

# 2026 Salesforce-MuleSoft-Developer-I Dumps Guide | Perfect 100% Free Salesforce-MuleSoft-Developer-I Reliable Test Test

2025 Latest TrainingDumps Salesforce-MuleSoft-Developer-I PDF Dumps and Salesforce-MuleSoft-Developer-I Exam Engine  
Free Share: <https://drive.google.com/open?id=1qd8LZgOuaGQB8KH-JvdOFNICjmR-Vgl9>

On the other hand, those who do not score well can again try reading all the Salesforce Certified MuleSoft Developer (Mule-Dev-201) (Salesforce-MuleSoft-Developer-I) dumps questions and then give the Salesforce-MuleSoft-Developer-I exam. This will help them polish their skills and clear all their doubts. Also, you must note down your Salesforce Certified MuleSoft Developer (Mule-Dev-201) (Salesforce-MuleSoft-Developer-I) practice test score every time you try the Salesforce Exam Questions. It will help you keep a record of your study and how well you are doing in them.

## Salesforce Salesforce-MuleSoft-Developer-I Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Structuring Mule Applications: Structuring Mule applications covers parameterizing an application and defining and reusing global configurations. It includes breaking an application into multiple flows using private flows, subflows, and the Flow Reference component.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Using Connectors: It focuses on retrieving data from REST services using HTTP Request or REST Connector. Moreover, the topic covers using a Web Service Consumer connector for SOAP web services and the Transform Message component.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Handling Errors: Handling errors includes describing default error handling in Mule applications and defining custom global default error handlers. It involves comparing On Error Continue and On Error Propagate scopes, creating error handlers for a flow, using the Try scope, and mapping errors to custom application errors.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• Creating Application Networks: The topic of creating Application Networks encompasses understanding MuleSoft's proposal for closing the IT delivery gap and describing the role and characteristics of the modern API. It also includes the purpose and roles of a Center for Enablement (C4E), and the benefits of API-led.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Transforming Data with DataWeave: It involves writing DataWeave scripts and using DataWeave functions. This topic also includes defining and using DataWeave variables, functions, and modules, and applying correct syntax.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Deploying and Managing APIs and Integrations: It includes packaging Mule applications for deployment and deploying them to CloudHub. This topic also involves using CloudHub properties, creating and deploying API proxies, connecting an API implementation to API Manager, and applying policies to secure an API.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Accessing and Modifying Mule Events: It describes the Mule event data structure. Moreover, the topic focuses on usage of transformers and enriching Mule events.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• Processing Records: Processing records includes methods for processing individual records in a collection and explaining how Mule events are processed by the For Each scope. It also involves using the Batch Job with Batch Steps and a Batch Aggregator.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• Debugging and Troubleshooting Mule Applications: Using breakpoints to inspect a Mule event during runtime, installing missing Maven dependencies, and reading and deciphering Mule log error messages are sub-topics of this topic.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>• Designing APIs: Designing APIs involves describing the lifecycle of the modern API and using RAML to define various aspects of an API. It includes identifying when to use query parameters vs URI parameters, and defining API parameters.</li> </ul>

## Salesforce Salesforce-MuleSoft-Developer-I Reliable Test Test, Salesforce-MuleSoft-Developer-I Latest Real Exam

Users of TrainingDumps software can attempt multiple Salesforce Certified MuleSoft Developer (Mule-Dev-201) (Salesforce-MuleSoft-Developer-I) practice exams to assess and improve preparation for the examination. Customers can view their previous attempts' scores and see their mistakes. It helps test takers take the final Salesforce Certified MuleSoft Developer (Mule-Dev-201) (Salesforce-MuleSoft-Developer-I) exam without making mistakes. The web-based version of the Salesforce-MuleSoft-Developer-I practice exam can be taken online. It means you can take this mock test via any browser like MS Edge, Firefox, Chrome, Internet Explorer, and Safari.

## Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q212-Q217):

### NEW QUESTION # 212

Refer to the exhibit. APIkit is used to generate flow components for the RAML specification.

How many apikit:router XML elements are generated to handle requests to every endpoint defined in the RAML specification?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

### NEW QUESTION # 213

Refer to the exhibit. The Batch Job processes, filters and aggregates records, What is the expected output from the Logger component?

- A. [20, 40] [60]
- B. [10, 20] [30, 40] [50, 60]
- C. [10, 20, 30, 40, 50, 60]
- D. [20, 40, 60]

Answer: A

Explanation:

\* Batch scope has filter criteria which says payload mod 2 = 0 which means only 2, 4 and 6 will be in batch scope.

\* So payload for each of these will be incremented by 10.

\* Aggregator has batch size defined as 2. So it will process in batch of two records.

\* Hence option 3 is correct answer.

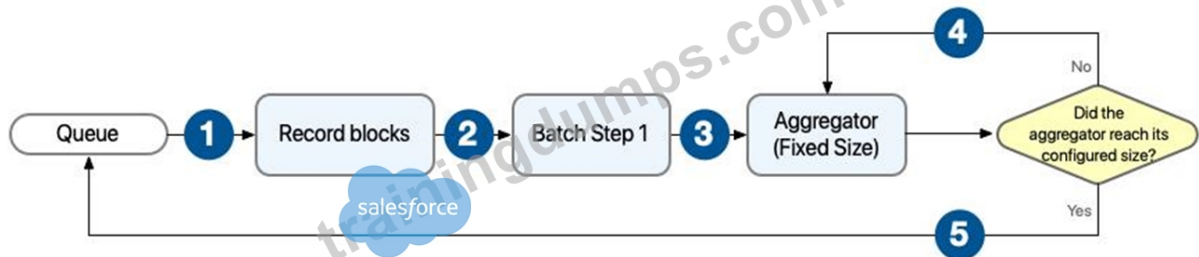

[20,40]

[60]

Behavior with aggregator configured with fixed size

In this scenario, the batch step sends the processed records to an aggregator, which starts processing the records and buffering them

until the configured aggregator's size is reached. After that, the aggregator sends the aggregated records to the stepping queue.

The batch job builds record blocks of the configured block size and sends them to their corresponding batch step for processing. Each batch step receives one or more record blocks and starts processing them in parallel. After the batch step processes a record, the batch step sends the record to the aggregator for further processing. The aggregator continues processing records until the number of aggregated records reaches the configured aggregator's size.

<https://docs.mulesoft.com/mule-runtime/4.3/batch-processing-concept>

#### NEW QUESTION # 214

Which of the below is not a valid category for connector type?

- A. Premium
- B. Gold
- C. Community
- D. Select

**Answer: B**

Explanation:

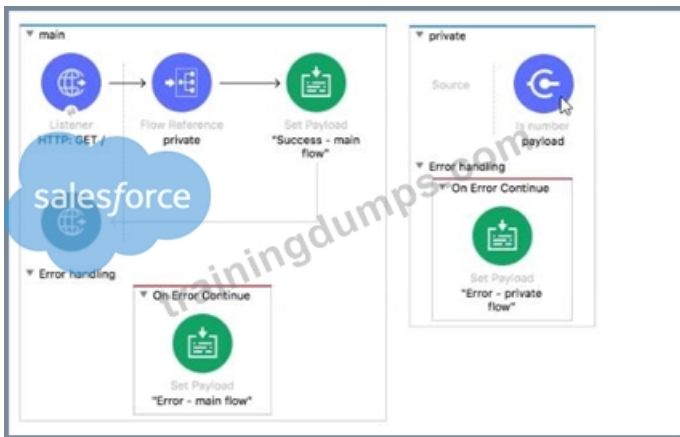

Gold is not valid category for connector types.

MuleSoft Doc Ref : <https://docs.mulesoft.com/mule-runtime/3.7/anypoint-connectors#connector-support-categories>

Connector type	Description
Community	MuleSoft or members of the MuleSoft community write and maintain the Community connectors. Connectors built by the community or MuleSoft are generally open-source, although each package may vary. Partner-built connectors may not be open-source. Contact the partner directly for more information. You do not need any special account or license to use a Community connector.
MuleSoft Certified	For MuleSoft Certified connectors are developed by MuleSoft's partners and developer community and are reviewed and certified by MuleSoft. For support, customers should contact the MuleSoft partner that created the MuleSoft Certified connector.
Select	MuleSoft maintains Select connectors. Connectors included in the open source Mule distribution can be used by everyone, however support is only included in an Anypoint Platform subscription. To use all other Select Connectors and access support, you must have an active Anypoint Platform subscription.
Premium	MuleSoft maintains Premium connectors; you must have an active CloudHub Premium plan or an Enterprise subscription with an entitlement for the specific connector you wish to use.

#### NEW QUESTION # 215

Refer to the exhibits.

The Validation component in the private flow throws an error. What response message is returned to a client request to the main flow's HTTP Listener?

- A. Error - private flow
- **B. Error - main flow**
- C. Success - main flow
- D. Validation Error

**Answer: B**

Explanation:

Error in validation component will get processed by Processor level On Error Propagate block and then error will be rethrown which will get processed by flow level error handler which will set payload to "Error- main flow". Hence correct answer is Error - main flow

- 1) Request is received by HTTP listener
- 2) Try scope gets executed
- 3) The validator component in the Try scope creates an Error Object because the payload is not null.
- 4) The On Error Propagate handles the error. The payload is set to "Error - Try scope"
- 6) "Error - Try scope" is returned to the 'On Error Continue' block. Main flow execution stops. Payload is set to "Error - main flow"
- 7) "Error - main flow" is returned to the requestor in the body of the HTTP request. HTTP Status Code: 200

----- Reference Diagram though not exactly same, conditions are similar. They will help you answer any new question on error handling in real exam:

<https://docs.mulesoft.com/mule-runtime/4.3/on-error-scope-concept#on-error-continue>

#### NEW QUESTION # 216

How does APIKit determine the number of flows to generate from a RAML specification?

- A. Creates a separate flow for each resource that contains child resources
- **B. Creates a separate flow for each HTTP method**
- C. Creates a separate flow for each resource
- D. Creates a separate flow for each response status code

**Answer: B**

Explanation:

APIKit Creates a separate flow for each HTTP method

#### NEW QUESTION # 217

.....

If you are looking to advance in the fast-paced and technological world, Salesforce is here to help you achieve this aim. Salesforce provides you with the excellent Salesforce Certified MuleSoft Developer (Mule-Dev-201) practice exam, which will make your dream come true of passing the Salesforce Salesforce-MuleSoft-Developer-I Certification Exam.
