8.

\* Breadth refers to the extent of the enterprise covered by the architecture, which can range from a specific business unit to the entire organization<sup>1</sup>, p. 8.

\* Depth refers to the level of detail and completeness of the architecture, which can vary depending on the purpose, scope, and stakeholders of the architecture<sup>1</sup>, p. 8.

\* Time Period refers to the temporal aspects of the architecture, such as the current state, the target state, and the transition plan<sup>1</sup>, p. 8.

\* Architecture Domains refers to the classification of the architecture into four domains: Business, Data, Application, and Technology<sup>1</sup>, p. 8.

\* These four dimensions help define the scope and boundaries of the architecture and ensure that it meets the needs and expectations of the stakeholders.

### NEW QUESTION # 153

Exhibit:

□ Consider the illustration. What are the items labelled A, B, and C?

- A. A-Enterprise Repository, B-Governance Repository, C-Board Repository

- B. A-Architecture Repository, B-Governing Board, C-Enterprise Capability
- C. A-Architecture Repository, B-Governance Repository, C-Architecture Capability
- D. A-Enterprise Repository, B-Board repository, C-Enterprise Capability

**Answer: B**

Explanation:

\* A-Architecture Repository: This is a part of the Architecture Metamodel that contains artifacts structured according to the metamodel. It includes the Architecture Landscape which is adopted by the enterprise and governed by certain standards and practices.

\* B-Governing Board: The Governing Board ensures visibility and escalation, meaning it oversees and manages the capability of the architecture landscape. It plays a crucial role in governance.

\* C-Enterprise Capability: This refers to how well an enterprise can execute its mission, meet business objectives or satisfy its stakeholders' needs and expectations. It's influenced by both internal factors (like resources, processes) and external ones (like market trends).

#### NEW QUESTION # 154

Consider the following ADM phases objectives.

Which phase does each objective match?

- A. 1G-2E-3F-4E
- B. 1F-2G-3F-4F
- C. 1E-2F-3E-4G
- D. 1F-2F-3E-4G

**Answer: C**

Explanation:

1E: To identify delivery vehicles (projects programs portfolios) that will deliver the Target Architecture 2F: To confirm readiness and ability to undergo change 3E: To determine whether an incremental approach is required and if so identify Transition Architectures that will deliver continuous business value 4G: To perform appropriate governance functions while the solution is being implemented

#### NEW QUESTION # 155

Which of the following is included as part of the practice of Architecture Governance?

- A. Implementation of controls over the creation of architectural components.
- B. Interacting with the CxO level on Enterprise Architecture.
- C. Managing stakeholders, their concerns, and their requirements.
- D. Creating and maintaining the Statement of Architecture Work throughout the ADM cycle.

**Answer: A**

Explanation:

In TOGAF, Architecture Governance is concerned with establishing and operating the structures, processes, and controls that ensure architecture is properly managed and complied with across the enterprise. A central part of this practice is the implementation of controls over the creation and evolution of architectural components. This means governance is not only about defining architecture, but also about ensuring that architecture work products, building blocks, standards, and implementation activities are developed in a controlled and consistent way.

Option B is therefore the best answer because it reflects the core governance function of directing and controlling architecture-related work. Governance in TOGAF includes oversight, compliance assessment, decision rights, dispensations, and monitoring conformance to approved architectures and standards.

Option A may occur in leadership engagement, but it is not the clearest definition of architecture governance practice itself. Option C is incorrect because the Statement of Architecture Work is produced and maintained as part of ADM execution, especially early-phase planning, not as a defining governance practice throughout the full cycle. Option D relates more to stakeholder management and requirements management, which are important architecture activities, but they are not the best direct description of architecture governance.

Therefore, the correct answer is B.

### NEW QUESTION # 156

Complete the sentence. The architecture domains that are considered by the TOGAF standard as subsets of an overall enterprise architecture are Business, Technology,

- A. Information and Data
- B. Capability and Segment
- C. Logical and Physical
- **D. Application and Data**

**Answer: D**

Explanation:

These domains provide a consistent way to describe and understand the architecture from different perspectives, such as business, information, and technology<sup>1</sup>. Each domain has its own set of concepts, models, views, and artifacts that define the structure and behavior of the architecture within that domain<sup>2</sup>.

The other options are incorrect because:

\* Logical and Physical are not architecture domains, but rather levels of abstraction that can be applied to any domain. Logical architecture describes the functionality and behavior of the system, while physical architecture describes the implementation and deployment of the system<sup>3</sup>.

\* Information and Data are not distinct architecture domains, but rather aspects of the same domain. Information architecture describes the meaning and context of the data, while data architecture describes the structure and format of the data<sup>4</sup>.

\* Capability and Segment are not architecture domains, but rather levels of granularity that can be applied to any domain. Capability architecture describes the current and desired states of a specific business capability, while segment architecture describes a subdivision of the enterprise that has a clear business focus<sup>5</sup>.

### NEW QUESTION # 157
