If you choose ITdumpsfree, success is not far away for you. And soon you can get Cisco Certification 200-201 Exam certificate. The product of ITdumpsfree not only can 100% guarantee you to pass the exam, but also can provide you a free one-year update service.

Cisco Understanding Cisco Cybersecurity Operations Fundamentals Sample Questions (Q477-Q482):

NEW QUESTION # 477

A CMS plugin creates two files that are accessible from the Internet myplugin.html and exploitable.php. A newly discovered exploit takes advantage of an injection vulnerability in exploitable.php. To exploit the vulnerability, an HTTP POST must be sent with specific variables to exploitable.php. A security engineer notices traffic to the webserver that consists of only HTTP GET requests to myplugin.html. Which category does this activity fall under?

- A. reconnaissance
- B. exploitation
- C. weaponization
- D. installation

Answer: A

NEW QUESTION # 478

Which two elements are assets in the role of attribution in an investigation? (Choose two.)

- A. session
- B. firewall logs
- C. context
- D. threat actor
- E. laptop

Answer: C,D

Explanation:

Section: Security Policies and Procedures

NEW QUESTION # 479

What is indicated by an increase in IPv4 traffic carrying protocol 41?

- A. deployment of a GRE network on top of an existing Layer 3 network
- B. unauthorized peer-to-peer traffic
- C. attempts to tunnel IPv6 traffic through an IPv4 network
- D. additional PPTP traffic due to Windows clients

Answer: C

Explanation:

Protocol 41 is used to encapsulate IPv6 packets in IPv4 headers for transmission over an IPv4 network. This is one of the methods to implement IPv6 transition mechanisms for hosts and routers that are located on IPv4 networks. An increase in IPv4 traffic carrying protocol 41 may indicate that some hosts or routers are trying to tunnel IPv6 traffic through an IPv4 network, which could be a legitimate or malicious activity depending on the network policy. References = Understanding Cisco Cybersecurity Operations Fundamentals (CBROPS) - Cisco, page 177; [IPv6 Transition Mechanisms for IPv4 Domains]

NEW QUESTION # 480

How does an attacker observe network traffic exchanged between two users?

- A. denial of service
- B. man-in-the-middle
- C. port scanning
- D. command injection

Answer: B

Explanation:

A man-in-the-middle (MITM) attack occurs when an attacker secretly intercepts and possibly alters the communication between two parties who believe they are directly communicating with each other. In this scenario, an attacker can observe network traffic exchanged between two users by placing themselves in between their communication channel. NEW QUESTION # 481

An automotive company provides new types of engines and special brakes for rally sports cars. The company has a database of inventions and patents for their engines and technical information. Customers can access the database through the company's website after they register and identify themselves. Which type of protected data is accessed by customers?

- A. PHI data
- B. PII data
- C. IP data
- D. PSI data

Answer: C

Explanation:

IP data stands for Intellectual Property data, which is any data that represents the creations of the mind, such as inventions, patents, designs, or artistic works. IP data is protected by law and has commercial value for its owners. In this case, the automotive company has a database of IP data for their engines and technical information, which customers can access after they register and identify themselves. Reference = Cisco Cybersecurity Operations Fundamentals, Module 1: Security Concepts, Lesson 1.2: Data Protection, Topic 1.2.1: Data Types

NEW QUESTION # 482
