Salesforce Order Management Administrator Accredited Professional Sample Questions (Q37-Q42):

NEW QUESTION # 37

Where should a service agent go first to initiate changes related to an Order in Order Management?

- **A. Order Summary Details**
- B. Fulfillment Order Details
- C. Change Order Details
- D. Order Details

Answer: A

Explanation:

A service agent should go first to the Order Summary Details page to initiate changes related to an order in Order Management. The Order Summary Details page provides a global view of the entire order lifecycle, including order capture, fulfillment, shipping, payment, invoicing, and service. From this page, a service agent can access various actions and flows to process changes such as cancellations, returns, exchanges, reshipments, refunds, and discounts. The service agent can also view related records such as Order, Fulfillment Orders, Shipments, Invoices, Credit Memos, and Change Orders. NEW QUESTION # 38

An admin is observing a flow and needs to watch all of the variables changing as the process executes, but nothing like this is being displayed. What did the developer forget to enable?

- A. Show the details of what's executed and render flow in Lightning Experience
- **B. Show the details of what's executed and render flow in Lightning Runtime**
- C. Show execution details inline
- D. Show execution details

Answer: B

NEW QUESTION # 39

What does the number of Fulfillment Orders created depend upon?

- A. Fulfillment Location, Recipient Address and Quantity
- **B. Fulfillment Location, Delivery Charges and Quantity**

- C. Fulfillment Location, Delivery Method and Number of Payments
- **D. Fulfillment Location, Delivery Method and RecipientAddress**

Answer: D

Explanation:

The number of Fulfillment Orders created depends on three factors: Fulfillment Location, Delivery Method and Recipient Address. These factors determine how the Order Items are grouped and allocated to Fulfillment Orders based on routing rules and inventory availability. For example, if an order has two items that can be fulfilled from different locations, or have different delivery methods or recipient addresses, then two Fulfillment Orders are created for that order. NEW QUESTION # 40

A customer orders a product through B2C Commerce but changes the quantity ordered after the Order Summary record is created in Order Management. Later, the customer returns one of the products. Which objects will be created in Order Management?

- A. The Order Summary object and Change Order object
- B. A Change Order object and Cancel Order Object
- C. A Cancel Order object and Return Order object
- **D. A Return Order object and Change Order object**

Answer: D

Explanation:

The objects that will be created in Order Management when a customer orders a product through B2C Commerce but changes the quantity ordered after the Order Summary record is created in Order Management, and then returns one of the products are:

A Return Order object. A Return Order is a record that represents a return request for an order or part of an order. A Return Order has a lookup relationship to both Order Summary and Change Order objects, and it contains information such as the return reason, status, date, etc.

A Change Order object. A Change Order is a record that represents a change request for an order or part of an order. A Change Order has a lookup relationship to the Order Summary object, and it contains information such as the change type, status, date, etc.
