

# 1z0-1093-25 New Study Guide, 1z0-1093-25 Exam Actual Questions

BTW, DOWNLOAD part of Pass4cram 1z0-1093-25 dumps from Cloud Storage: <https://drive.google.com/open?id=1TMhNB7mY-eqU3loWz2rbQLQIsjrMH9Nm>

Our 1z0-1093-25 exam questions just focus on what is important and help you achieve your goal. When the reviewing process gets some tense, our 1z0-1093-25 practice materials will solve your problems with efficiency. With high-quality 1z0-1093-25 Guide materials and flexible choices of learning mode, they would bring about the convenience and easiness for you. Every page is carefully arranged by our experts with clear layout and helpful knowledge to remember.

## Oracle 1z0-1093-25 Exam Syllabus Topics:

| Topic   | Details   |
|---------|---|
| Topic 1 | <ul style="list-style-type: none"><li>MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.</li></ul>   |
| Topic 2 | <ul style="list-style-type: none"><li>Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.</li></ul> |
| Topic 3 | <ul style="list-style-type: none"><li>Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.</li></ul>  |
| Topic 4 | <ul style="list-style-type: none"><li>NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.</li></ul>   |

|         |   |
|---------|---|
| Topic 5 | <ul style="list-style-type: none"> <li>• Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.</li> </ul> |
|---------|---|

## Oracle 1z0-1093-25 Questions To Complete Your Preparation [2026]

If you have the certification, it will be very easy for you to achieve your dream. But it is not an easy thing for many candidates to pass the 1z0-1093-25 exam. By chance, our company can help you solve the problem and get your certification, because our company has compiled the 1z0-1093-25 question torrent that not only have high quality but also have high pass rate. We believe that our 1z0-1093-25 exam questions will help you get the certification in the shortest. So hurry to buy our 1z0-1093-25 exam torrent, you will like our products.

### Oracle Cloud Database Services 2025 Professional Sample Questions (Q63-Q68):

#### NEW QUESTION # 63

You are tasked with checking the status of the Exadata Database Service (ExaDB) components using the dcli utility. You need to gather information about the health and status of the database servers and storage cells across the ExaDB infrastructure. Which dcli command, combined with appropriate commands run across the nodes, will provide the most comprehensive overview?

- A. dcli -g all "list status"
- B. dcli -g cell\_group "list cell attributes name, status, metriccurrent"
- C. dcli -g dbnodes "list dbnodes"
- D. **dcli -g cell\_group "list cell attributes name, status" combined with dcli -g dbnodes "srvctl status database -d dbname"**

**Answer: D**

Explanation:

A: dcli -g cell\_group "list cell attributes name, status" combined with dcli -g dbnodes "srvctl status database -d dbname" dcli Utility:  
 \* dcli(Distributed Command Line Interface) allows you to run commands on multiple nodes simultaneously.  
 \* cell\_group: A group configuration file listing all storage cells.  
 \* dbnodes: A group configuration file listing all database nodes.

Commands Explanation:

\* dcli -g cell\_group "list cell attributes name, status":  
 \* Retrieves the name and current status of each storage cell.  
 \* dcli -g dbnodes "srvctl status database -d dbname":  
 \* Checks the status of the database instances on the compute nodes.  
 \* Combining these commands provides a complete picture of both storage and compute components.

Why the other options are incorrect:

\* B. Including metriccurrent:Produces excessive output, not suitable for a quick health check.  
 \* C. Listing dbnodes only:Insufficient as it lacks storage cell status.  
 \* D. dcli -g all "list status":Invalid syntax and lacks specificity.

#### NEW QUESTION # 64

You are managing an Exadata Database Service (ExaDB) and need to perform a full backup of the database to Oracle Cloud Infrastructure Object Storage using the bkup\_api utility. The backup must include all datafiles and control files. Which bkup\_api command will achieve this?

- A. bkup\_api bkup\_start --dbname=dbname
- B. bkup\_api bkup\_start --datafiles --controlfile --dbname=dbname
- C. **bkup\_api bkup\_start --full --dbname=dbname**
- D. bkup\_api bkup\_start --all --dbname=dbname

**Answer: C**

Explanation:

Full Backup with bkup\_api:

The --full flag in thebkup\_api command ensures that the backup includes all datafiles and control files. This command is essential for creating a complete, consistent backup suitable for recovery purposes.

- \* The backup is stored in OCI Object Storage, leveraging cloud scalability and redundancy.
- \* The --dbname parameter specifies which database to back up.

Why the other options are incorrect:

- \* A: This command may initiate a default backup, not a full one.
- \* B: Specifying files individually is less efficient than using --full.
- \* D: The --all option does not necessarily imply a full backup.

**NEW QUESTION # 65**

Which two of the following options are valid statements regarding the management of the operating system on a Base Database Service Virtual Machine DB System?

- A. Customers are responsible for the initial OS installation, but then patching is controlled entirely by Oracle.
- B. Direct SSH access to the underlying VM is restricted, and all OS-level operations must be performed through the Web Console.
- C. Customers are responsible for the security and maintenance of the operating system, including applying necessary patches and updates.
- D. Customers have full root access to the underlying operating system of the Virtual Machine DB System, allowing for customization and installation of custom software.
- E. Oracle manages the underlying operating system patching and updates, ensuring the system remains secure and compliant.

**Answer: C,D****NEW QUESTION # 66**

Which of the following best describes the primary purpose of table rate limiting within Oracle NoSQL Database Cloud Service?

- A. To enforce strict data consistency across all table partitions, ensuring ACID compliance.
- B. To prevent a single table from consuming excessive resources, ensuring fair allocation and preventing performance degradation for other tables and users.
- C. To automatically optimize table schema design for improved query performance.
- D. To restrict the total amount of storage space a table can consume.

**Answer: B**

Explanation:

Table Rate Limiting:

Table rate limiting ensures that no single table monopolizes system resources, maintaining overall stability and performance in a multi-tenant environment. This feature is crucial for cloud services where numerous applications may share the same database infrastructure. It helps maintain fair access by capping the number of read/write operations per second.

Why the other options are incorrect:

- \* A: ACID compliance is achieved through consistency settings, not rate limiting.
- \* C: Schema optimization is not related to rate limiting.
- \* D: Rate limiting controls IOPS (Input/Output Operations Per Second), not storage space.

**NEW QUESTION # 67**

In the context of BaseDB Database Lifecycle Management, what is the primary purpose of a "pre-check" utility before applying a patch or upgrading the database?

- A. To optimize the database performance after the patch or upgrade.
- B. To determine if the patch or upgrade is compatible with the existing database environment and identify potential conflicts.
- C. To install the patch or upgrade in a test environment for validation.
- D. To automatically back up the database before the patch or upgrade.

- E. To migrate data to a different storage tier.

**Answer: B**

Explanation:

Purpose of Pre-Check Utility:

The pre-check utility in BaseDB ensures that the database environment is ready for the upcoming patch or upgrade. It checks for:

- \* Compatibility issues with the existing software and configurations.
- \* Resource availability (like CPU, memory, and storage).
- \* Dependencies and prerequisites needed for a successful upgrade. By identifying potential conflicts in advance, pre-checks minimize the risk of upgrade failures and reduce downtime.

Why the other options are incorrect:

- \* A: Backup is a separate process.
- \* C: Pre-check does not install or validate in a test environment.
- \* D: Performance optimization happens post-upgrade.
- \* E: Data migration is unrelated to the pre-check process.

## NEW QUESTION # 68

.....

If you have the certification the exam, you can enter a better company, and your salary will also be doubled. 1z0-1093-25 training materials can help you pass the exam and obtain corresponding certification successfully. 1z0-1093-25 exam materials are edited by experienced experts, and they possess the professional knowledge for the exam, and you can use it with ease. We have online and offline chat service, they possess the professional knowledge for the exam, and you can consult them any questions that bothers you. We offer you free update for one year for 1z0-1093-25 Exam Dumps, and our system will send the latest version to you automatically.
