CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q128-Q133):

NEW QUESTION # 128

Which statement is most correct regarding about "CoreXL Dynamic Dispatcher"?

- A. The CoreXL FW instances assignment mechanism is based on Source MAC addresses, Destination MAC addresses
- B. The CoreXL FW instances assignment mechanism is based on IP Protocol type
- C. The CoreXL FW instances assignment mechanism is based on Source IP addresses, Destination IP addresses, and the IP 'Protocol' type
- **D. The CoreXL FW instances assignment mechanism is based on the utilization of CPU cores**

Answer: D

Explanation:

Explanation

The statement that is most correct regarding about "CoreXL Dynamic Dispatcher" is: The CoreXL FW instances assignment mechanism is based on the utilization of CPU cores. CoreXL Dynamic Dispatcher is a feature that allows the Security Gateway to dynamically assign connections to the most available CoreXL FW instance, based on the CPU core utilization. This improves the performance and load balancing of the Security Gateway, especially when handling connections with different processing requirements. The other statements are either incorrect or describe the CoreXL Static Dispatcher mechanism, which assigns connections based on a hash function of the Source IP, Destination IP, and IP Protocol type.

NEW QUESTION # 129

What destination versions are supported for a Multi-Version Cluster Upgrade?

- A. R70 and Later
- B. R81.40 and later
- C. R76 and later
- **D. R81.20 and Later**

Answer: D

Explanation:

Explanation

The destination versions that are supported for a Multi-Version Cluster Upgrade are R81.20 and later. This means that the cluster members can be upgraded from any supported version to R81.20 or higher using the Multi-Version Cluster mode. R81.40, R76, and R70 are not supported destination versions for a Multi-Version Cluster Upgrade. References: : Check Point Software, Getting Started, Supported Upgrade Paths

NEW QUESTION # 130

Which command collects diagnostic data for analyzing a customer setup remotely?

- A. cpinfo
- B. migrate export
- C. cpv
- D. sysinfo

Answer: A

Explanation:

The verified answer is B. cpinfo.

cpinfo is a command that collects diagnostic data for analyzing a customer setup remotely. It is an auto-updatable utility that runs on the customer's machine and uploads the data to Check Point servers. The data includes information about the system, the security policy, the objects, and the logs. Check Point support engineers can use the DiagnosticsView utility to open the cpinfo file and view the customer's configuration and environment settings¹.

migrate export is a command that exports the Check Point configuration and database files to a compressed file. It is used for backup and migration purposes, not for remote analysis².

sysinfo is a command that displays basic information about the system, such as the hostname, the OS version, the CPU model, and the memory size. It does not collect or upload any data to Check Point servers³.

cpv is not a valid command in Check Point.

Migrate export - Check Point Software²

sysinfo - Check Point Software³

NEW QUESTION # 131

In R81, how do you manage your Mobile Access Policy?

- A. From SmartDashboard
- B. From the Dedicated Mobility Tab
- C. Through the Unified Policy
- D. Through the Mobile Console

Answer: C

Explanation:

Explanation

In R81, you can manage your Mobile Access Policy through the Unified Policy. The Unified Policy is a single policy that combines access control, threat prevention, data protection, and identity awareness. You can create rules for mobile access in the Unified Policy rulebase and apply them to mobile devices, users, and applications. You can also use the Mobile Access blade to configure additional settings for mobile access, such as authentication methods, VPN settings, and application portal.

NEW QUESTION # 132

What traffic does the Anti-bot feature block?

- A. Network traffic that is directed to unknown or malicious servers
- B. Command and Control traffic to servers with reputation for hosting malware
- C. Network traffic to hosts that have been identified as infected
- D. Command and Control traffic from hosts that have been identified as infected

Answer: D

NEW QUESTION # 133

.....
