ARC-801 Latest Learning Materials - ARC-801 Valid Cram Materials

As the captioned description said, our ARC-801 practice materials are filled with the newest points of knowledge about the exam. With many years of experience in this line, we not only compile real test content into our ARC-801 practice materials, but the newest in to them. Allowing for there is a steady and growing demand for our ARC-801 practice materials with high quality at moderate prices, we never stop the pace of doing better. All newly supplementary updates will be sent to your mailbox one year long. And we shall appreciate it if you choose any version of our ARC-801 practice materials for exam and related tests in the future.

Our ARC-801 practice engine is the most popular examination question bank for candidates. As you can find that on our website, the hot hit is increasing all the time. I guess you will be surprised by the number how many our customers visited our website. And our [ARC-801 Learning Materials](#) have helped thousands of candidates successfully pass the ARC-801 exam and has been praised by all users since it was appearance.

What's more, part of that RealExamFree NCA-6.10 dumps now are free: https://drive.google.com/open?id=1wd_o7m6NSvjy5JoQIAWqniyf6BW99Ng

In compliance with syllabus of the exam, our NCA-6.10 practice materials are determinant factors giving you assurance of smooth exam. Our NCA-6.10 practice materials comprise of a number of academic questions for your practice, which are interlinked and helpful for your exam. So, they are specified as one of the most successful NCA-6.10 practice materials in the line. They can renew your knowledge with high utility with Favorable prices. So, they are reliably rewarding NCA-6.10 practice materials with high utility value.

Our NCA-6.10 exam dumps are required because people want to get succeed in IT field by clearing the certification exam. Passing NCA-6.10 practice exam is not so easy and need to spend much time to prepare the training materials, that's the reason that so many people need professional advice for NCA-6.10 Exam Prep. The NCA-6.10 dumps pdf are the best guide for them passing test.

Free PDF Quiz 2026 Nutanix NCA-6.10: High-quality Nutanix Certified Associate v6.10 Books PDF

It is never too late to try new things no matter how old you are. Someone always give up their dream because of their ages, someone

give up trying to overcome NCA-6.10 exam because it was difficult for them. Now, no matter what the reason you didn't pass the exam, our study materials will try our best to help you. If you are not sure what kinds of NCA-6.10 Exam Question is appropriate for you, you can try our free demo of the PDF version. There must be one that suits you best. Your life will become more meaningful because of your new change, and our NCA-6.10 question torrents will be your first step.

Nutanix Certified Associate v6.10 Sample Questions (Q12-Q17):

NEW QUESTION # 12

Which Nutanix offering allows for extending an on-prem datacenter into the public cloud?

- **A. Nutanix Cloud Clusters**
- B. Nutanix Kubernetes Engine
- C. Nutanix Data Services
- D. Nutanix Cloud Security

Answer: A

Explanation:

Nutanix Cloud Clusters (NC2) enables extending on-premises datacenters into public cloud environments, such as AWS or Azure. This solution allows administrators to seamlessly migrate workloads, scale operations, and manage resources across hybrid cloud environments using a unified control plane.

- * A. Nutanix Cloud Security: Incorrect, as this focuses on securing workloads in the cloud, not extending datacenters.
- * B. Nutanix Cloud Clusters: Correct, as NC2 enables hybrid cloud functionality by extending on-prem clusters into the public cloud.
- * C. Nutanix Kubernetes Engine: Incorrect, as this is used for container orchestration, not hybrid cloud extension.
- * D. Nutanix Data Services: Incorrect, as this refers to storage and data management capabilities.

References:

Nutanix Cloud Clusters (NC2) Documentation.

Nutanix University: Hybrid Cloud Training.

NEW QUESTION # 13

An administrator of an AHV cluster needs to deploy a solution that will provide self-service network provisioning and overlapping IP addresses for true multi-tenant networking with VPCs.

Which product will satisfy this requirement?

- A. Flow Network Security
- B. Nutanix Kubernetes Platform
- **C. Flow Virtual Networking**
- D. Nutanix Database Service

Answer: C

Explanation:

The correct answer is D. Flow Virtual Networking (FVN).

Flow Virtual Networking (FVN) is a Nutanix solution that enables advanced network virtualization, including:

- * VPCs (Virtual Private Clouds)
- * Overlapping IP address spaces
- * Self-service network provisioning
- * Multi-tenancy support
- * Microsegmentation

FVN abstracts physical networking and allows tenants to manage isolated logical networks, providing cloud-like networking capabilities directly integrated with AHV.

Clarifications:

- * A. Nutanix Kubernetes Platform (NKP): Orchestrates containers; does not provide virtualized network infrastructure.
- * B. Flow Network Security: Focuses on microsegmentation and policy enforcement, not on VPC or L3 abstraction.
- * C. Nutanix Database Service (NDB): Manages DBaaS; not related to networking.

Official Reference:

* Nutanix Flow Virtual Networking Tech Note

* Nutanix Documentation Portal - Flow Virtual Networking

* Excerpt: "Flow Virtual Networking provides VPCs, overlapping IPs, and self-service networking capabilities for secure multi-tenancy in Nutanix AHV clusters."

NEW QUESTION # 14

An administrator would like to configure a cluster to perform an LCM inventory automatically. At what frequency will the inventory run by default?

- A. Every 8 hours
- B. Every 12 hours
- C. Every 4 hours
- **D. Every 24 hours**

Answer: D

Explanation:

The correct answer is D. Every 24 hours.

In Nutanix Life Cycle Manager (LCM), when the LCM Auto Inventory feature is enabled, the system performs automatic inventory scans of the cluster's hardware and software components. By default, this auto-inventory runs every 24 hours to keep track of firmware, software versions, and available updates.

Clarifications:

- * The frequency is not user-configurable from the Prism UI.
- * It ensures accurate detection of upgrade eligibility and component compliance.
- * The admin can also run an inventory manually at any time.

Prism UI Navigation Path:

Settings > LCM > Auto Inventory (toggle enabled)

Official Reference:

- * Nutanix LCM Guide - Auto Inventory Section
- * Excerpt: "When Auto Inventory is enabled, LCM automatically performs inventory every 24 hours."

NEW QUESTION # 15

A Veeam Backup appliance, which uses iSCSI, must be deployed into an AHV-based cluster. What must be configured to allow Veeam to connect to the Nutanix cluster?

- **A. Network Segmentation**
- B. Prism Central
- C. Data Services IP
- D. Nutanix Objects

Answer: A

Explanation:

For a Veeam Backup appliance using iSCSI to connect to an AHV-based Nutanix cluster, a Data Services IP (DSIP) must be configured. The DSIP is a virtual IP that allows external systems to communicate with Nutanix storage using protocols such as iSCSI. This ensures seamless connectivity between Veeam and the Nutanix cluster.

- * A. Network Segmentation: While network segmentation is important for security, it is not specifically required for iSCSI connectivity.
- * B. Nutanix Objects: Nutanix Objects is used for object storage, not iSCSI connectivity.
- * C. Prism Central: Prism Central is used for multi-cluster management but is not involved in configuring iSCSI.
- * D. Data Services IP: Correct, as it enables external systems to connect via iSCSI.

References:

Nutanix AHV Administration Guide: Data Services IP Configuration.

Veeam and Nutanix Integration Documentation.

NEW QUESTION # 16

An administrator needs to ensure that the three VMs of an application cluster are never placed onto the same hypervisor by creating a VM- VM Anti-Affinity Policy.

What should the administrator use to complete this task?

- A. Ncli
- **B. Prism Central**

- C. acli
- D. Prism Element

Answer: B

Explanation:

To create a VM-VM Anti-Affinity Policy ensuring VMs are not placed on the same hypervisor, Prism Central is required. Anti-affinity policies are cluster-wide configurations managed through Prism Central's policy-based interface, enabling placement rules to distribute workloads effectively.

Steps:

- * Navigate to Prism Central > Policies.
- * Create a new Anti-Affinity Policy.
- * Select the VMs and configure the policy to ensure separation.

References:

Nutanix Prism Central Guide - Policy Management.
