- A. Extending SAP S/4HANA using SAP ABAP Development Workbench.
- **B. Extend SAP S/4HANA using APIs published on SAP Business Accelerator Hub.**
- C. There are two SAP S/4HANA instances: one for standard code and another for custom developments.
- D. SAP S/4HANA extensions are context-aware and focused on tight integration.

**Answer: B**

**NEW QUESTION # 72**

Which of the following are responsibilities of the SAP Project Manager during the Explore phase of an S/4HANA Cloud Private Edition implementation? Note: There are 3 correct answers to this question.

- **A. Establish the Solution Standardization Board**
- B. Develop a detailed technical architecture design
- **C. Conduct fit-to-standard workshops**
- D. Develop detailed technical specifications for custom development
- **E. Monitor completion of the Business Driven Configuration Questionnaire**

**Answer: A,C,E**

Explanation:

Step 1 - Understanding the Question

The Explore phase of the SAP Activate methodology focuses on confirming scope, validating SAP Best Practice processes, and finalizing solution design decisions through Fit-to-Standard workshops.

The SAP Project Manager plays a leadership and coordination role - ensuring workshops are executed, project governance is active, and the configuration approach remains aligned with standard SAP practices.

Step 2 - Evaluate Each Option

A). Monitor completion of the Business Driven Configuration Questionnaire

\* The Business-Driven Configuration Questionnaire (BDCQ) captures key requirements and process-specific decisions from the customer.

\* During the Explore phase, the SAP Project Manager ensures the questionnaire is completed accurately to support Fit-to-Standard discussions.

\* Monitoring completion of this document is a formal responsibility of the Project Manager.

Result: Correct - It is a key management activity during Explore.

B). Develop detailed technical specifications for custom development

\* This activity is owned by technical consultants or developers, not the Project Manager.

\* The Project Manager's role is to oversee progress and governance, not to write or develop technical designs.

Result: Incorrect - Outside the PM's direct responsibilities.

C). Develop a detailed technical architecture design

\* Architecture design is the responsibility of technical architects, finalized in the Prepare phase before workshops begin.

\* The Project Manager reviews and monitors this work but does not develop it.

Result: Incorrect - Managed, but not developed by the Project Manager.

D). Conduct fit-to-standard workshops

\* The Project Manager coordinates and ensures Fit-to-Standard workshops are completed according to plan.

\* The PM's role includes scheduling, logistics, resource allocation, and monitoring outcomes.

\* While consultants lead the content of workshops, the PM ensures they are conducted effectively and documented.

Result: Correct - Conducting and managing workshops is part of the Project Manager's Explore responsibilities.

E). Establish the Solution Standardization Board

\* The Solution Standardization Board (SSB) is established during Explore to govern deviation requests from SAP Best Practices.

\* The Project Manager facilitates the setup of this board and ensures that change requests are reviewed and approved in line with the clean-core principle.

Result: Correct - Establishing and managing the SSB is part of the Project Manager's Explore phase tasks.
