

# DP-700 Latest Exam, DP-700 Latest Test Vce

BTW, DOWNLOAD part of PracticeDump DP-700 dumps from Cloud Storage: [https://drive.google.com/open?id=1EdiGo6akbEHuR4L0xxu7992Gxvbm\\_HYH](https://drive.google.com/open?id=1EdiGo6akbEHuR4L0xxu7992Gxvbm_HYH)

Through our DP-700 test torrent, we expect to design such an efficient study plan to help you build a high efficient learning attitude for your further development. Our DP-700 study materials are cater every candidate no matter you are a student or office worker, a green hand or a staff member of many years' experience, DP-700 Certification Training is absolutely good choices for you. Therefore, you have no need to worry about whether you can pass the DP-700 exam, because we guarantee you to succeed with our accurate and valid DP-700 exam questions.

## Microsoft DP-700 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Implement and manage an analytics solution: This section of the exam measures the skills of Microsoft Data Analysts regarding configuring various workspace settings in Microsoft Fabric. It focuses on setting up Microsoft Fabric workspaces, including Spark and domain workspace configurations, as well as implementing lifecycle management and version control. One skill to be measured is creating deployment pipelines for analytics solutions.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Monitor and optimize an analytics solution: This section of the exam measures the skills of Data Analysts in monitoring various components of analytics solutions in Microsoft Fabric. It focuses on tracking data ingestion, transformation processes, and semantic model refreshes while configuring alerts for error resolution. One skill to be measured is identifying performance bottlenecks in analytics workflows.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Ingest and transform data: This section of the exam measures the skills of Data Engineers that cover designing and implementing data loading patterns. It emphasizes preparing data for loading into dimensional models, handling batch and streaming data ingestion, and transforming data using various methods. A skill to be measured is applying appropriate transformation techniques to ensure data quality.</li></ul>

## 100% Pass 2026 DP-700: Efficient Implementing Data Engineering Solutions Using Microsoft Fabric Latest Exam

You can take our Microsoft DP-700 practice exams (desktop and web-based) multiple times to gauge how well you've prepared for the real Microsoft DP-700 test. These DP-700 practice exams are designed specifically to help you identify your mistakes and attempt the real DP-700 examination successfully. You can continually enhance your Implementing Data Engineering Solutions Using

### NEW QUESTION # 57

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Fabric eventstream that loads data into a table named Bike\_Location in a KQL database. The table contains the following columns:

BikepointID  
Street  
Neighbourhood  
No\_Bikes  
No\_Empty\_Docks  
Timestamp

You need to apply transformation and filter logic to prepare the data for consumption. The solution must return data for a neighbourhood named Sands End when No\_Bikes is at least 15. The results must be ordered by No\_Bikes in ascending order.

Solution: You use the following code segment:

```
bike_location
| filter Neighbourhood == "Sands End" and No_Bikes >= 15
| sort by No_Bikes asc
| project BikepointID, Street, Neighbourhood, No Bikes, No Empty Docks, Timestamp
```

Does this meet the goal?

- A. no
- B. Yes

**Answer: B**

Explanation:

Filter Condition: It correctly filters rows where Neighbourhood is "Sands End" and No\_Bikes is greater than or equal to 15.

Sorting: The sorting is explicitly done by No\_Bikes in ascending order using sort by No\_Bikes asc.

Projection: It projects the required columns (BikepointID, Street, Neighbourhood, No\_Bikes, No\_Empty\_Docks, Timestamp), which minimizes the data returned for consumption.

### NEW QUESTION # 58

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a KQL database that contains two tables named Stream and Reference. Stream contains streaming data in the following format.

Column name	Data type
Timestamp	Datetime
GeoLocation	Dynamic
Temperature	Decimal
DeviceId	Int

Reference contains reference data in the following format.

Column name	Data type
DeviceId	Int
DeviceName	String

Both tables contain millions of rows.

You have the following KQL queryset.

```

01 Stream
02 | extend lat = todecimal(GeoLocation.Latitude), long = todecimal(GeoLocation.Longitude)
03 | join kind=inner Reference on DeviceId
04 | project Timestamp, lat, long, Temperature, DeviceName
05 | filter Temperature >= 10
06 | render scatterchart with (kind = map)

```

You need to reduce how long it takes to run the KQL queryset.

Solution: You change project to extend.

Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

Explanation:

Using extend retains all columns in the table, potentially increasing the size of the output unnecessarily. project is more efficient because it selects only the required columns.

#### NEW QUESTION # 59

You have a Fabric workspace named Workspace1 that contains a notebook named Notebook1.

In Workspace1, you create a new notebook named Notebook2.

You need to ensure that you can attach Notebook2 to the same Apache Spark session as Notebook1.

What should you do?

- A. Change the runtime version.
- B. Enable high concurrency for notebooks.
- C. Increase the number of executors.
- D. Enable dynamic allocation for the Spark pool.

**Answer: B**

Explanation:

To ensure that Notebook2 can attach to the same Apache Spark session as Notebook1, you need to enable high concurrency for notebooks. High concurrency allows multiple notebooks to share a Spark session, enabling them to run within the same Spark context and thus share resources like cached data, session state, and compute capabilities. This is particularly useful when you need notebooks to run in sequence or together while leveraging shared resources.

#### NEW QUESTION # 60

You have a Fabric workspace named Workspace1.

You need to implement workspace monitoring for Workspace1. The solution must meet the following requirements:

\* Ensure that the logs and metrics of the items in Workspace1 are collected automatically.

\* Minimize administrative effort.

What should you do?

- A. From Workspace settings, connect an Azure Data Lake Storage Gen2 account.
- B. From Workspace settings, connect a Log Analytics workspace.
- C. In Workspace1, create a lakehouse and an eventstream.
- D. From Workspace settings, add an eventhouse.

**Answer: C**

#### NEW QUESTION # 61

.....

DP-700 test guide is an examination material written by many industry experts based on the examination outlines of the calendar year

and industry development trends. Its main purpose is to help students who want to obtain the certification of DP-700 to successfully pass the exam. Compared with other materials available on the market, the main feature of DP-700 Exam Materials doesn't like other materials simply list knowledge points. According to our statistics on the data so far, the passing rate of the students who have purchased one exam exceeds 99%, which is enough to see that DP-700 test guide is a high-quality product that can help you to realize your dream.
