

# SPLK-3002 Test Review Exam Pass For Sure | Splunk SPLK-3002: Splunk IT Service Intelligence Certified Admin

DOWNLOAD the newest PrepAwayETE SPLK-3002 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=11V0ocK3Z8Txc3LG0ey61TokyXbIS3g4j>

Since our company's establishment, we have devoted mass manpower, materials and financial resources into SPLK-3002 exam materials and until now, we have a bold idea that we will definitely introduce our SPLK-3002 study materials to the whole world and make all people that seek fortune and better opportunities have access to realize their life value. Our SPLK-3002 Practice Questions, therefore, is bound to help you pass through the SPLK-3002 exam and win a better future.

Splunk IT Service Intelligence Certified Admin certification exam covers different topics related to ITSI, including data input and management, data analysis, service modeling, and service management. SPLK-3002 Exam also tests the candidate's ability to use ITSI to monitor and troubleshoot IT services and applications, as well as their knowledge of best practices for configuring and deploying ITSI in different environments.

## Reliable Splunk SPLK-3002 Test Preparation | SPLK-3002 Latest Test Questions

PrepAwayETE also has a Splunk Practice Test engine that can be used to simulate the genuine Splunk IT Service Intelligence Certified Admin (SPLK-3002) exam. This online practice test engine allows you to answer questions in a simulated environment, giving you a better understanding of the exam's structure and format. With the help of this tool, you may better prepare for the Splunk IT Service Intelligence Certified Admin (SPLK-3002) test.

The SPLK-3002 Certification Exam is a valuable credential for IT professionals who want to demonstrate their expertise in using ITSI to improve IT service management. Certified professionals can showcase their skills to employers, clients, and colleagues, and gain recognition for their expertise. Splunk IT Service Intelligence Certified Admin certification can also lead to career growth opportunities and higher salaries.

## Splunk IT Service Intelligence Certified Admin Sample Questions (Q29-Q34):

### NEW QUESTION # 29

Which of the following items apply to anomaly detection? (Choose all that apply.)

- A. There are 3 types of anomaly detection supported in ITSI: adhoc, trending, and cohesive.
- B. A minimum of 24 hours of data is needed for anomaly detection, and a minimum of 4 entities for cohesive analysis.
- C. Use AD on KPIs that have an unestablished baseline of data points. This allows the ML pattern to perform its magic.
- D. Anomaly detection automatically generates notable events when KPI data diverges from the pattern.

**Answer: B,D**

Explanation:

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/AD>

Anomaly detection is a feature of ITSI that uses machine learning to detect when KPI data deviates from a normal pattern. The following items apply to anomaly detection:

B). A minimum of 24 hours of data is needed for anomaly detection, and a minimum of 4 entities for cohesive analysis. This ensures that there is enough data to establish a baseline pattern and compare different entities within a service.

C). Anomaly detection automatically generates notable events when KPI data diverges from the pattern. You can configure the sensitivity and severity of the anomaly detection alerts and assign them to episodes or teams. References: [Anomaly Detection]

### NEW QUESTION # 30

What effects does the KPI importance weight of 11 have on the overall health score of a service?

- A. The service will go critical.
- B. It is a minimum health indicator KPI.
- C. At least 10% of the KPIs will go critical.
- D. Importance weight is unused for health scoring.

**Answer: B**

### NEW QUESTION # 31

Which of the following accurately describes base searches used for KPIs in a service?

- A. All the metrics in a base search are used by one service.
- B. All the KPIs in a service use the same base search.
- C. A base search can only be used by its service and all dependent services.
- D. Base searches can be used for multiple services.

**Answer: D**

Explanation:

KPI base searches let you share a search definition across multiple KPIs in IT Service Intelligence (ITSI).

Create base searches to consolidate multiple similar KPIs, reduce search load, and improve search performance.

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/BaseSearch> A base search is a search definition that can be shared across multiple KPIs that use the same data source.

Base searches can improve search performance and reduce search load by consolidating multiple similar KPIs. The statement that accurately describes base searches used for KPIs in a service is:

A). Base searches can be used for multiple services. This means that you can create a base search for a service and use it for other services that have similar data sources and KPIs. For example, if you have multiple services that monitor web server performance, you can create a base search that queries the web server logs and use it for all the services that need to calculate KPIs based on those logs.

### NEW QUESTION # 32

Which of the following best describes a default deep dive?

- A. It initially shows all of the KPIs for a selected service.
