最新的 Application Development 1Z0-771 免費考試真題 (Q38-Q43):

問題 #38

Which two tasks can be performed by using the Generate Text with AI Dynamic Action?

- A. Update the underlying database tables

- B. Draft an email
- C. Summarize or translate text
- D. Invoke a Workflow

答案: B,C

解題說明:

The "Generate Text with AI" Dynamic Action uses Generative AI to:

Draft an email: Creates text content like emails based on prompts.

Summarize or translate text: Processes existing text to summarize or translate it.

It does not update database tables or invoke workflows, as it's focused on text generation.

問題 #39

An application includes a form on the EMPLOYEES table. You must limit the P1_MANAGER page item so users can select a single employee name and ID from the corresponding manager ID in the same table. Which item type can be used to display P1_MANAGER?

- A. Popup LOV
- B. Checkbox
- C. Switch

答案: A

解題說明:

The requirement is to allow users to pick a single employee (name and ID) from a list tied to the MANAGER_ID column in the EMPLOYEES table, implying a dynamic, searchable selection:

A . Popup LOV: This item type displays a popup window with a searchable list of values, sourced from a SQL query (e.g., SELECT ename, empno FROM employees WHERE empno IN (SELECT DISTINCT manager_id FROM employees)). It returns a single value (e.g., EMPNO) while displaying the name, perfectly meeting the need for a single selection from a related dataset.

B . Switch: A toggle (Yes/No), unsuitable for selecting from a list of employees.

C . Checkbox: Allows multiple selections, conflicting with the "single employee" requirement.

Practical note: Popup LOVs enhance usability with filtering and pagination, ideal for large employee lists, and support returning the ID while showing the name.

問題 #40

Which two declarative options in Oracle APEX allow you to download BLOB/CLOB content?

- A. APEX_UTIL.DOWNLOAD PL/SQL API
- B. Share Dynamic Action
- C. Download Dynamic Action
- D. Download Page Process

答案: C,D

解題說明:

Declarative options for downloading BLOB/CLOB content include:

Download Dynamic Action: A built-in action type to trigger downloads of BLOB/CLOB data.

Download Page Process: A process type that declaratively handles BLOB/CLOB downloads from a table.

APEX_UTIL.DOWNLOAD is a PL/SQL API, not a declarative option, and Share Dynamic Action is for sharing URLs, not downloading files.

問題 #41

There is a validation of type Item is Numeric on the P1_SALARY item. When the page is submitted, this error message is displayed both as a notification and inline with the item. What will cause the validation error to appear only in the Notification area?

- A. Setting Display Location to Inline in Notification
- B. Setting Value Required to Yes on P1_SALARY.
- C. Removing P1_SALARY from the validation Associated Item.

答案：A

解題說明：

Validation errors in APEX default to both inline (next to the item) and notification (top of page):

C . Setting Display Location to Inline in Notification: In the validation's properties, changing "Display Location" to "Inline in Notification" ensures the error appears only in the notification area, suppressing inline display. This centralizes feedback for a cleaner UI.

A . Removing Associated Item: Breaks the validation's link to P1_SALARY, stopping it entirely.

B . Value Required: Adds a separate check, unrelated to display location.

Pitfall: Test with non-numeric input (e.g., "abc") to confirm behavior.

問題 #42

Which two layout modes are available for Page Designer under Utilities?

- A. Three Pane
- B. Four Pane
- C. Single Pane
- D. Two Pane

答案：A,D

解題說明：

Page Designer's layout modes under Utilities adjust the workspace:

A . Two Pane: Splits into two vertical sections (e.g., tree and properties), ideal for focused editing.

B . Three Pane: Adds a third section (e.g., tree, grid, properties), offering a balanced view for complex pages.

C . Four Pane: Not available; APEX limits to three for usability.

D . Single Pane: Not an option; the minimum is two panes.

Developers toggle these via the Utilities menu to optimize screen real estate based on task complexity.
