

SAP C_DBADM_2601 Certification Materials & Pass Guaranteed Quiz 2026 SAP Certified - Database Administrator - SAP HANA Realistic Latest Exam Labs

We have three versions of our C_DBADM_2601 certification guide, and they are PDF version, software version and online version. With the PDF version, you can print our materials onto paper and learn our C_DBADM_2601 exam braindumps in a more handy way as you can take notes whenever you want to, and you can mark out whatever you need to review later. With the software version, you are allowed to install our SAP Certified - Database Administrator - SAP HANA guide torrent in all computers that operate in windows system. Besides, the software version can simulate the real test environment, which is favorable for people to better adapt to the examination atmosphere. With the online version, you can study the SAP Certified - Database Administrator - SAP HANA guide torrent wherever you like, and you still have access to the materials even if there is no internet available on the premise that you have studied the C_DBADM_2601 Certification guide online once before.

Our PassLeaderVCE provides the latest and the most complete C_DBADM_2601 exam questions and answers aimed at becoming the most reliable dumps provider in IT exam software. With the help of our PassLeaderVCE, nearly all those who have purchased our dumps have successfully passed the difficult C_DBADM_2601 Exam, which gives us great confidence to recommend our reliable products to you. We can assure you that we will fully refund the cost you purchased our dump, if you fail C_DBADM_2601 exam with our dumps. So, just rest assured to prepare for your exam.

SAP C_DBADM_2601 Realistic Certification Materials Free PDF Quiz

To let the client be familiar with the atmosphere of the C_DBADM_2601 exam we provide the function to stimulate the exam and the timing function of our C_DBADM_2601 study materials to adjust your speed to answer the questions. We provide the stimulation, the instances and the diagrams to explain the hard-to-understand contents of our C_DBADM_2601 Study Materials. For these great merits we can promise to you that if you buy our C_DBADM_2601 study materials you will pass the test without difficulties.

SAP Certified - Database Administrator - SAP HANA Sample Questions (Q130-Q135):

NEW QUESTION # 130

CHALLENGE 2 - Simulation Monitoring Baseline Control

The reporting team asks to apply memory-related tuning before the next baggage-volume simulation because response times varied during the first SIT cycle. The current monitoring baseline has not been fully captured. What should the database owner do first?

- A. Apply tuning immediately because faster simulation response time supports rollout confidence.

- B. Disable simulation monitoring so the next run focuses only on report completion.
- **C. Capture current monitoring behavior and validate threshold relevance before approving tuning.**
- D. Move tuning decisions to the SAP HANA Cloud system because future analytics will run there.

Answer: C

Explanation:

Feedback:

The database owner should capture monitoring behavior and validate thresholds before tuning. This keeps the SIT baseline clear before any performance change alters the evidence used for rollout decisions.

NEW QUESTION # 131

A digital publishing company operates SAP HANA for subscriber activity reporting. Users report that dashboards are available, but refresh times vary sharply during the morning reporting window. SAP HANA cockpit shows no service outage, while monitoring history shows a recurring peak in expensive statement activity from a reporting workload. The database team is asked to increase system capacity immediately because the reports are business-critical.

The constraint is that the administrator must identify the execution pattern before recommending a capacity or scheduling change.

The business requires stable refresh times, but the system must remain available during investigation.

Which action best fits the observed performance evidence?

- **A. Review the expensive statement pattern and workload timing, then apply a targeted scheduling or workload adjustment based on validated evidence.**
- B. Restart SAP HANA during the reporting window so existing expensive statements are cleared before users refresh dashboards.
- C. Increase capacity immediately because dashboard variability always indicates insufficient database resources.
- D. Disable the reporting workload until the next maintenance window so all expensive statements are removed from the system.

Answer: A

Explanation:

Feedback:

This acts on the monitored execution evidence before changing the operating model. Reviewing expensive statement behavior and timing supports a targeted correction that links workload activity, resource use, and dashboard refresh validation.

NEW QUESTION # 132

CHALLENGE 4 - SIT Recovery Evidence Sequencing

The SIT lead can release the next cycle on schedule using backup completion evidence, or delay the release briefly to include recovery validation for the installed test database and recoverability evidence for the upgraded system. Which path is most defensible?

- A. Release on schedule and attach recovery evidence to the later SAP HANA Cloud migration plan.
- **B. Delay briefly to complete recovery evidence for the systems included in the next SIT cycle.**
- C. Cancel the second SIT cycle because recovery validation was not completed before the first run.
- D. Release on schedule because schedule discipline is the highest priority during SIT.

Answer: B

Explanation:

Feedback:

A brief delay is most defensible because it completes recoverability evidence for systems used in the next SIT cycle. This reflects governance-vs-governance prioritization between schedule control and continuity evidence.

NEW QUESTION # 133

CHALLENGE 1 - Hypercare Configuration Record Traceability

The hypercare coordinator wants to accept the comparison because meter-reading exception dashboards opened successfully. The database team later confirms that the upgraded service reporting system's administration record does not reflect the configuration state used during testing. Which decision best supports readiness-quality evidence?

- A. Use the comparison because report opening is sufficient evidence for service readiness.
- **B. Update the administration record and reassess the hypercare comparison against the confirmed state.**
- C. Replace the upgraded system record with the SAP HANA Cloud provisioning record.
- D. Treat the missing configuration evidence as unrelated because hypercare focuses on dashboard access.

Answer: B

Explanation:

Feedback:

The administration record should be updated and the hypercare comparison reassessed against the confirmed state. This preserves the dependency between configuration evidence and the reporting conclusion used for readiness support.

NEW QUESTION # 134

A regional specialty foods company is rehearsing a phased move from SAP HANA on-premises to SAP HANA Cloud. The migration transfer completes, and database explorer can query the cloud target. During validation, the administrator finds that the cloud-side backup review was performed before the imported content was available, while monitoring review was performed after import. The project lead wants approval because both checks appear in the workbook.

The constraint is that the migration wave must prove target administration readiness after the migrated state exists. The team needs repeatable validation evidence for later waves, not a checklist that mixes pre-import and post-import states.

What should the administrator recommend?

- **A. Repeat the target-side backup review after import, confirm monitoring evidence for the same migrated state, and approve only if both pass.**
- B. Defer backup review until after production cutover because monitoring was already validated after import.
- C. Approve the rehearsal because both backup review and monitoring review are present in the validation workbook.
- D. Repeat only the data transfer because the timing mismatch indicates that the imported content may not have reached the cloud target.

Answer: A

Explanation:

Feedback:

This corrects the validation timing dependency at the target administration layer. Repeating backup review after import and confirming monitoring against the same migrated state aligns transfer completion, target operations, resilience evidence, and repeatable approval criteria.

NEW QUESTION # 135

.....

As old saying goes, god will help those who help themselves. So you must keep inspiring yourself no matter what happens. At present, our C_DBADM_2601 exam materials are able to motivate you a lot. Our products will help you overcome your laziness. And you will become what you want to be with the help of our C_DBADM_2601 learning questions. You can realize and reach your dream. Also, you will have a pleasant learning of our C_DBADM_2601 study quiz.

Latest C_DBADM_2601 Exam Labs: https://www.passleadervce.com/SAP-Certification-Exams/reliable-C_DBADM_2601-exam-learning-guide.html

The reason why they like our C_DBADM_2601 guide questions is that our study materials' quality is very high, These SAP C_DBADM_2601 features make this prep method the most comfortable one, In addition, our professional after sale stuffs will provide considerate online after sale service on the C_DBADM_2601 exam questions 24/7 for all of our customers, There is no reason for you still waiting, SAP C_DBADM_2601 vce training material almost give all essential conditions you need.

Working with Gmail Contact Groups, Where do you think the conference world is headed, The reason why they like our C_DBADM_2601 guide questions is that our study materials' quality is very high.

These SAP C_DBADM_2601 features make this prep method the most comfortable one, In addition, our professional after sale stuffs will provide considerate online after sale service on the C_DBADM_2601 exam questions 24/7 for all of our customers.

Top C_DBADM_2601 Certification Materials Pass Certify | High-quality Latest C_DBADM_2601 Exam Labs: SAP Certified - Database Administrator - SAP HANA

There is no reason for you still waiting. SAP C_DBADM_2601 vce training material almost give all essential conditions you need, The PDF version can be printed into the paper version, and you can take some notes on it, and you can C_DBADM_2601 study it at anywhere and anytime, the PDF version also provide the free demo and you can practice it before buying.
