

# Trustable Reliable Fire-Inspector-II Test Notes & Leading Offer in Qualification Exams & Verified International Code Council 67 - Fire Inspector II Exam

---

## TCFP FIRE INSPECTOR II TEST WITH COMPLETE SOLUTION 2023-2024

How big are DOT labels? - 4-inch square, on point

Where is the primary DOT label? - On the left

How many hazards can be on a DOT label? - several.

NFPA 704 - Hazardous Materials Marking System

Placard: Blue means.... - Health Hazard

Placard: Red means.... - Flammability Hazard

Placard: Yellow means.... - Instability

Placard: White means..... - Special Hazards

5 Special Hazards - (1) Combustible Dust Fibres

(2) Spraying/painting dip tanks

(3) Compressed Gasses

(4) Welding and cutting

(5) Hazardous chemicals

Article 15 of NFPA 70 - National Electric Code, Divided into 3 classes:

Class I Locations - Flammable gases and vapours exist under normal conditions

Class I Division I Location - Ignitable conditions exist due to repairs or maintenance.

Class I Division II Location - Ignitable conditions produced or used but confined to closed containers or systems.

What's more, part of that ITPassLeader Fire-Inspector-II dumps now are free: [https://drive.google.com/open?id=1FmVE-ajXm6eECKfDKkrBU4\\_t8ZF5VTq](https://drive.google.com/open?id=1FmVE-ajXm6eECKfDKkrBU4_t8ZF5VTq)

Our Fire-Inspector-II exam question is widely known throughout the education market. Almost all the candidates who are ready for the qualifying examination know our Fire-Inspector-II exam questions. Even when they find that their classmates or colleagues are preparing a Fire-Inspector-II exam, they will introduce our study materials to you. So, our learning materials help users to be assured of the Fire-Inspector-II Exam. Currently, my company has introduced three versions of Fire-Inspector-II learning materials, covering almost all the needs of the different customers.

People can achieve great success without an outstanding education and that the International Code Council qualifications a successful person needs can be acquired through the study to get some professional certifications. So it cannot be denied that suitable Fire-Inspector-II actual test guide do help you a lot; thus we strongly recommend our Fire-Inspector-II Exam Questions for not only that our Fire-Inspector-II training guide is designed to different versions: PDF, Soft and APP versions, which can offer you different study methods, but also that our Fire-Inspector-II learning perp can help you pass the exam without difficulty.

## Fire-Inspector-II Examcollection Vce - Free Fire-Inspector-II Download Pdf

This format of ITPassLeader International Code Council Fire-Inspector-II practice material is compatible with these smart devices: Laptops, Tablets, and Smartphones. This compatibility makes Fire-Inspector-II PDF Dumps easily usable from any place. It contains real and latest Fire-Inspector-II exam questions with correct answers. ITPassLeader examines it regularly for new updates so that you always get new 67 - Fire Inspector II Exam (Fire-Inspector-II) practice questions. Since it is a printable format, you can do a paper study. The 67 - Fire Inspector II Exam (Fire-Inspector-II) PDF Dumps document is accessible from every location at any time.

### International Code Council 67 - Fire Inspector II Exam Sample Questions (Q88-Q93):

#### NEW QUESTION # 88

Where requirements for fire safety are not specifically provided for by the International Fire Code, which of the following shall have the responsibility to determine the applicable requirements?

- A. Fire code official.
- B. City manager.
- C. Board of appeals.
- D. Legal counsel.

**Answer: A**

Explanation:

According to the International Fire Code (IFC) 2021, when specific fire safety requirements are not explicitly provided for in the code, the responsibility to determine the applicable requirements falls upon the Fire Code Official.

Reference from the IFC (2021):

IFC Section 104.1 - General Authority and Responsibilities:

This section explicitly grants the Fire Code Official the authority to interpret the code and determine the necessary safety measures in cases where the code does not provide specific guidance.

It states: "The fire code official is hereby authorized to enforce the provisions of this code and shall have the authority to render interpretations of the code and to adopt policies and procedures in order to clarify the application of its provisions." IFC Section 104.9 - Alternative Materials and Methods:

This section further supports the authority of the Fire Code Official by allowing them to approve alternative fire safety measures when strict compliance with the code is not feasible.

Why Other Options Are Incorrect?

A: City Manager:

The city manager is responsible for administrative and operational management but does not have the authority to interpret or enforce fire code requirements.

B: Legal Counsel:

Legal counsel provides legal advice but does not have jurisdiction over fire safety code enforcement.

C: Board of Appeals:

The board of appeals reviews disputes and interpretations made by the Fire Code Official, but they do not have primary responsibility for determining applicable fire safety requirements.

Final Conclusion:

The Fire Code Official is the designated authority responsible for interpreting and applying fire safety requirements in situations where the International Fire Code (IFC) does not explicitly provide specific provisions.

#### NEW QUESTION # 89

In a control area where flammable liquid storage containers are in piles, there shall be a minimum of \_\_\_ in. of clearance between the top of the storage and the deflector or discharge orifices of a sprinkler system

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: D**

**Explanation:**

Clearance Requirement for Sprinkler Systems Over Flammable Liquid Storage According to International Fire Code (IFC) 2021, Section 5004.6 and NFPA 30: Flammable and Combustible Liquids Code, Section 16.5.1, there must be a minimum of 18 inches of clearance between the top of flammable liquid storage and the deflector or discharge orifices of a sprinkler system.

This ensures unobstructed sprinkler discharge for effective fire suppression.

**2. Why 18 Inches is the Correct Answer**

The 18-inch clearance allows sprinklers to operate properly, ensuring water distribution is not blocked by stored materials.

NFPA 13 also mandates an 18-inch minimum clearance for standard storage applications with sprinklers.

**3. Verification of Other Options**

Option B (24 inches) - Incorrect, as the IFC and NFPA specify 18 inches as the minimum requirement.

Option C (30 inches) - Incorrect, as this exceeds the required minimum clearance.

Option D (36 inches) - Incorrect, as the IFC and NFPA do not require this much clearance.

**Reference Sources:**

International Fire Code (IFC) 2021 - Section 5004.6 (Sprinkler Clearance Over Flammable Liquid Storage) NFPA 30: Flammable and Combustible Liquids Code - Section 16.5.1 NFPA 13: Standard for the Installation of Sprinkler Systems - Minimum Clearance Requirements ICC Fire Inspector II Study Guide (2021) Thus, the correct and verified answer is: A. 18 inches. #

**NEW QUESTION # 90**

Extra-high-rack combustible storage is defined in the fire code as any storage on racks of Class I, II, III, or IV commodities which exceed \_\_\_\_ ft. in height, and any storage on racks of high-hazard commodities which exceed \_\_\_\_ ft. in height.

- A. 20; 30
- B. 30; 40
- **C. 40; 30**
- D. 50; 40

**Answer: C**

**Explanation:**

Definition of Extra-High-Rack Combustible Storage

According to International Fire Code (IFC) 2021, Section 3206.6, extra-high-rack combustible storage is defined as:

Class I, II, III, or IV commodities stored on racks exceeding 40 feet in height.

High-hazard commodities stored on racks exceeding 30 feet in height.

**2. Understanding Rack Storage Classifications**

Class I-IV Commodities: These refer to general, moderate-risk combustible materials such as wood, paper, and plastics.

High-Hazard Commodities: These are materials that have a higher fire risk, such as highly combustible plastics, flammable solids, and products prone to rapid heat release.

**3. Verification of Other Options**

Option A (20; 30) - Incorrect, as 40 feet is the correct threshold for Class I-IV commodities.

Option B (30; 40) - Incorrect, as 30 feet applies to high-hazard commodities, not Class I-IV commodities.

Option D (50; 40) - Incorrect, as the correct heights are 40 feet and 30 feet, respectively.

**Reference Sources:**

International Fire Code (IFC) 2021 - Section 3206.6 (Definition of Extra-High-Rack Storage) NFPA 13: Standard for the Installation of Sprinkler Systems (High-Rack Storage Requirements) ICC Fire Inspector II Study Guide (2021)

**NEW QUESTION # 91**

Which of the following situations requires securing of an operational permit from the code official prior to commencing the related activity?

- A. Fruit ripening operations using carbon dioxide gas.
- **B. Storing 85,000 bd. ft. of lumber.**
- C. Organic coating production facility producing 2 gallons per day.
- D. Inside storage of 100 cu. ft. of baled cotton.

**Answer: B**

**Explanation:**

IFC Section 105.6 lists activities requiring operational permits. For A, lumber storage exceeding 100,000 board feet (bd. ft.) indoors or outdoors requires a permit (Section 105.6.28, Lumber Yards), but local thresholds may be lower-85,000 bd. ft. is close

to this limit and likely exceeds typical exempt amounts, triggering a permit in many jurisdictions. For B, IFC Table 3206.2 allows small quantities of combustible commodities like baled cotton (100 cu. ft. is minimal) without a permit unless part of a larger high-piled storage operation. For C, fruit ripening with CO<sub>2</sub> (Section 105.6.13) requires a permit only for specific flammable gases, not CO<sub>2</sub> alone, which is nonflammable. For D, organic coating production (Section 105.6.33) requires a permit only above 1 gallon per day, but 2 gallons is still small-scale and context-dependent-lumber storage is the clearer permit trigger here. Thus, A is the best answer.

Reference: IFC 2021, Section 105.6 (Required Operational Permits), Section 3206.2 (High-Piled Storage).

## NEW QUESTION # 92

Battery-charging areas for industrial trucks shall be protected with portable fire extinguishers which have a minimum rating of

- A. 40-B:C
- B. 3-A:40-B:C
- C. 2-A:10-B:C
- D. 4-A:20-B:C

### Answer: A

Explanation:

Battery-charging areas for industrial trucks (such as forklifts) present a fire hazard due to the potential for flammable hydrogen gas buildup and electrical malfunctions. To mitigate this risk, portable fire extinguishers with a minimum rating of 40-B:C are required. Reference to Fire Inspector Documentation:

1. 2021 International Fire Code (IFC) - Section 309.5 (Fire Extinguishers for Battery-Charging Areas) IFC 309.5 states that battery-charging areas must have a portable fire extinguisher with a minimum rating of 40-B:C to handle potential electrical and flammable liquid fires.

The B rating covers flammable liquid fires (such as battery electrolyte leaks), while the C rating ensures it is safe for electrical fires.

2. NFPA 10 - Standard for Portable Fire Extinguishers (2022 Edition)

NFPA 10, Table 6.3.1.1 outlines that industrial battery-charging areas must have at least one extinguisher rated 40-B:C.

This ensures adequate fire suppression capability for both electrical and flammable liquid hazards.

Detailed Explanation of Answer Choices:

Option A (Incorrect): 4-A:20-B:C includes a higher A-rating (for ordinary combustibles), but 20-B:C is below the required 40-B:C.

Option B (Incorrect): 3-A:40-B:C exceeds the B:C requirements but adds an unnecessary A-rating, which is not specified in the code.

Option C (Incorrect): 2-A:10-B:C is insufficient, as it does not meet the 40-B:C minimum requirement.

Option D (Correct): 40-B:C is the correct and minimum required rating per IFC 309.5 and NFPA 10.

Thus, the correct and verified answer is: D. 40-B:C.

## NEW QUESTION # 93

.....

Taking ITPassLeader 67 - Fire Inspector II Exam (Fire-Inspector-II) practice test questions are also important. These International Code Council Fire-Inspector-II practice exams include questions that are based on a similar pattern as the finals. This makes it easy for the candidates to understand the 67 - Fire Inspector II Exam (Fire-Inspector-II) exam question paper and manage the time. It is indeed a booster for the people who work hard and do not want to leave any chance of clearing the Fire-Inspector-II exam with brilliant scores.

**Fire-Inspector-II Examcollection Vce:** <https://www.itpassleader.com/International-Code-Council/Fire-Inspector-II-dumps-pass-exam.html>

ITPassLeader Fire-Inspector-II Examcollection Vce ensure that the first time you take the exam will be able to pass the exam to obtain the exam certification. Compared with other vendors, you will find the prices of Fire-Inspector-II exam dumps on ITPassLeader are reasonable and worthy. While it is not easy to pass the Fire-Inspector-II Examcollection Vce - 67 - Fire Inspector II Exam actual test just by your own study, I think a good study material will bring twice the result with half the effort. And to satisfy different requirement, Fire-Inspector-II training materials provide different versions to you with free demos.

Depending on your exact setup and the machines Free Fire-Inspector-II Download Pdf or applications for which you are collecting login information, you might want to look out for other things. The font Free Fire-Inspector-II Download Pdf on the default clock is too small for comfortable reading on a small display.

# Want to Get International Code Council Fire-Inspector-II Certified? Rely on ITPassLeader's Exam Questions for Easy Success

ITPassLeader ensure that the first time you take the exam will be able to pass the exam to obtain the exam certification, Compared with other vendors, you will find the prices of Fire-Inspector-II Exam Dumps on ITPassLeader are reasonable and worthy.

While it is not easy to pass the 67 - Fire Inspector II Exam actual **Reliable Fire-Inspector-II Test Notes** test just by your own study, I think a good study material will bring twice the result with half the effort, And to satisfy different requirement, Fire-Inspector-II training materials provide different versions to you with free demos.

It saves you a lot of money and Fire-Inspector-II time especially for busy-working and ready-to-exam candidates.
