Oracle 1Z0-1126-1 Exam Syllabus Topics:

Topic	Details
Topic 1	• Project Phase 2: Refine: At this stage, organizations refine their project scope, estimate timelines, and ensure alignment with strategic objectives. Selecting appropriate OGL content from libraries helps tailor learning materials to organizational needs. Deployment considerations, including defining the environment, test users, and data requirements, ensure a robust testing phase before full implementation. The process of building, testing, and customizing OGL content is refined to optimize effectiveness. Planning for optional activities, such as activation and role conditions or display groups, ensures flexibility and adaptability in deployment.
Topic 2	• Continuous Improvement: Mature: Ongoing refinement is essential for maintaining the effectiveness of OGL content. Organizations plan for quarterly updates, refreshes, and necessary changes to keep learning materials relevant and up to date. Reviewing OGL analytics provides valuable insights into content performance, enabling continuous optimization and improvement. This phase ensures that the learning framework remains dynamic and aligned with evolving business needs, maximizing the long-term impact of OGL deployment.
Topic 3	• Introduction to OGL Content: OGL plays a crucial role in enabling organizations to efficiently manage learning content, ensuring seamless deployment and accessibility. It provides a structured framework for organizing, delivering, and tracking learning materials to enhance workforce skills. The OGL Deployment approach outlines a structured implementation process that organizations follow to integrate OGL within their systems. Organizations nest within this deployment approach by aligning their training objectives, resources, and processes with OGL's capabilities, ensuring a smooth adoption and effective utilization of learning content.
Topic 4	• Project Phase 1: Focus: This phase involves defining the OGL project plan, including governance structures that oversee implementation and ensure alignment with business objectives. OGL training, learning paths, and business processes play a vital role in equipping users with the necessary skills and knowledge for efficient adoption. Identifying essential resources, including key team members, lays the foundation for a successful rollout. OGL Cloud Service activation is a critical step, allowing organizations to manage users within the OGL console, ensuring secure and streamlined access. Proper documentation is essential for content building, testing, and customization, forming the basis for a structured and scalable deployment.
Topic 5	• Project Phase 3: Enable: This phase focuses on finalizing resources, documentation, and deadlines for implementation sign-off. Deploying content to production is a crucial step, marking the transition from testing to live usage. Go-live support and hypercare processes are put in place to ensure a smooth transition, providing immediate assistance and troubleshooting to address any issues. This stage ensures that the OGL deployment is stable and fully functional, ready to deliver value to the organization.

Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q53-Q58):

NEW QUESTION # 53
In the Refine phase, what is the Project Manager responsible for?

- A. Creating a project plan and timeline
- B. Publishing OGL in the production environment
- C. Building and testing custom guides

Answer: A

Explanation:
In the Refine phase, the Project Manager is responsible for creating a project plan and timeline (option A) to guide content optimization and final preparations for deployment. This phase focuses on refining content and processes, requiring a structured plan to coordinate testing, feedback integration, and sign-off. Publishing OGL in production (option B) occurs in the Publish phase, not Refine, while building and testing guides (option C) is typically handled by OGL Content Developers. The Project Manager's role here is strategic, ensuring all activities align with deadlines and objectives, making the plan and timeline foundational to Refine-phase success.

NEW QUESTION # 54
Which Oracle Fusion business processes are outlined in the training?

- A. SCM and P6
- B. HCM and ERP
- C. OPC and Unifier

Answer: B

Explanation:
Oracle Guided Learning training typically focuses on Oracle Fusion business processes like Human Capital Management (HCM) and Enterprise Resource Planning (ERP), as these are core modules widely implemented in Fusion applications. SCM (Supply Chain Management) and P6 (option A) or OPC and Unifier (option B) are more specialized or unrelated to standard Fusion training in OGL. HCM and ERP are foundational to OGL's Fusion-focused content.

NEW QUESTION # 55
Which platform provides learning paths to help you access digital content on OGL?

- A. Cloud Customer Connect
- B. Oracle MyLearn
- C. Learning Management System
- D. Internet Browser

Answer: B

Explanation:
Oracle MyLearn is the dedicated platform for OGL learning paths, offering digital content and training. LMS (option A) is generic, Internet Browser (option B) is a tool, and Cloud Customer Connect (option D) is a community, not a learning platform.

NEW QUESTION # 56
Which types of applications use JavaScript to enable OGL?

- A. Oracle applications
- B. Non-Fusion and third-party applications
- C. Fusion applications

Answer: B

Explanation:
Non-Fusion and third-party applications rely on JavaScript to integrate and enable OGL functionality, as they lack the native integration of Fusion applications. Fusion (option A) and broader Oracle applications (option B) typically use built-in mechanisms, not JavaScript alone.

NEW QUESTION # 57

What approaches can be adopted to meet OGL data requirements?

- **A. Create test data and "dummy" users, use a masked environment, or use an unmasked environment**
- B. Create generic user accounts, create ad hoc content, and use an external host application.
- C. Use a UAT environment, sign in with an external personal account, and stand by for go live.

Answer: A

Explanation:
Meeting OGL data requirements involves creating test data and "dummy" users, or using masked/unmasked environments to simulate real conditions safely. Options B and C include impractical or unrelated approaches.
